

## MODULE SPECIFICATION

Part 1: Information			
Module Title	Principles of Computing		
Module Code	UFCFA3-30-1	Level	Level 4
For implementation from	2019-20		
UWE Credit Rating	30	ECTS Credit Rating	15
Faculty	Faculty of Environment & Technology	Field	Computer Science and Creative Technologies
Department	FET Dept of Computer Sci & Creative Tech		
Module type:	Standard		
Pre-requisites	None		
Excluded Combinations	None		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description
<p><b>Educational Aims:</b> See Learning Outcomes</p> <p><b>Outline Syllabus:</b> Computation models: Finite Machines; Pushdown Automata; Turing Machines. How these abstract machines work. What limitations they have. How do apply them to real world applications. The significance of the Universal Turing Machines.</p> <p>Formal Languages: words, sentences, languages, grammars, productions. Links to computing models. How to formally define languages. How a compiler detects syntax errors.</p> <p>Algorithms: Classes of algorithms, search algorithms and sorting algorithms. Time and space complexity of algorithms. NP-complete problems.</p> <p>Recursion: Inductive definitions and recursive programs.</p> <p>Logic: Propositional and Predicate logic. Truth tables for basic logic operators. Inference methods.</p> <p>Mathematical Structures: Numbers. Sets. Functions. Relations. Matrices. Application of mathematical structure to computing. Enumerating (counting) these structures.</p>

## STUDENT AND ACADEMIC SERVICES

Graph Theory: Theory and its applications as a modelling tool. Classical problems: finding the shortest route on a graph and the travelling salesman problem.

**Teaching and Learning Methods:** Scheduled learning:

This module will be delivered by a series of lectures accompanied by a mixture of tutorials and hands-on practicals. The practicals will use software tools to help students understand the course contents. The tutorials will use the course handouts as the basis of discussions of issues presented in the lectures

Independent learning:

Students are expected to work outside scheduled classes on practice, assignment work and directed reading as described below.

This module will involve 6 hours contact time per fortnight. The time will be more or less equally divided between lecture sessions and laboratory sessions.

Activity (hrs)  
 Contact time (72)  
 Assimilation and development of knowledge (148)  
 Exam preparation (40)  
 Coursework preparation (40)  
 Total study time (300)

### Part 3: Assessment

Assessment consists of one examination (component A) and two coursework (component B).

The examination takes place at the end of academic year (worth 50%).

The coursework will consist of two elements:

E-assessment – for mathematical questions with a short and unique answer

Written-assessment – for other types tasks which cannot be marked automatically

The written assessment element will be a portfolio of tasks which the students will complete throughout the year. This strategy helps students to consolidate the taught content immediately after lectures.

Note that, e-assessment is not used for resit.

First Sit Components	Final Assessment	Element weighting	Description
Written Assignment - Component B		25 %	Written Assessment – a portfolio of tasks related to problems of computational theory
Set Exercise - Component A		25 %	e-Assessment – short answers to questions in mathematics
Examination - Component A	✓	50 %	Examination (2 hours)

## STUDENT AND ACADEMIC SERVICES

Resit Components	Final Assessment	Element weighting	Description
Written Assignment - Component B		50 %	Written Assessment – a combination of tasks related to mathematics and problems of computational theory.
Examination - Component A	✓	50 %	Examination (2 hours)

Part 4: Teaching and Learning Methods																			
Learning Outcomes	On successful completion of this module students will achieve the following learning outcomes:																		
	<table border="1"> <thead> <tr> <th>Module Learning Outcomes</th> <th>Reference</th> </tr> </thead> <tbody> <tr> <td>Understand simple models of computation and formulate small problems in terms of those models</td> <td>MO1</td> </tr> <tr> <td>Define the syntax of formal languages in terms of productions. Define functions using recursion</td> <td>MO2</td> </tr> <tr> <td>Explain algorithmic behaviour of programs in appropriate formal terms and Big-O notation</td> <td>MO3</td> </tr> <tr> <td>Design and simulate abstract computation models: Finite Automata, Push Down Automata, and Turing Machines.</td> <td>MO4</td> </tr> <tr> <td>Appreciate the limitations of computers</td> <td>MO5</td> </tr> <tr> <td>Use mathematical language, notation and methods in the description and analysis of problems in appropriate areas of application within computing.</td> <td>MO6</td> </tr> <tr> <td>Begin to abstract general principles from studying particular problems and solutions</td> <td>MO7</td> </tr> <tr> <td>Recognise the fundamental role of foundation mathematics and discrete mathematical structures within computing</td> <td>MO8</td> </tr> </tbody> </table>	Module Learning Outcomes	Reference	Understand simple models of computation and formulate small problems in terms of those models	MO1	Define the syntax of formal languages in terms of productions. Define functions using recursion	MO2	Explain algorithmic behaviour of programs in appropriate formal terms and Big-O notation	MO3	Design and simulate abstract computation models: Finite Automata, Push Down Automata, and Turing Machines.	MO4	Appreciate the limitations of computers	MO5	Use mathematical language, notation and methods in the description and analysis of problems in appropriate areas of application within computing.	MO6	Begin to abstract general principles from studying particular problems and solutions	MO7	Recognise the fundamental role of foundation mathematics and discrete mathematical structures within computing	MO8
	Module Learning Outcomes	Reference																	
	Understand simple models of computation and formulate small problems in terms of those models	MO1																	
	Define the syntax of formal languages in terms of productions. Define functions using recursion	MO2																	
	Explain algorithmic behaviour of programs in appropriate formal terms and Big-O notation	MO3																	
	Design and simulate abstract computation models: Finite Automata, Push Down Automata, and Turing Machines.	MO4																	
	Appreciate the limitations of computers	MO5																	
	Use mathematical language, notation and methods in the description and analysis of problems in appropriate areas of application within computing.	MO6																	
	Begin to abstract general principles from studying particular problems and solutions	MO7																	
Recognise the fundamental role of foundation mathematics and discrete mathematical structures within computing	MO8

**Part 5: Contributes Towards**

This module contributes towards the following programmes of study:

- Computing [Sep][FT][Frenchay][3yrs] BSc (Hons) 2019-20
- Software Engineering for Business [Sep][FT][Frenchay][3yrs] BSc (Hons) 2019-20
- Software Engineering for Business [Sep][SW][Frenchay][4yrs] BSc (Hons) 2019-20
- Computing [Sep][SW][Frenchay][4yrs] BSc (Hons) 2019-20
- Computing {Dual} [Aug][FT][Taylors][3yrs] BSc (Hons) 2019-20
- Computing {Dual} [Aug][SW][Taylors][4yrs] BSc (Hons) 2019-20
- Computing {Dual} [Mar][FT][Taylors][3yrs] BSc (Hons) 2019-20
- Computing {Dual} [Mar][SW][Taylors][4yrs] BSc (Hons) 2019-20
- Software Engineering [Oct][FT][GCET][4yrs] BEng (Hons) 2018-19
- Computing {Foundation} [Sep][FT][Frenchay][4yrs] BSc (Hons) 2018-19
- Computer Science {Foundation} [Sep][SW][Frenchay][5yrs] BSc (Hons) 2018-19
- Computer Science {Foundation} [Sep][FT][Frenchay][4yrs] BSc (Hons) 2018-19
- Computing {Foundation} [Sep][SW][Frenchay][5yrs] BSc (Hons) 2018-19
- Software Engineering [Feb][FT][GCET][4yrs] BEng (Hons) 2018-19
- Software Engineering for Business {Foundation} [Sep][FT][Frenchay][4yrs] BSc (Hons) 2018-19
- Software Engineering for Business {Foundation} [Sep][SW][Frenchay][5yrs] BSc (Hons) 2018-19
