<b>Part 3: Assessment</b>		
<p>The Department of Education views assessment and assessment feedback as an integral part of the learning and teaching process and, as such, provides a range of assessment opportunities which are innovative and creative yet rigorous and able to fulfil the requirements of both the University of West of England and relevant professional bodies. There will be both a variety of assessment types and methods utilised throughout each of the programmes and a variety of forms of feedback incorporating formative and summative perspectives on academic and professional development.</p> <p><b>Summative Assessment</b> The assessment strategy for this module is designed to support students' developing knowledge and understanding of different theories of learning. Component A requires students to identify and analyse a personal learning experience, drawing upon theoretical perspectives studied in the module.</p> <p>For component B: students construct an academic analysis of two theoretical approaches to learning covered in the module and reflect upon a range of key literature.</p> <p><b>Formative Assessment</b> Feedback on students' progress in their studies on this module will be provided during face to face meetings, via on line means, during seminars and in small group tutorials. The assessment strategy for this module is designed to support students' developing knowledge and understanding in the area of learning theories.</p> <p><b>A: Conceptual Domain (Core)</b> The assignment demonstrates that the student can identify and use relevant ideas and perspectives for purposes of reflection upon issues under study. <b>B: Literature Domain</b> The assignment demonstrates that the student has an awareness of appropriate literature and its relevance to the task. <b>C: Contextual Domain</b> The assignment demonstrates that the student has an awareness of contextual factors (e.g. personal, locational, historical, political etc.) influencing the area of study. <b>G: Action Domain</b> The assignment demonstrates that the student has awareness of a relationship between theory and practice in the workplace, and can use reflection to develop a personal theory and refine professional practice, with due regard to issues of equity and social justice.</p>
