

## MODULE SPECIFICATION

Part 1: Information			
Module Title	Secure Computer Networks		
Module Code	UFCFLC-30-2	Level	Level 5
For implementation from	2020-21		
UWE Credit Rating	30	ECTS Credit Rating	15
Faculty	Faculty of Environment & Technology	Field	Computer Science and Creative Technologies
Department	FET Dept of Computer Sci & Creative Tech		
Module type:	Standard		
Pre-requisites	Computer and Network Systems 2020-21		
Excluded Combinations	None		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description
<p><b>Educational Aims:</b> See Learning Outcomes</p> <p><b>Outline Syllabus:</b> Computer network architectures and models Layered models, peer protocols, the ISO OSI model</p> <p>Protocol Specification and Design Specification techniques - FSM, layered protocols, error correction</p> <p>Connection vs connectionless protocols</p> <p>Medium Access Control Protocols MAC techniques</p> <p>Subnetworks and Internetworks network layer design, routing and switching, addressing and naming network topology</p> <p>Transport Services TLIs</p> <p>Network &amp; Distributed Systems Management Security issues, fault, monitoring and accounting issues.</p>

## STUDENT AND ACADEMIC SERVICES

TCP/IP protocols IP layer, ICMP, ARP TCP socket programming Applications IPV4 and IPng  
Administering a TCP IP network

System Administration Specifying and installing an OS and network Initialise the system for user and applications Install devices, software packages and communication links

Making the system secure, investigation of security strategies Instigation of system maintenance - backup, user control Document system and system modifications

Security, trust, policy. Threats and protection mechanisms. Systems trusted to deliver confidentiality and integrity; trust; security as policy; protection as a mechanism against a threat; security life cycle; layering and distribution of security mechanisms.

Threats: Interception; interruption; modification; fabrication; types of attack; eavesdropping; masquerading; message tampering; replaying; denial of service.

Protection Mechanisms: Encryption (key cryptography): public (RSA); secret (DES, 3 DES); cryptographic hash functions (SHA1, MD5); stream/block ciphers.

Authentication Protocols: Challenge response; secret key; key distribution centre (Kerberos); Needham- Schroeder protocol; public key. Public Key Management: Certificates (X509); Certification Authorities and PKI; PKI Issues; .NET Passport.

Digital Signatures (Message Integrity): Authorization and access control; access control lists; capabilities; protection domains; firewalls; auditing.

Secure Internet Protocols: Secure Socket Layer SSL (RFC 2246); GSSAPI; DNSSEC; IPSec.

Security and Mobility: WLAN security; GSM/GPRS/UMTS security

**Teaching and Learning Methods:** See Assessment

### Part 3: Assessment

The module is assessed by 2 1.5-hour exams, which will be taken in January (multiple choice) and at the end of the course – written exam. In addition, students will complete a piece of coursework. The coursework is designed to test the students' capacity to implement the ideas presented in the lectures and to consolidate the practical/tutorial sessions. Students should expect to spend approximately 40 hours completing the coursework.

First Sit Components	Final Assessment	Element weighting	Description
Practical Skills Assessment - Component B		60 %	A practical piece of work, involving programme code
Practical Skills Assessment - Component B		15 %	Set of regular practical lab exercises
Examination (Online) - Component A	✓	15 %	Online Examination 2 (1.5 hour) – June 24 hour window
Examination (Online) - Component A		10 %	Online Examination 1 (1.5 hour) – January 24 hour window
Resit Components	Final Assessment	Element weighting	Description
Practical Skills Assessment - Component B		75 %	A practical piece of work involving programme code

## STUDENT AND ACADEMIC SERVICES

Examination (Online) - Component A	✓	25 %	Online Examination (2 hours) 24 hour window
------------------------------------	---	------	--

<b>Part 4: Teaching and Learning Methods</b>																	
Learning Outcomes	<p>On successful completion of this module students will achieve the following learning outcomes:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Module Learning Outcomes</th> <th style="text-align: left;">Reference</th> </tr> </thead> <tbody> <tr> <td>Demonstrate an understanding of a range of protocols employed at various network layers</td> <td>MO1</td> </tr> <tr> <td>Appreciate the significance of end-to-end security in network communication</td> <td>MO2</td> </tr> <tr> <td>Communicate the nature and potential of threats to the security of computer networks, systems and operating systems</td> <td>MO3</td> </tr> <tr> <td>Discuss the relative merits of different solutions to these threats for a given system, business or application</td> <td>MO4</td> </tr> <tr> <td>Analyse a typical business/application for security threats, using appropriate models and leading to proposed solutions</td> <td>MO5</td> </tr> </tbody> </table>	Module Learning Outcomes	Reference	Demonstrate an understanding of a range of protocols employed at various network layers	MO1	Appreciate the significance of end-to-end security in network communication	MO2	Communicate the nature and potential of threats to the security of computer networks, systems and operating systems	MO3	Discuss the relative merits of different solutions to these threats for a given system, business or application	MO4	Analyse a typical business/application for security threats, using appropriate models and leading to proposed solutions	MO5				
Module Learning Outcomes	Reference																
Demonstrate an understanding of a range of protocols employed at various network layers	MO1																
Appreciate the significance of end-to-end security in network communication	MO2																
Communicate the nature and potential of threats to the security of computer networks, systems and operating systems	MO3																
Discuss the relative merits of different solutions to these threats for a given system, business or application	MO4																
Analyse a typical business/application for security threats, using appropriate models and leading to proposed solutions	MO5																
Contact Hours	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td colspan="2"><b>Independent Study Hours:</b></td> </tr> <tr> <td style="text-align: center;">Independent study/self-guided study</td> <td style="text-align: center;">228</td> </tr> <tr> <td style="text-align: right;"><b>Total Independent Study Hours:</b></td> <td style="text-align: center;">228</td> </tr> <tr> <td colspan="2"><b>Scheduled Learning and Teaching Hours:</b></td> </tr> <tr> <td style="text-align: center;">Face-to-face learning</td> <td style="text-align: center;">72</td> </tr> <tr> <td style="text-align: right;"><b>Total Scheduled Learning and Teaching Hours:</b></td> <td style="text-align: center;">72</td> </tr> <tr> <td><b>Hours to be allocated</b></td> <td style="text-align: center;">300</td> </tr> <tr> <td><b>Allocated Hours</b></td> <td style="text-align: center;">300</td> </tr> </table>	<b>Independent Study Hours:</b>		Independent study/self-guided study	228	<b>Total Independent Study Hours:</b>	228	<b>Scheduled Learning and Teaching Hours:</b>		Face-to-face learning	72	<b>Total Scheduled Learning and Teaching Hours:</b>	72	<b>Hours to be allocated</b>	300	<b>Allocated Hours</b>	300
<b>Independent Study Hours:</b>																	
Independent study/self-guided study	228																
<b>Total Independent Study Hours:</b>	228																
<b>Scheduled Learning and Teaching Hours:</b>																	
Face-to-face learning	72																
<b>Total Scheduled Learning and Teaching Hours:</b>	72																
<b>Hours to be allocated</b>	300																
<b>Allocated Hours</b>	300
