

## ACADEMIC SERVICES

## MODULE SPECIFICATION

		Part 1: Bas	ic Data			
Module Title	Extending Prac	ctice				
Module Code	UZTSRD-30-2		Level	2	Version	1.1
Owning Faculty	Health and App Sciences	olied	Field	Continuing Care Adult Nursing		
Contributes towards	FdSc Health and Social Care Practice					
UWE Credit Rating	30	ECTS Credit Rating	15	Module Type	Profession Practice	onal
Pre-requisites	None		Co- requisites	None		
Excluded Combinations	None		Module Entry requirements	None		
Valid From	September 207	16	Valid to	September 2019		

CAP Approval	19 November
Date	2015 (v1.1)

	Part 2: Learning and Teaching
Learning Outcomes	<ul> <li>On successful completion of this module students will be able to:</li> <li>Be able to deliver safe, effective and quality practice specific to the needs of</li> </ul>
	the service user as defined in the practice portfolio, to support their care, well- being and protection (Component A)
	<ul> <li>Explore and initiate the processes of assessment, planning, implementation and evaluation of care, utilising effective decision making and practice skills appropriate to their scope of practice, clinical setting, and service-user needs (Component A)</li> </ul>
	<ul> <li>Acknowledge the service-user perspective in the practice of health and social care, including acknowledgement of the differences in beliefs and cultural practices of the service-user and their carers by initiating and delivering fair and anti-discriminatory practice (Component A)</li> </ul>
	<ul> <li>Initiate appropriate responses to meet the needs of service-users and their carers, taking into account social, cultural, spiritual, ethical, legal, political and economic influences (Component A)</li> </ul>
	<ul> <li>Demonstrate skills in team-working and leadership, including the areas of personal and/or colleague development, and present and discuss ideas, concepts and views effectively which contribute to service-user care, quality, and service improvement (Component A and Component B)</li> </ul>
	<ul> <li>Apply aspects of health, illness, disease and disability knowledge to inform practice and health promotion (Component A and Component B)</li> </ul>
	<ul> <li>Apply more complex skills to practice, including communication strategies to more complex situations such as those required for informed consent, and</li> </ul>

	(1, 1)
	<ul> <li>effective team-working (Component A)</li> <li>Explore the evidence base for policy and practice, and develop practice skills using evidence based approaches (Component A and Component B)</li> <li>Reflect upon the process of monitoring standards of practice (Component A and Component B)</li> </ul>
Syllabus Outline	Ethical practice
	<ul> <li>Applying legal and ethical principles to practice eg consent/confidentiality</li> <li>Partnership working</li> <li>Team working</li> <li>Personal responsibility</li> <li>Research ethics</li> </ul>
	Practice delivery
	Working with other professional groups
	<ul> <li>Diversity of client group - practice issues</li> <li>Core Competency and Skill areas of Quality, Service improvement, and Personal and People Development, as defined in the practice documentation, and the additional negotiated optional area</li> <li>Communication and interpersonal skills between individuals and in a group setting including communication skills for use in challenging situations</li> <li>Sources of knowledge contributing to evidence based practice</li> <li>Health promotion strategies</li> </ul>
	<ul> <li>Frameworks of care eg care pathways, integrated care planning, case management</li> </ul>
	Practice management
	Partnership within a multi professional environment
	<ul> <li>Care planning in diverse practice settings</li> <li>Risk assessment /risk management as related to health and safety</li> </ul>
	<ul> <li>Numeracy Skills</li> </ul>
	EOC Benchmarks/quality assurance
	<ul> <li>Personal and professional development</li> <li>Strategies for reflection</li> </ul>
	Practice portfolio development
	<ul><li>Decision making skills</li><li>Problem solving strategies</li></ul>
Contact Hours	<ul> <li>This is an eight-month duration practice placement module, which draws on the students' current experiences and skills in their own workplace and serves to develop and establish these at the required foundation level under the supervision, guidance and partnership of a nominated practice mentor. For this reason, the module has a low amount of 'contact time' in terms of direct academic teaching.</li> </ul>
	• The module will use a total of 300 hours of study time of which an average of 6 hours will represent scheduled learning in the academic setting and as formative reviews in the clinical setting with an academic tutor and the agreed practice mentor. 248 hours will represent scheduled placement learning with an agreed practice mentor or practice colleague, with the remaining 46 hours as independent learning in the practice or other setting.
	• The 6 hours scheduled learning/ contact time includes 1 x 3 hour introductory lecture, and 6 x 30 minute formative practice review tutorials in

	Part 3: Assessment
Assessment Strategy	Component A
	Assessment of practice competency will be through the full completion of a practice portfolio of defined and linked practice skills and performance criteria

in 4 key skill/performance areas; each will require full achievement for a pass to be awarded.
In this level 2 practice module, students are required to complete 3 core skill/performance areas (covering Quality, Service Improvement, and Personal and People Development), and 1 optional skill/performance area from a selection. These skill/performance areas are underpinned by the National Occupational Standards and each skill/performance area is captured in one template document. In order to successfully achieve each of the 4 skill/performance areas the student is required to complete and submit the template document for each skill/performance area and be signed off on all criteria. Each document will contain the following:
<ul> <li>The sign off of all defined skill/performance criteria for the skill/performance area by the agreed practice mentor.</li> </ul>
<ul> <li>3 pieces of defined written evidence relevant to the skill/performance criteria area and practice role/setting, in a given template format, for example:         <ol> <li>A witness statement</li> <li>A short guided reflection on application of learning, and</li> <li>A written identification and summary of 3 policies/procedures/guidelines.</li> </ol> </li> </ul>
<ul> <li>Student evaluation of area achievement and competence.</li> </ul>
• Mentor evaluation of area achievement and competence.
<ul> <li>Skill/performance area sign-off sheet.</li> </ul>
This component is to be completed by the end of the module.
Component B
Further assessment will occur through the completion and submission of a 500 word personal/professional development action plan relating to the 4 skill/performance areas, and completion and submission of a 1500 word personal/professional development summary which focuses on one development need from their action plan.
The action plan will prompt students to reflect on their abilities and enable them to draw from this to demonstrate a thorough consideration of their own personal/professional development needs and future planning. The written summary will allow the student to focus on one development need from the action plan, summarise the importance of this need and their plan in relation to their practice and service-user care (using appropriate evidence to support this), and clearly communicate their ideas on how they plan to meet this need. The submission of this component will be approximately 2/3 into the module.
Each student will be required to engage with 6 formative review meetings during the module which will provide the opportunity for practice progression and achievement to be reviewed and discussed with both the agreed practice mentor and academic tutor. Students will receive a group assignment tutorial session where the assessment strategy and requirements will be explained and explored.
All students will engage with personalised tutorials held as part of the academic tutoring process. These can be used to focus on the development of student skills relevant to the assessment method.
