

MODULE SPECIFICATION

Part 1: Information			
Module Title	Introduction to OO Systems Development		
Module Code	UFCFC3-30-1	Level	Level 4
For implementation from	2018-19		
UWE Credit Rating	30	ECTS Credit Rating	15
Faculty	Faculty of Environment & Technology	Field	Computer Science and Creative Technologies
Department	FET Dept of Computer Sci & Creative Tech		
Contributes towards	Software Engineering for Business [Sep][SW][Frenchay][4yrs] BSc (Hons) 2018-19 Computer Science [Sep][SW][Frenchay][4yrs] BSc (Hons) 2018-19 Software Engineering [Sep][SW][Frenchay][4yrs] BSc (Hons) 2018-19 Business Computing [Sep][FT][Frenchay][3yrs] BSc (Hons) 2018-19 Software Engineering [Jan][FT][Northshore][3yrs] BSc (Hons) 2018-19 Software Engineering {Dual} [Aug][FT][Taylors][3yrs] BSc (Hons) 2018-19 Software Engineering {Dual} [Mar][FT][Taylors][3yrs] BSc (Hons) 2018-19 Software Engineering [Sep][FT][Frenchay][3yrs] BSc (Hons) 2018-19 Computer Science [May][FT][Villa][3yrs] BSc (Hons) 2018-19 Computer Science [Jan][FT][Villa][3yrs] BSc (Hons) 2018-19 Computer Science [Sep][FT][Villa][3yrs] BSc (Hons) 2018-19 Computer Science [Sep][FT][Frenchay][3yrs] BSc (Hons) 2018-19 Software Engineering for Business [Sep][FT][Frenchay][3yrs] BSc (Hons) 2018-19 Business Computing [Sep][SW][Frenchay][4yrs] BSc (Hons) 2018-19		
Module type:	Standard		
Pre-requisites	None		
Excluded Combinations	None		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description

Educational Aims: See Learning Outcomes.

In addition to the educational experience set out in Learning Outcomes, this module will explore, develop, and practise:

Working in small groups and presenting work as a team.
The ability to complete problem solving tasks

Outline Syllabus: The syllabus will include the following topics:

Software development lifecycle
Software development methods (e.g. prototyping)
Problem solving & design with pseudo code (thinking algorithmically)
Problem solving & Intro to OOA&D with the UML class diagram
Introduction to a Java IDE(e.g. Netbeans)

A basic introduction to Object Oriented Paradigm including:
computer architecture overview
source code, byte code, machine code, compilers, interpreters
the role of the JVM
coding style guidelines
primitives, classes & objects
scope of variables
Iteration & Selection statements
arrays & collection classes
file I/O
interfaces
inheritance (& overriding)
GUIs (Netbeans GUI designer)
Deploying java applications (.jar files)
Testing & Use of IDE (Netbeans) debugger

Teaching and Learning Methods: The module is delivered through a combination of formally scheduled sessions and independent learning. The scheduled learning includes lectures, tutorials, demonstrations and practical classes/workshops.

The lecture session will be exploring OO software development theory and demonstrating good practice. These sessions will be responsive to feedback from tutorial sessions.

Practical/Tutorial sessions will concentrate on problem solving and developing/supporting learning of and practice of required skills – use of IDE, development tools (UML, pseudocode), testing and debugging.

The lecture and practical sessions will be closely integrated with each delivery mode informing the other.

In addition students will pursue directed independent learning. This will include time spent reading and absorbing the set text, completing practical exercises, case study preparation, assignment preparation and exam revision. The students will also work through a series of software problems which they will be able to self-assess using software tools. The formative feedback from the tool will help the students monitor their own progress.

Three hours of weekly contact time will be divided between lecture and practical/tutorial sessions as appropriate.

Activity (hrs)

STUDENT AND ACADEMIC SERVICES

Contact time (72)
 Assimilation and development of knowledge including completing formative assessment exercises (153)
 Exam preparation (55)
 Coursework preparation (20)
 Total study time (300)

Part 3: Assessment

The assessment will consist of:

1. A series of in-class tests resulting in a portfolio of programming exercises.
2. A group coursework assignment of problem solving and implementation. Students will be required to go through the full development cycle - given a problem specification they should demonstrate skills in solution formulation using appropriate techniques (pseudocode/UML) and implementation (computer based). Assessment of this will include an in-class demonstration.

There will also be continuous formative assessment consisting of: A series of self-marked exercises (with tutor demonstrated solutions to some).

Student group problem solving in tutorial sessions

The objective here is to encourage and enable students to confidently solve OO problems in a supportive atmosphere.

First Sit Components	Final Assessment	Element weighting	Description
Project - Component A	✓	50 %	A group coursework software development assignment – (submitted online). Assessment by an in-class demonstration.
Portfolio - Component B		50 %	A portfolio of unseen, in-class programming exercises.
Resit Components	Final Assessment	Element weighting	Description
Project - Component A	✓	50 %	Design and implementation a software system. Submitted as a report with supporting software. Assessment by an individual demonstration.
Portfolio - Component B		50 %	Submission of individual portfolio of programming exercises.

Part 4: Teaching and Learning Methods																			
Learning Outcomes	<p>On successful completion of this module students will be able to:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th colspan="2" style="text-align: center;">Module Learning Outcomes</th> </tr> </thead> <tbody> <tr> <td style="width: 15%;">MO1</td> <td>Demonstrate knowledge of the object oriented (OO) paradigm by producing software solutions to simple problems.</td> </tr> <tr> <td>MO2</td> <td>Solve simple problems using OO techniques and express the solutions algorithmically</td> </tr> <tr> <td>MO3</td> <td>Design an OO system using a design notation that has been explored during the module</td> </tr> <tr> <td>MO4</td> <td>Implement and test an simple OO software system using a suitable Integrated Development Environment (IDE)</td> </tr> <tr> <td>MO5</td> <td>Locate and utilise on-line resources (e.g. as JAVA API) to support self-learning</td> </tr> </tbody> </table>	Module Learning Outcomes		MO1	Demonstrate knowledge of the object oriented (OO) paradigm by producing software solutions to simple problems.	MO2	Solve simple problems using OO techniques and express the solutions algorithmically	MO3	Design an OO system using a design notation that has been explored during the module	MO4	Implement and test an simple OO software system using a suitable Integrated Development Environment (IDE)	MO5	Locate and utilise on-line resources (e.g. as JAVA API) to support self-learning						
Module Learning Outcomes																			
MO1	Demonstrate knowledge of the object oriented (OO) paradigm by producing software solutions to simple problems.																		
MO2	Solve simple problems using OO techniques and express the solutions algorithmically																		
MO3	Design an OO system using a design notation that has been explored during the module																		
MO4	Implement and test an simple OO software system using a suitable Integrated Development Environment (IDE)																		
MO5	Locate and utilise on-line resources (e.g. as JAVA API) to support self-learning																		
Contact Hours	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th colspan="2" style="text-align: center;">Contact Hours</th> </tr> </thead> <tbody> <tr> <td colspan="2" style="text-align: center;">Independent Study Hours:</td> </tr> <tr> <td style="text-align: center;">Independent study/self-guided study</td> <td style="text-align: center;">228</td> </tr> <tr> <td style="text-align: center;">Total Independent Study Hours:</td> <td style="text-align: center;">228</td> </tr> <tr> <td colspan="2" style="text-align: center;">Scheduled Learning and Teaching Hours:</td> </tr> <tr> <td style="text-align: center;">Face-to-face learning</td> <td style="text-align: center;">72</td> </tr> <tr> <td style="text-align: center;">Total Scheduled Learning and Teaching Hours:</td> <td style="text-align: center;">72</td> </tr> <tr> <td style="text-align: center;">Hours to be allocated</td> <td style="text-align: center;">300</td> </tr> <tr> <td style="text-align: center;">Allocated Hours</td> <td style="text-align: center;">300</td> </tr> </tbody> </table>	Contact Hours		Independent Study Hours:		Independent study/self-guided study	228	Total Independent Study Hours:	228	Scheduled Learning and Teaching Hours:		Face-to-face learning	72	Total Scheduled Learning and Teaching Hours:	72	Hours to be allocated	300	Allocated Hours	300
Contact Hours																			
Independent Study Hours:																			
Independent study/self-guided study	228																		
Total Independent Study Hours:	228																		
Scheduled Learning and Teaching Hours:																			
Face-to-face learning	72																		
Total Scheduled Learning and Teaching Hours:	72																		
Hours to be allocated	300																		
Allocated Hours	300
