

MODULE SPECIFICATION

Part 1: Information			
Module Title	Dissertation - Including Experience in EY Settings		
Module Code	UTTQQH-45-3	Level	Level 6
For implementation from	2020-21		
UWE Credit Rating	45	ECTS Credit Rating	22.5
Faculty	Faculty of Arts Creative Industries & Education	Field	Primary, Early Childhood and Education Studies
Department	ACE Dept of Education and Childhood		
Module Type:	Project		
Pre-requisites	None		
Excluded Combinations	Guided Study 2021-22		
Co-requisites	None		
Module Entry Requirements	None		
PSRB Requirements	None		

STUDENT AND ACADEMIC SERVICES

Part 2: Description

Features: Module Entry requirements: A successful CRB/DBS check confirmed by Admissions. Students must be fit to work in an EY setting (selfcertification) (UK route only).

Educational Aims: This module will involve developing and putting into practice the skills and attributes required to undertake a research project relating to early childhood. This will involve all phases of a research project, including identifying a research focus/question, philosophical approaches, methodologies, ethics, methods, working with participants (where possible), presenting findings and writing up the study.

Outline Syllabus: See Teaching and Learning Methods.

Teaching and Learning Methods: There will be some lectures and seminars and each student will be assigned a project supervisor who will offer significant support and formative feedback through tutorials, directed study, online engagement and e-mail contact. There is an expectation that students engage in a considerable amount of independent learning as part of this final, extended study.

Students will also be guided in the arrangements for work-related learning including checklists and expectations and will review further requirements including safeguarding children and issues and ethics in practice. Some attention will also be focused on writing for publication

Contact time for this module will take the form of lectures, seminars, tutorials, directed study, online engagement and e-mail contact as well as usually at least 100 contact hours work-related learning in an Early Years setting. At least half of this time must consist of days of at least 5 hours contact time with children, and includes the beginning or the end of the session.

Work-Related Learning and corresponding research should be undertaken in a setting where there is a professional with a qualification to ensure that the student will be supported appropriately in their professional development. The type of professional qualification will vary, depending on the type of setting, examples may include:

A minimum Level 3 related qualification, Early Years Teacher Status, Qualified Teacher Status, a social work qualification and experience with working with young children, speech and language qualification, post graduate qualification in play/art therapy.

Only in exceptional circumstances would a student be permitted to complete research and WRL in a setting where this is not the case. A clear rationale would be required to be submitted and discussed carefully with the module leader and dissertation team. Tutors would need to ensure that students are engaging in a worthwhile experience and that the placement can support fulfilment of the EC degree outcomes (please refer to the programme specification).

Part 3: Assessment

The module learning outcomes will be assessed through an individual presentation and a dissertation based on empirical research (where possible).

All students must have completed the appropriate ethical approval application and this must be approved and signed off by their supervisor before beginning their research. If the supervisor has any concerns which cannot be resolved with the tutee, then the ethical review will be passed to the module leader and then potentially to the

STUDENT AND ACADEMIC SERVICES

Faculty Research Ethics Committee to consider. Any subsequent changes to the project need to appear as amendments to the Ethical Review form and re-submitted to the supervisor for approval and re-signing. The completed Ethical Review form must be included in the assignment submission.

The presentation will give students the opportunity to consolidate their Study area and explicitly reflect on ethical practice.

The dissertation is designed so that students can explore and showcase their best work in their strongest area of interest. This will support students in recognising and developing future employment and study opportunities.

Any student who has been awarded a fail or non-submission for component A must see the module leader to discuss and agree their plans for their study before embarking on their research.

First Sit Components	Final Assessment	Element weighting	Description
Presentation - Component A		20 %	<p>Element 1</p> <p>An individual presentation of a research proposal for the student's study described in Element 2.</p> <p>7 minutes per presentation with an additional 1-2 minutes for tutor question/s.</p>
Dissertation - Component A	✓	80 %	<p>Element 2</p> <p>A study of 10,000 words, precise title to be negotiated with the tutor.</p> <p>A record of work-related learning days (100 contact hours) must be submitted (apart from in exceptional circumstances)</p> <p>The completed Ethical Review form must be included in the assignment submission.</p>
Resit Components	Final Assessment	Element weighting	Description
Presentation - Component A		20 %	<p>Element 1</p> <p>An individual presentation of a reflection on the learning journey undertaken in completing their study described in Element 2.</p> <p>7 minutes per presentation with an additional 1-2 minutes for tutor question/s.</p>
Dissertation - Component A	✓	80 %	<p>Element 2</p> <p>A study of 10,000 words, precise title to be negotiated with the tutor.</p> <p>A record of work-related learning days (100 contact hours) must be submitted (apart from in exceptional circumstances)</p> <p>The completed Ethical Review form must be included in the assignment submission.</p>
