

MODULE SPECIFICATION

Part 1: Information			
Module Title	Mechanisms and Structures		
Module Code	UBLFQ9-30-1	Level	Level 4
For implementation from	2019-20		
UWE Credit Rating	30	ECTS Credit Rating	15
Faculty	Faculty of Environment & Technology	Field	Architecture and the Built Environment
Department	FET Dept of Architecture & Built Environ		
Module type:	Standard		
Pre-requisites	None		
Excluded Combinations	None		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description
<p>Educational Aims: See learning objectives.</p> <p>Outline Syllabus: This module is an introduction to mechanical engineering principles through applied mathematics, analytical reasoning, observation & physical prototyping.</p> <p>Introduction to Engineering.</p> <p>Design Engineering product case studies.</p> <p>Core Maths Skills.</p> <p>Force, Moment and Equilibrium.</p> <p>Mechanisms, Machines, work, energy and power, Springs and Pressure.</p> <p>Direct Stress & Strain, Shear Stress and Torsion, Cantilevers & Beams, Truss frames.</p> <p>The syllabus may also include some of the following topics:</p>

STUDENT AND ACADEMIC SERVICES

Friction, Electricity, Ergonomics, Graphical methods, Centre of gravity and balance, Buckling.

Teaching and Learning Methods: Teaching and Learning Strategy for this module is 'lectorial' based learning in which a topic lecture will introduce the students to the assigned or coming up exercises and/or project which supports and frames their acquisition of topic specific knowledge and skills.

The exercises and projects are designed to facilitate competency acquisition through the didactic and applied learning, building knowledge through the introduction of new subject matter and reinvestment of gained knowledge and skills. The tutorial portion (3 hours) of the studio is designed for the learner to have access to tutorial support, work in the close proximity of classmates and to self-assess his/her progress through the exercises and/or projects.

Exercise and Project work outside of scheduled hours is an essential component to the successful completion of the assigned work with an average time investment of 6+ hours per week. Students will be expected to come prepared for the module sessions with in-process or completed work and supplies.

At times though the run students will be required to pre-read on topics and selected materials, research and orally present on the topic.

Projects and course work is assessed through viva (oral presentations) "pinup" and project demonstrations in front of the students peers and tutors.

Feedback will be in the form of direct verbal and/or written. Marking criteria and assessment format will be clearly indicated on the Project Brief made accessible to the students at the beginning of each project.

Knowledge and Skills reinvestment from parallel running modules are assessable criteria and essential for progression through the curriculum.

Additional tutorial support is offered through individual appointments with the module tutors and through PAL.

Part 3: Assessment

The assessment strategy in this standard module is based upon evaluations of the process and the outcomes of the completed projects and a written exam.

Summative Assessment: Projects are evaluated on subject specific criteria clearly stated on each project brief at the outset of each project:

Projects are evaluated in both peer critiques (controlled condition evaluations) and direct submissions. These presentation critiques are held during term time and during the examination period. Typical presentations are 5 to 15 minutes in duration including the formal presentation and feedback from peers and tutors. (B)

Examination on design and analysis of mechanical structures (2 hours) (A)

An overall mark percentage of professionalism is allotted to assess aspects of participation and engagement (B)

Formative Assessment: Regular "in-process" critiques and one-to-one tutoring is given throughout the development process of the projects.

Feedback: Peer and tutor feedback is provided during the development process of the projects, during the project critiques.

STUDENT AND ACADEMIC SERVICES

First Sit Components	Final Assessment	Element weighting	Description
Project - Component B		38 %	Project 2: Structural Design and Analysis (42 Hours)
Project - Component B		37 %	Project 1: Kinetic Design and Analysis (42 Hours)
Examination - Component A	✓	25 %	Examination (2 hours)
Resit Components	Final Assessment	Element weighting	Description
Project - Component B		75 %	Comprehensive project
Examination - Component A	✓	25 %	Examination (2 hours)

Part 4: Teaching and Learning Methods																	
Learning Outcomes	<p>On successful completion of this module students will achieve the following learning outcomes:</p> <table border="1"> <thead> <tr> <th>Module Learning Outcomes</th> <th>Reference</th> </tr> </thead> <tbody> <tr> <td>Consideration and apply the appropriate mathematical and engineering principles to a particular design problem</td> <td>MO1</td> </tr> <tr> <td>Apply a systematic approach to problem solving using appropriate design tools and techniques</td> <td>MO2</td> </tr> <tr> <td>Evaluate technical risks and address risk in design methodology</td> <td>MO3</td> </tr> <tr> <td>Apply analytical skills in relation to designed objects including the ability to undertake visual analysis and to analyse designed objects in relation to their context</td> <td>MO4</td> </tr> <tr> <td>Apply creative and logical thinking processes as well as design methodologies to the creation of design solutions</td> <td>MO5</td> </tr> </tbody> </table>	Module Learning Outcomes	Reference	Consideration and apply the appropriate mathematical and engineering principles to a particular design problem	MO1	Apply a systematic approach to problem solving using appropriate design tools and techniques	MO2	Evaluate technical risks and address risk in design methodology	MO3	Apply analytical skills in relation to designed objects including the ability to undertake visual analysis and to analyse designed objects in relation to their context	MO4	Apply creative and logical thinking processes as well as design methodologies to the creation of design solutions	MO5				
Module Learning Outcomes	Reference																
Consideration and apply the appropriate mathematical and engineering principles to a particular design problem	MO1																
Apply a systematic approach to problem solving using appropriate design tools and techniques	MO2																
Evaluate technical risks and address risk in design methodology	MO3																
Apply analytical skills in relation to designed objects including the ability to undertake visual analysis and to analyse designed objects in relation to their context	MO4																
Apply creative and logical thinking processes as well as design methodologies to the creation of design solutions	MO5																
Contact Hours	<table border="1"> <thead> <tr> <th colspan="2">Independent Study Hours:</th> </tr> </thead> <tbody> <tr> <td>Independent study/self-guided study</td> <td>132</td> </tr> <tr> <td>Total Independent Study Hours:</td> <td>132</td> </tr> <tr> <th colspan="2">Scheduled Learning and Teaching Hours:</th> </tr> <tr> <td>Face-to-face learning</td> <td>96</td> </tr> <tr> <td>Project work (individual or group)</td> <td>72</td> </tr> <tr> <td>Total Scheduled Learning and Teaching Hours:</td> <td>168</td> </tr> <tr> <td>Hours to be allocated</td> <td>300</td> </tr> </tbody> </table>	Independent Study Hours:		Independent study/self-guided study	132	Total Independent Study Hours:	132	Scheduled Learning and Teaching Hours:		Face-to-face learning	96	Project work (individual or group)	72	Total Scheduled Learning and Teaching Hours:	168	Hours to be allocated	300
Independent Study Hours:																	
Independent study/self-guided study	132																
Total Independent Study Hours:	132																
Scheduled Learning and Teaching Hours:																	
Face-to-face learning	96																
Project work (individual or group)	72																
Total Scheduled Learning and Teaching Hours:	168																
Hours to be allocated	300																

STUDENT AND ACADEMIC SERVICES

	Allocated Hours	300

Part 5: Contributes Towards

This module contributes towards the following programmes of study:

Product Design Technology {Foundation} [Sep][FT][Frenchay][4yrs] BSc (Hons) 2018-19

Product Design Technology {Foundation} [Sep][SW][Frenchay][5yrs] BSc (Hons) 2018-19
