Reading Strategy

The reading strategy on this module is designed to encourage students to read relevant and challenging books and refereed journal articles at a point in time when they can apply ideas and concepts learned on peer coaching and learning projects. Readings are selected from the programme reading handbook, supported by readings identified and retrieved independently. In accessing reading materials in this way, the reading strategy aims to support students in making strong connections between theory and its application in practice and in developing their skills in identifying, sifting and selecting information sources.

Students on this module are, therefore, expected to access readings to support their learning and performance in teambuilding activities and on learning projects, and can expect to apply their learning from these materials in the course of their project and/or their reflections on the project. They will be supported in the selection process by their Team Coach and their peers.

On this module, students will be required to read and review materials that are relevant to the topic of developing ventures through guided research undertakings.

The programme reading handbook provides an extensive book list across the whole programme. Updated annually to ensure currency, the programme reading handbook is available on Blackboard, as well as in hard copy. It is organised by broad topic area to improve ease of access, whilst still permitting students to select the readings of most relevance to them.

<b>Part 3: Assessment</b>	
<b>Assessment Strategy</b>	<p>In keeping with the learning strategy for the module, the assessment strategy has been developed to encourage students to reflect deeply on their experience and their learning and to make strong connections between theory, ideas and concepts and their application in practice. Project reports will include reflections on the implications for ethics and sustainable practice of the project.</p> <p>Summative assessment of practice-led activity will require the student to work in groups to develop and deliver an “Out of the Chrysalis” consultancy report for an external client focusing on the issues of sustaining their venture. It will also require students to individually review and evaluate the issues involved in the the growth of a project that they have participated in. Students will also have to work with their peers within their Team Company to produce a report which assess and evaluates the performance of their Team Company.</p> <p>Summative assessment will also include undertaking a guided research, whereby students evidence their learning on defined topics relating to the growth of ventures based on their own research and sources provided by the Module Leader. Students will also be required to evidence their understanding of the topic of the growth of ventures in an assessed reflective essay on the topic which draws on their practical experience and research.</p> <p>As reflective practitioners, students receive formative feedback and assessment throughout the module from, for example, the Team Coach, their peers and, where appropriate and available, clients.</p>
