| Part 2: Learning and Teaching |   |  |  |  |
|-------------------------------|---|--|--|--|
| Learning<br>Outcomes          | <ul> <li>On successful completion of this module students will be able to:</li> <li>1. Identify source material for research and use appropriate methods of investigation;</li> <li>2. Recognise the scope and range of roles and opportunities within their subject;</li> <li>3. Begin to develop their knowledge and awareness of the professional context of their subject;</li> <li>4. Begin to develop an independent critical awareness of their own practice and identify and analyse appropriate historical and contemporary practices and debates;</li> <li>5. Explore a range of methods for investigating and recording source material;</li> <li>6. Begin to test and use appropriate methods of documentation and presentation</li> <li>7. Manage their time and use a range of learning resources</li> <li>8. Communicate and document ideas visually, verbally and in writing;</li> <li>9. Recognise the importance of professional attitudes to their progress as students, and in the workplace</li> <li>All assessed through Components A and B.</li> </ul> |  |  |  |
|                               | []  |  |  |  |

Syllabus Outline This module enables students to begin to establish their understanding of their area of

| practice in relation to the professional context and the broad field of creative practice<br>at a local, national and international level. The module explores the importance of<br>research and professional practice for students in support of their area of practice, and<br>ambitions.  |
|--|
| It is designed to enable students to become aware of diverse working practices to be<br>used in their studies and further developed and established at Level 2 and Level 3.  |
| The material and activities introduced in the module will enable students to locate and develop a range of knowledge and skills required to support the development of their practice and expand their contextual understanding of their subject. It will introduce students to issues of professionalism within their subject and develop awareness of key transferable skills and how they might be used in a wider context. |
| Lectures, workshop exercises and seminars will introduce students to a range of research sources (including such things as: library resources / on-line resources and databases / exhibitions / events / study visits / case studies / publications) to demonstrate a diversity of approaches to research and professional practice within their area of creative practice.  |
| Students will be asked to look at different areas of practice and roles in relation to their subject area, and the diverse range of career paths and professional opportunities that their area of study can lead to. These findings will be evidenced in a visual presentation in a summative group tutorial.   |
| Case studies will be presented as starting points for investigation. These will include examples from staff, professional practitioners and recent and past graduates. Some of these may contribute as visiting speakers.  |
| Awareness of professional attitudes and approaches will be introduced throughout the module, and students will be expected to apply these in their work. Topics will include: consideration of health and safety, intellectual property, time management and organisation, preparation, communication and presentation.  |
| Students will begin to identify opportunities for work placements and will produce promotional materials and CVs to enable them to apply for work experience opportunities and / or complete live briefs and apply for relevant professional experience.   |
| Work Experience/Work Based Learning  |
| During the course of the module, students are required to address approximately 36-40 hours of their study to engagement with work experience. This could be made up of a placement or number of shorter placements or working on live briefs in a relevant area as set by the programme.  |
| Students will produce a Work Experience Document that will:  |
| <ul> <li>research and critically analyse chosen aspects of contemporary professional<br/>practice and apply this knowledge to the evaluation of their own strengths and<br/>career aspirations.</li> </ul>   |
| <ul> <li>recognise, explore and articulate the links between their work-based learning<br/>with their academic programme (and vice versa);</li> </ul>  |
| <ul> <li>explore, identify and build on their skills, personal development and interests</li> </ul>  |
| <ul> <li>develop a variety of transferable 'employability' skills and abilities such as</li> </ul>   |

|                                     | time management self presentation and reflection research skills  |  |
|-------------------------------------|---|--|
|                                     | time management, self presentation and reflection, research skills  |  |
|                                     | <ul> <li>The Work Experience Document will include:</li> <li>a reflective report on engagement undertaken (500 words)</li> <li>notes on research undertaken to support the report</li> <li>relevant images</li> </ul>   |  |
| Contact Hours                       | Students can expect a total of <b>36</b> hours scheduled contact time for this module within<br>the context of their other learning and teaching activities. This includes tutorials, group<br>critiques, lectures, seminars, site visits / field trips, studio-based sessions, inductions,<br>workshops, field work, work-based learning or project supervision.<br>Contact time may also take a synchronous virtual form rather than face-to-face,<br>through the use of email discussion groups, virtual learning environments (VLEs) and<br>other technology-aided means. It can also take place in a work-based setting. |  |
| Teaching and<br>Learning<br>Methods | Lectures and seminars introduce factual information and issues to be considered.<br>These offer examples and critiques of existing practice.<br>Visiting speakers are also invited to demonstrate examples of career paths and  |  |
|                                     | professional working practice.<br>Students are supported to develop understanding and methods of effective research.<br>Library exercises and workshops involving the UWE Library introduce students to the<br>use of book-stock, journals, catalogue systems, on-line data-bases and collections.<br>Effective approaches to net searches and verifying information from different sources,<br>collecting material through visits, interviews etc will be discussed and explored through   |  |
|                                     | the practical activities.<br>UWE Careers is introduced at this stage, in relation to recruitment fairs, individual<br>support, etc. These and other initiatives are available within and across subject areas.<br>Students are expected to make full use of these opportunities, and evidence<br>engagement in their assessment submissions.  |  |
|                                     | Group tutorials are used to monitor and support progress. In presenting their research findings students are encouraged to engage in discussion and debate.   |  |
|                                     | A range of activities within and across programmes support discussion and interaction<br>in relation to wider aspects of creative practice, professional attitudes and learning<br>skills. Activities supported by the Careers Development Unit include information about<br>placement and career development opportunities, volunteering etc. that students can<br>participate in during their studies.  |  |
|                                     | The Professional Practice File is introduced in this module. The file will consist of evidence of the assignments, lectures, discussions and activities included in the module which students are required to respond to. It provides a place for students to collate and reflect on the material and ideas they are finding and being introduced to through the module. The Professional Practice File may be submitted as an online presence (i.e. blog or website) and should include a log of all industry engagement, contacts and opportunities.  |  |

| Part 3: Assessment  |  |  |
|---------------------|--|--|
| Assessment Strategy | Assessment strategies within the programme that this module contributes to reflect the Faculty of Art, Creative Industries and Education's philosophy which considers assessment to be part of the learning process.   |  |
|                     | Formative and summative assessments are designed to provide the<br>opportunity for students to understand and reflect upon their achievements<br>and to support the monitoring of progress by tutors and students<br>Assessment methods used are varied, are relevant in demonstrating<br>achievement to both academic and industry stakeholders, and form a<br>coherent programme of assessment which is designed to offer students the<br>maximum opportunity to demonstrate the skills, knowledge and experience<br>that they have gained through the course of study, as well as to suppor<br>ongoing and continuous improvement in their individual creative practice and<br>development as practitioner-researchers. |  |
|                     | The principle of 'learning through making' is core to learning strategies in the Department of Creative Industries – these learning activities are then expanded into and through an exploration of contemporary practice in relevant and related subject areas.   |  |
|                     | At assessment, therefore, students are expected to present evidence of work<br>which demonstrates engagement with the minimum number of learning hours<br>for the module (contact and independent study hours).  |  |
|                     | Forms of assessment used as part of the overall programme include:   |  |
|                     | <ul> <li>Presentation and participation in studio-critique</li> <li>Poster presentation</li> <li>Group and individual visual presentations</li> <li>Group and individual verbal presentations</li> <li>Written Assignments – forms of writing relevant to the creative</li> </ul>  |  |

| <ul> <li>industries, including academic/essay and industry focused/report writing</li> <li>Group critiques</li> <li>Peer and self-assessment</li> <li>Evaluative and reflective outcomes, including visual, verbal and written</li> </ul>  |  |
|--|--|
| Formative and summative assessment activities that involve students participating in the evaluation of presented work (their own and others') take place throughout the programme. Participation in and attendance at these sessions forms part of the assessed content of the module as a result of this. |  |
| Feedback (verbal and/or in writing) at regular points throughout the module provides students with a clear understanding of their progress and advice about how this can be improved.  |  |
