

MODULE SPECIFICATION

Part 1: Information			
Module Title	Wireless Sensor Networks		
Module Code	UFMF3E-15-M	Level	Level 7
For implementation from	2019-20		
UWE Credit Rating	15	ECTS Credit Rating	7.5
Faculty	Faculty of Environment & Technology	Field	Engineering, Design and Mathematics
Department	FET Dept of Engin Design & Mathematics		
Module type:	Standard		
Pre-requisites	None		
Excluded Combinations	None		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description
<p>Educational Aims: See Learning Outcomes</p> <p>Outline Syllabus: The module provides an overview on wireless sensor networks (WSN). It includes topics such as:</p> <p>Fields of Application of WSN (environmental, healthcare, military etc.)</p> <p>Enabling Technologies.</p> <p>Networking, protocols and routing in WSN.</p> <p>Deployment and practical implementation issues in WSN.</p> <p>Data Processing in WSN (e.g. data aggregation).</p> <p>Sensors and sensors technology.</p> <p>Real time, low power operating systems (tinyOS open source operating system)</p>

STUDENT AND ACADEMIC SERVICES

Programming, debugging real time implementations in both software and hardware.

Teaching and Learning Methods: See Learning Outcomes and Assessment.

Part 3: Assessment

The module will be assessed in two components.

Component A: Research and Presentation. Consists of two assessments:

A1. Research: Students will have to research an application of WSN and submit a report describing their findings.

A2. Presentation (30 minutes): Students will have to present their findings during the assessment period.

Component B consists of one assessment:

B1. Lab-based project: students as members of a small group develop a real time WSN application and demonstrate it in the lab at the end of term.

The referred coursework will consist of an investigation and report.

Formative feedback will be provided during the laboratory sessions and tutorials.

First Sit Components	Final Assessment	Element weighting	Description
Project - Component B		50 %	Group based Laboratory Project
Project - Component A	✓	25 %	Research project
Presentation - Component A		25 %	Presentation (30 minutes)
Resit Components	Final Assessment	Element weighting	Description
Written Assignment - Component B		50 %	Coursework
Project - Component A	✓	25 %	Research project
Presentation - Component A		25 %	Presentation (30 minutes)

Part 4: Teaching and Learning Methods																	
Learning Outcomes	<p>On successful completion of this module students will achieve the following learning outcomes:</p> <table border="1"> <thead> <tr> <th style="text-align: left;">Module Learning Outcomes</th> <th style="text-align: left;">Reference</th> </tr> </thead> <tbody> <tr> <td>An understanding of mathematical and computer models as applied to WSN and any of their limitations</td> <td>MO1</td> </tr> <tr> <td>An understanding of the basic structure of a WSN node and the ability to use it (in combination with others) in real time applications</td> <td>MO2</td> </tr> <tr> <td>Knowledge and understanding of network architectures and protocols in wireless systems in general and in WSN in particular</td> <td>MO3</td> </tr> <tr> <td>The ability to use development tools to design, program, implement and test WSN systems</td> <td>MO4</td> </tr> <tr> <td>The competencies involved in problem identification, analysis, design development of a WSN based system</td> <td>MO5</td> </tr> <tr> <td>Competence in using technical (and non-technical) literature and the ability to obtain documentation from various sources</td> <td>MO6</td> </tr> <tr> <td>Ability to apply engineering techniques, taking account of a range of commercial and industrial constraints</td> <td>MO7</td> </tr> </tbody> </table>	Module Learning Outcomes	Reference	An understanding of mathematical and computer models as applied to WSN and any of their limitations	MO1	An understanding of the basic structure of a WSN node and the ability to use it (in combination with others) in real time applications	MO2	Knowledge and understanding of network architectures and protocols in wireless systems in general and in WSN in particular	MO3	The ability to use development tools to design, program, implement and test WSN systems	MO4	The competencies involved in problem identification, analysis, design development of a WSN based system	MO5	Competence in using technical (and non-technical) literature and the ability to obtain documentation from various sources	MO6	Ability to apply engineering techniques, taking account of a range of commercial and industrial constraints	MO7
Module Learning Outcomes	Reference																
An understanding of mathematical and computer models as applied to WSN and any of their limitations	MO1																
An understanding of the basic structure of a WSN node and the ability to use it (in combination with others) in real time applications	MO2																
Knowledge and understanding of network architectures and protocols in wireless systems in general and in WSN in particular	MO3																
The ability to use development tools to design, program, implement and test WSN systems	MO4																
The competencies involved in problem identification, analysis, design development of a WSN based system	MO5																
Competence in using technical (and non-technical) literature and the ability to obtain documentation from various sources	MO6																
Ability to apply engineering techniques, taking account of a range of commercial and industrial constraints	MO7																
Contact Hours	<table border="1"> <tbody> <tr> <td colspan="2">Independent Study Hours:</td> </tr> <tr> <td style="text-align: center;">Independent study/self-guided study</td> <td style="text-align: center;">126</td> </tr> <tr> <td style="text-align: center;">Total Independent Study Hours:</td> <td style="text-align: center;">126</td> </tr> <tr> <td colspan="2">Scheduled Learning and Teaching Hours:</td> </tr> <tr> <td style="text-align: center;">Face-to-face learning</td> <td style="text-align: center;">24</td> </tr> <tr> <td style="text-align: center;">Total Scheduled Learning and Teaching Hours:</td> <td style="text-align: center;">24</td> </tr> <tr> <td>Hours to be allocated</td> <td style="text-align: center;">150</td> </tr> <tr> <td>Allocated Hours</td> <td style="text-align: center;">150</td> </tr> </tbody> </table>	Independent Study Hours:		Independent study/self-guided study	126	Total Independent Study Hours:	126	Scheduled Learning and Teaching Hours:		Face-to-face learning	24	Total Scheduled Learning and Teaching Hours:	24	Hours to be allocated	150	Allocated Hours	150
Independent Study Hours:																	
Independent study/self-guided study	126																
Total Independent Study Hours:	126																
Scheduled Learning and Teaching Hours:																	
Face-to-face learning	24																
Total Scheduled Learning and Teaching Hours:	24																
Hours to be allocated	150																
Allocated Hours	150
