Part 2: Learning and Teaching				
Learning Outcomes	 On successful completion of this module students will be able to: Demonstrate an understanding of the concept of team working (All) Demonstrate an understanding of group processes and dynamics and their implications for learning (All) Demonstrate a knowledge and understanding of roles within teams (All) Show competency in critical self-reflection and self-awareness as a team player, including personal impact (A2, B2) Communicate ideas and findings with clarity (All) Understand the ethical implications of practices and processes within teams (B) 			
Syllabus Outline	The learning on this module is experiential and enquiry-based; is guided through team coaching (see learning and teaching methods below for fuller explanation); and does not follow a set syllabus. The precise content of the team coaching sessions will be tailored to meet the needs of individual students and their Team Company, with a particular emphasis in this module on providing students with guidance, readings and coaching in the following areas:			
	 Group processes and team dynamics Principles of team working Team roles and learning environments Readings and guided reflections on team learning Giving and receiving constructive feedback and its contribution to learning 			
Contact Hours	Formal contact hours with staff will take the form of team coaching sessions, comprising 72 hours over the 27 week learning block (in total there will be 216 hours of team coaching across the 90 credits studied in this teaching block). There is an			

expectation that students will attend all team coaching sessions. In addition, students may have access to support from an 'Assistant Coach' – a recent graduate of a similar programme.

Students on the programme will typically spend more time on campus, working in their team companies than would typically be the case and each team will have its own dedicated space within the 'Team Entrepreneurship' suite. At least one of the Team Coaches will typically be present during normal working hours in the suite.

The programme is supported by the Blackboard virtual learning environment and makes extensive use of this technology to support discussion groups, share project reports, etc.

Taken together, a student will typically receive 80-88 contact hours on this module.

Teaching and Learning Methods

Scheduled learning on this module is based around team coaching sessions, supplemented by coach support and giving and receiving peer feedback. During this learning block there will be two x 3-hour team coaching sessions per week, shared with the other Level 1 modules. Students will also work with the Team Coach and their peers to maintain and develop team working portfolio as projects and the module unfold.

Students will undertake learning activities within their Team Company, and will select appropriate texts that support their practice and deepen their learning on these activities. They will be guided in selecting appropriate reading material from the programme reading handbook by the Team Coach and their peers.

The study time on this module for a typical student will be:

72 hours Team coaching Team meetings 18 hours Peer coaching sessions 40 hours Feedback sessions 18 hours Reading 50 hours Learning project 40 hours Learning contract 10 hours Reflective logs 12 hours Assessment 40 hours

Scheduled learning on this module is through participation in team coaching sessions.

Independent learning includes hours engaged with essential reading, identifying and approaching potential clients, undertaking projects and recording learning, assignment preparation and completion etc. These sessions constitute an average time per level as indicated in the table below.

Reading Strategy

The reading strategy on this module is designed to encourage students to read relevant and challenging books and refereed journal articles at a point in time when they can apply ideas and concepts learned on peer coaching and learning projects. Readings are selected from the programme reading handbook, supported by readings identified and retrieved independently. In accessing reading materials in this way, the reading strategy aims to support students in making strong connections between theory and its application in practice and in developing their skills in identifying, sifting and selecting information sources.

Students on this module are, therefore, expected to access readings to support their learning and performance in teambuilding activities and on learning projects, and can expect to apply their learning from these materials in the course of their project and/or their reflections on the project. They will be supported in the selection process by their Team Coach and their peers.

On this module, students will be required to read and review materials that are relevant to the topic of learning within teams through guided research undertakings. In addition they will be required to read and review materials that are relevant to their own learning objectives as set within their learning contract.

The programme reading handbook provides an extensive book list across the whole programme. Updated annually to ensure currency, the programme reading handbook is available on Blackboard, as well as in hard copy. It is organised by broad topic area to improve ease of access, whilst still permitting students to select the readings of most relevance to them.

Indicative Reading List

Indicative readings for this module include:

Downey, M. (2003) Effective Coaching: Lessons from the Coaches Coach

Isaacs, W.R (1999) Dialogue: The Art of Thinking Together

Kline, N. (1998) Time to Think

Rogers, J. (2008) Coaching Skills: A Handbook

Starr, J. (2010) The Coaching Manual

Thornton, C. (2010) Group and Team Coaching

Part 3: Assessment					
Assessment	In keeping with the learning strategy for the module, the assessment strategy has				

Strategy

been developed to encourage students to reflect deeply on their experience and their learning and to make strong connections between theory, ideas and concepts and their application in practice.

Summative assessment of practice-led activity will require the student to work with their peers in their Team Company to develop a Training Session Plan for their Company that will facilitate team learning. Students will also maintain a portfolio capturing their practice within teams – specific requirements for what will be included within the portfolio will be set within the Module Handbook.

Summative assessment will also include undertaking a guided research undertaking, whereby they evidence their learning on defined topics relating to team working and learning in teams based on their own research and sources provided by the Module Leader. Students will also be required to evidence their understanding of the topic in an assessed reflective essay which draws on their practical experience and research.

As reflective practitioners, students receive formative feedback and assessment throughout the module from, for example, the Team Coach, their peers and, where appropriate and available, clients.
