CDA4 Programme Design Template Module specification (with KIS) 2014-15

MODULE SPECIFICATION

Part 1: Basic Data					
Module Title	Dissertation				
Module Code	UZYRS8-40-M		Level	M	Version 3
UWE Credit Rating	40	ECTS Credit Rating	20	WBL module?	No
Owning Faculty	Health and Applied Sciences		Field	Allied Health Professions	
Department	Allied Health Professions		Module Type	Project	
Contributes towards	MSc Radiotherapy and Oncology				
Pre-requisites	60 level 3 credits or equivalent on related area.		Co- requisites	None	
Excluded Combinations	None		Module Entry requirements		
First CAP Approval Date	16/07/09		Valid from	01/09/09	
Revision CAP Approval Date	03/02/2015		Revised with effect from	01/01/16	

Review Date <i>(6 years from full CAP approval date (not revisions))</i>	
--	--

Part 2: Learning and Teaching	
Learning Outcomes	<p>On successful completion of this module students will be able to:</p> <ul style="list-style-type: none"> • Produce a comprehensive and critical review of the literature (Component A, Element 1). • Demonstrate breadth and depth of understanding of the strengths and weaknesses of an investigation (Component A, Element 1). • Critically evaluate and explore aspects of the research process including issues of reliability, validity, ethical issues and constraints (Component A, Element 1). • Evaluate and contribute to theoretical and methodological debate in their discipline area (Component A, Element 1). • Design and execute a well planned research study based on relevant research methodology, within a framework of research governance (Component A, Element 1). <p>Mapping of specific learning outcomes for the dissertation will be dependent upon the nature of the study and the methodology employed.</p>

Syllabus Outline	The cohort meets with the module leader on up to three timetabled workshops (2hours 20 minutes each). One of these workshops may be used pre module start to support students in preparing ethics applications for their projects. The remaining workshops are designed to support students in understanding the nature of individual investigation, the value of using supervision appropriately and academic writing for journals. Students are allocated a dissertation supervisor to: a) confirm aims, questions and proposed research strategy and setting out a programme of work b) demonstrate the ability for independent work and ability to manage the study																																								
Contact Hours	Students have up to seven hours of workshops. Students are allocated a supervisor who has the main responsibility for co-ordinating formal support, monitoring progress and project supervision. It is the student's responsibility to initiate and maintain contact with the supervisor. The student is entitled to 14 hours supervision; this includes contact time through face-to-face meetings, email or other technology-aided discussion and formative assessment. Further support is available for supporting ethics applications (12 hours for NRES applications and 5 hours for UWE ethics applications).																																								
Teaching and Learning Methods	Independent learning underpins the teaching and learning strategy on the dissertation module. The student has an identified dissertation supervisor and 14 hours supervision. Supervision includes contact hours with the supervisor and formative feedback on draft work. Dissertation workshops make up to seven hours of scheduled learning.																																								
Key Information Sets Information	Key Information Set - Module data																																								
	Number of credits for this module				400																																				
	Hours to be allocated	Scheduled learning and teaching study hours	Independent study hours	Placement study hours	Allocated Hours

Reading Strategy	Core readings Any essential reading will be indicated clearly, along with the method for accessing it, e.g. students may be referred to texts that are available electronically or in the Library. Module guides will also reflect the range of reading to be carried out.																																								

	<p>Further readings</p> <p>Students are expected to identify all other reading relevant to their chosen topic for themselves. They will be required to read widely using the library search, a variety of bibliographic and full text databases, and Internet resources. Many resources can be accessed remotely. The purpose of this further reading is to ensure students are familiar with current research, classic works and material specific to their interests from the academic literature.</p> <p>Access and skills</p> <p>The nature of dissertation is independent study in which students will develop their information retrieval and evaluation skills in order to identify such resources effectively. Additional support is available through the Library Services web pages, including interactive tutorials on finding books and journals, evaluating information and referencing. Sign up workshops are also offered by the Library.</p>
Indicative Reading List	<p>The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, <i>current</i> advice on readings will be available via other more frequently updated mechanisms.</p> <p>Bourgeault, I. Dingwall, R. de Vries, R. (2010) <i>The Sage Handbook of Qualitative Methods in Health Research</i>. London. Thousand Oakes California. New Delhi. Singapore: Sage Publications Ltd.</p> <p>Bowling, A. Part 3: Assessment

Assessment Strategy	<p>The assessment strategy for this module is in the form of a portfolio of course work.</p> <p>The summative assessment is work that allows the student to present the</p>
---------------------	---

	<p>design and execution of a primary or secondary research study or service evaluation that they have undertaken. Students will be asked to submit a 'dissertation portfolio' containing the following three elements, which altogether will be a maximum of 10,000 words (excluding reference lists):</p> <ol style="list-style-type: none"> 1. A journal article prepared for submission to a journal of their choice. The journal article will carry 80% of the marks 2. An explanation and justification of the academic journal the paper is (hypothetically) written for (5% marks) 3. A reflection on their research. This will provide students space to justify their decisions in carrying out the research and in evaluation that might not fit well in the journal article (15% marks). <p>Formative assessment occurs throughout the module as the student works with the allocated dissertation supervisor.</p>
