Part 2: Learning and Teaching				
Learning Outcomes	On successful completion of this module students will be able to:			
	Demonstrate the skills to collect appropriate data and/or information and apply appropriate analyses and interpretation techniques (A).			
	Design and conduct experiments or projects appropriate to their area of study (A).			
	Conduct themselves professionally and in adherence to the appropriate legislative and/or regulatory framework (A).			
	4 Manage their own time to complete a set task by a given deadline (A).			

Syllabus Outline	1	Project design and methodology appropriate to the programme of study;
	2	Legislative and regulatory framework appropriate to the programme of study;
	3	Producing research appropriate to the programme of study;
	4	Producing high quality presentations appropriate to the programme of study.

## Reading Strategy

#### **Essential readings**

Any essential reading will be indicated clearly, along with the method for accessing it, e.g. students may be required to purchase a set text, be given a print study pack or be referred to texts that are available electronically or in the Library. Module guides will also reflect the range of reading to be carried out.

#### **Further readings**

Further reading will be required to supplement the set text and other printed readings. Students are expected to identify all other reading relevant to their chosen topic for themselves. They will be required to read widely using the library search, a variety of bibliographic and full text databases, and Internet resources. Many resources can be accessed remotely. The purpose of this further reading is to ensure students are familiar with current research, classic works and material specific to their interests from the academic literature.

#### Access and skills

Formal opportunities for students to develop their library and information skills are provided within the induction period and study skills sessions. Additional support is available through online resources. This includes interactive tutorials on finding books and journals, evaluation information and referencing. Sign up workshops are also offered.

## Indicative Reading List

The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, CURRENT advice on readings will be available via other more frequently updated mechanisms, including the module guide.

Reading will vary depending on the subject of choice. Students may be directed to some specific titles, they will also be encouraged to identify other relevant material.

Websites relevant to the study site and region for the study trip will be provided in the module guide.

# Part 3: Assessment Assessment Assessment will be achieved through an oral presentation. In order to produce valid results, experiments need to be well-designed and executed accurately. Field research Strategy may involve extensive team work, so ensuring all members of the team clearly understand the protocol and collect data to an equal standard, is crucial to its success. In order to meet these requirements, group work will be carried out during the field course, and presented during the assessment period. The oral presentation provides an opportunity for students to develop communication and presentation skills crucial to the graduate. An individual mark will be assigned. Formative assessment will be given throughout the module, with tutorials frequent during the study trip. In line with the College's commitment to facilitating equal opportunities, a student may apply for alternative means of assessment if appropriate. Each application will be considered on an individual basis taking into account learning and assessment needs. For further information regarding this please refer to the VLE. Identify final assessment component and element Oral presentation % weighting between components A and B (Standard modules only) A: B: 100% 0% **First Sit Component A** (controlled conditions) **Element weighting** Description of each element In-class group oral presentation (20 minutes) 100% Resit (further attendance at taught classes is not required) Component A (controlled conditions) Element weighting **Description of each element** 100% Individual oral presentation (10 minutes)

If a student is permitted a retake of the module under the University Regulations and Procedures, the assessment will be that indicated by the Module Description at the time that retake commences.
