

MODULE SPECIFICATION

Part 1: Information						
Module Title	Screen Media					
Module Code	UPCA9B-30-2	Level	2			
For implementation from	September 2017	September 2017				
UWE Credit Rating	30	ECTS Credit Rating	15			
Faculty	ACE	Field	Cultural Industries			
Department						
Contributes towards	BA(Hons) Media Culture and Practice BA (Hons) Media and Cultural Production BA (Hons) Media Culture and Communication BA (Hons) Liberal Arts					
Module type:	Standard					
Pre-requisites	UPCAL5-30-2 Mediated Lives					
Excluded Combinations	None					
Co- requisites	None					
Module Entry requirements	N/A					

Part 2: Description

Screen Media builds on foundational skills developed across Level 1 modules. Specifically enhancing skills and knowledge relating to the study of screen media, the module engages with contemporary social and cultural contexts whilst also tracing back into history to study how they have developed up to the present day. The centrality of television is considered as one of the most dominant sites of cultural anxieties, pleasures, controversy and excitement since its invention in the 1920s. The impact of digital convergence and the effects this is having on media genres, their modes of distribution, consumption and interactions in everyday life is also explored. The specific case studies and examples used will change from year to year but may include: usergenerated content and co-creativity; interactive documentary; mobile phones and games consoles; multiplatform engagements.

The module introduces students to industry practices relating to aspects of screen cultures that include: branding; the politics of representations; connectivity and interactivity; participatory media; and media audiences. *Screen Media* develops students' knowledge and understanding of a range of screen media forms, industries and practices, their historical development and their role within contemporary culture and society, encouraging engagement with contemporary and emerging developments in the creative economy, digital and participatory media. The Individual Research Project develops an awareness of ethical issues relating to research and production in the cultural and media sector including questions of difference, diversity and inequality.

The module includes guest lectures by external partners in the Digital Cultures Research Centre in order to expand student understanding of practice and theory, and to integrate their learning experience within a wider research context. Speakers from industry are also invited.

Students are expected to be able to identify and retrieve appropriate reading. This module offers an opportunity to

further develop information skills introduced at Level 1. Students will be given the opportunity to attend sessions on selection of appropriate databases and search skills. Additional support is available through the library web pages, including interactive tutorials on finding books and journals, evaluating information and referencing. Signup workshops are also offered by the Library.

Scheduled learning Teaching will take place in three hour weekly workshops allowing, variously, for lectures, screenings, seminar discussions and group work.

Independent learning Independent study includes set and recommended reading and viewing, and assignment preparation. Students will be guided by a clear syllabus outline in the module handbook and

assignment preparation. Students will be guided by a clear syllabus outline in the module handbook and preparation questions and/or tasks communicated via Blackboard.					
Part 3: Assessment					
Students undertake Component A - 10 minute group presentation – held in-class.					
Component B - Short academic essay (1500 words). Individual Research Project (approx. 3000 words).					
Identify final timetabled piece of assessment (component and element)					
% weighting between components A and B (Standard modules only)	A: 25%	B: 75%			
First Sit					
Component A (controlled conditions) Description of each element	Element weighting (as % of component)				
1. Group presentation	100%				
Component B Description of each element		Element weighting (as % of component)			
1. Short Essay (1500 words)		33%			
2. Research Project (3000 words or equivalent)	67%				
Resit (further attendance at taught classes is not required)
