

STUDENT AND ACADEMIC SERVICES

MODULE SPECIFICATION

Part 1: Basic Data					
Module Title	Research Design and Analysis 1				
Module Code	USPJL7-30-1	Level	1	Version	2
Owning Faculty	Health and Applied Sciences	Field	Psychology		
Contributes towards	BSc Hons Psychology + Psychology combinations				
UWE Credit Rating	30	ECTS Credit Rating	15	Module Type	Standard
Pre-requisites	None		Co- requisites	None	
Excluded Combinations	None		Module Entry requirements	None	

Part 2: Learning and Teaching	
Learning Outcomes	<p>On successful completion of this module students will be able to:</p> <ul style="list-style-type: none"> Understand the basic principles of experimental design (quantitative and qualitative) and its relationship to statistical analysis (Component A, B) Distinguish and summarise different types of information and data using appropriate information technology (Component B) Understand the principles of descriptive and inferential statistical analysis (Component A, B) Recognise and demonstrate an understanding for the ethical issues involved in research (Component A, B) Demonstrate an understanding of the perspective of the participant in research (Component B)
Syllabus Outline	<p>Students have the opportunity to engage with research methods and statistics at a number of levels (see below). For example, they may have the opportunity to learn about:</p> <ul style="list-style-type: none"> An introduction to experimental design: independent and dependent variables, confounding variables, extraneous variables and control of these variables through methods such as randomisation and counter balancing. Comparison of between subjects, within subjects, matched pairs and mixed designs Approaches to qualitative data collection and analysis: observation and questionnaire development Use of spreadsheet, statistical and graphics software to obtain descriptive statistics and to construct tables and graphs Data summary and presentation: tables, bar charts, pictograms, histograms, cumulative charts, and scatter plots Types of data: Inductive and deductive approaches and their relationship to qualitative and quantitative data; obtaining nominal, ordinal, interval and ratio

	<ul style="list-style-type: none"> • data • Descriptive statistics: frequency distributions, measures of central tendency and dispersion. The normal and binomial distribution: rationale and use. • Theories of measurement and psychological testing: Measurement error, validity, reliability and generalizability • Parametric and non parametric tests for within and between subjects designs - t tests, Wilcoxon and Mann-Whitney tests, chi square test for contingency tables and one way Anova • Measures of association – Pearson’s and Spearman’s correlation coefficients, simple linear regression • Ethical issues in research 																														
Contact Hours	<p>Students are typically expected to have 3 hours of contact time per week over a 24-week period of study. Contact time comprises of a mixed model of instruction that includes lectures, seminars/practicals and online activities/sessions delivered within a virtual learning environment (e.g., online lectures, asynchronous discussions, virtual classrooms, etc.).</p> <p>Contact time is primarily based on in-class sessions with half of the time being based on lecture based sessions and the other half on seminar/practical based sessions.</p>																														
Teaching and Learning Methods	<p>A variety of pedagogical approaches are used to ensure the active engagement of students. Scheduled learning includes lectures, seminars, practical classes and workshops. Independent learning includes hours engaged with essential reading, assignment preparation and completion etc.</p> <p>The module will use videos, pdfs, and self-directed on-line learning to establish basic knowledge and understanding, followed by group seminars/practicals to gain hands-on experience constructing, organising, and analysing information. Discussion and feedback is a continuous aspect of the module occurring at the group level and on individual assignments where appropriate.</p> <p>Students will be enabled to use Blackboard the university supported virtual learning environment to organise and communicate their learning material. Students will be able to engage with the material, other students and members of staff through this system and make use of the various functionalities built into the Blackboard (e.g., blogs, journals, audio, video, discussion boards, wikis, etc.). Moreover, students will be able to communicate with their instructors using university sponsored tools (such as Lync).</p>																														
Key Information Sets Information	<p>Key Information Sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.</p> <table border="1" data-bbox="459 1630 1369 2018"> <thead> <tr> <th>Hours to be allocated</th> <th>Scheduled learning and teaching study hours</th> <th>Independent study hours</th> <th>Placement study hours</th> <th>Allocated Hours</th> <th></th> </tr> </thead> <tbody> <tr> <td>300</td> <td>72</td> <td>228</td> <td>0</td> <td>300</td> <td></td> </tr> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </tbody> </table> <p>The table below indicates as a percentage the total assessment of the module which</p>	Hours to be allocated	Scheduled learning and teaching study hours	Independent study hours	Placement study hours	Allocated Hours		300	72	228	0	300																			
Hours to be allocated	Scheduled learning and teaching study hours	Independent study hours	Placement study hours	Allocated Hours																											
300	72	228	0	300																											

	constitutes a -			
	Written Exam: Multiple-Choice exam			
	Coursework: Written assignment (report/project)			
	Total assessment of the module:			
	Written exam assessment percentage		30%	
	Coursework assessment percentage		70%	

Reading Strategy	<p>All students will be encouraged to make full use of the print and electronic resources available to them through membership of the University. These include a range of electronic journals and a wide variety of resources available through web sites and information gateways. The University Library's web pages provide access to subject relevant resources and services, and to the library catalogue. Many resources can be accessed remotely. Students will be presented with opportunities within the curriculum to develop their information retrieval and evaluation skills in order to identify such resources effectively.</p> <p>Any essential reading will be indicated clearly, along with the method for accessing it, e.g. students may be expected to purchase a set text, be given or sold a print study pack or be referred to texts that are available electronically, etc. This guidance will be available either in the module handbook, via the module information on Blackboard or through any other vehicle deemed appropriate by the module/programme leaders.</p> <p>If further reading is expected, this will be indicated clearly. If specific texts are listed, a clear indication will be given regarding how to access them and, if appropriate, students will be given guidance on how to identify relevant sources for themselves, e.g. through use of bibliographical databases.</p> <p>A detailed reading list will be made available through relevant channels, e.g. module handbooks, Blackboard, etc.</p> <p>As part of the research, students will be expected to read and reference widely. Student learning will be supported through 'Blackboard' - the University's E learning space. Copies of recommended text books, scientific papers and relevant magazines are available through the library.</p>
------------------	---

Indicative Reading List	<p>McBride, D. (2013) <i>The Process of Research in Psychology</i>. Sage.</p> <p>Brace, N., Snelgar, R. and Kemp, R. (2012) <i>SPSS for Psychologists</i>. Palgrave.</p> <p>Jones, S. (2010) <i>Statistics in Psychology: Explanations without Equations</i>. Palgrave</p> <p>Gavin, H. (2008), <i>Understanding research methods and statistics in psychology</i>, SAGE. (e-book)</p> <p>Howitt, D. & Cramer, D. (2011), <i>Introduction to research methods in psychology</i>, Prentice Hall. (e-book)</p> <p>Martin, W.E. & Bridgmon, K.D. (2012), <i>Quantitative and statistical research methods: from hypothesis to results</i>, Jossey-Bass. (e-book)</p>
-------------------------	---

Part 3: Assessment	
Assessment Strategy	<p>Coursework (Component B)</p> <p>Students must provide evidence of understand the basic principles of research ethics, experimental design and its relationship to descriptive and</p>

	<p>statistical analysis using appropriate information technology.</p> <p>The portfolio provides framework for students to participate in research projects through the UWE Participant Pool and engage in a range of online activities that may include interactive computer marked multiple choice questions. Additionally, students will have the opportunity to demonstrate development of a full research report and receive feedback.</p> <p>A full research report will be submitted in semester 2.</p> <p>Final Exam (Component A)</p> <p>Students must provide evidence of understanding the basic principles of research methods and statistics. Such evidence may be made up of a multiple-choice exam under timed conditions in order to cover the broad range of material associated with research methods and statistics.</p> <p>Resit (Component B)</p> <p>Students are not able to complete a portfolio of engagement and development outside of the timetabled class period due to the lack of interactive opportunities available during the summer months. As such, students are required to complete an extended full research report to demonstrate the listed learning outcomes of the module.</p>
--	---

Identify final assessment component and element		
% weighting between components A and B (Standard modules only)	A: 30%	B: 70%
First Sit		
Component A (controlled conditions) Description of each element	Element weighting (as % of component)	
1. Timed Exam (1 hr)	100%	
Component B Description of each element	Element weighting (as % of component)	
1. Portfolio	50%	
2. Full Research Report (1500 words)	50%	

Resit (further attendance at taught classes is not required)		
Component A (controlled conditions) Description of each element	Element weighting (as % of component)	
1. Timed Exam (1 hr)	100%	
Component B Description of each element	Element weighting (as % of component)	
1. Full Research Report (3000 words)	100%	
<p>If a student is permitted an EXCEPTIONAL RETAKE of the module the assessment will be that indicated by the Module Description at the time that retake commences.</p>
