

CORPORATE AND ACADEMIC SERVICES

MODULE SPECIFICATION

Part 1: Basic Data						
Module Title	Professional Wo	ork Skills				
Module Code	USSKAC-30-1		Level	1	Version 1	
Owning Faculty	Health & Applied Sciences		Field	Biological, Biomedical and Applied Sciences		
Contributes towards	FdSc. Integrated Wildlife Conservation					
UWE Credit Rating		ECTS Credit		Module		
	30	Rating	15	Туре	Standard	
Pre-requisites	None		Co- requisites	None		
Excluded	None		Module Entry	None		
Combinations			requirements			
Valid From	September 2014		Valid to	September 2020		

CAP Approval Date	28/03/2014		

Part 2: Learning and Teaching						
Learning	On successful completion of this module students will be able to:					
Outcomes	Develop a variety of basic key graduate skills and attributes relevant to gaining and sustaining employment in wildlife conservation post-graduation (Assessed in component A.					
	 Demonstrate engagement with the experience of work in wildlife conservation and reflect on development of professional skills (Assessed in component A). Describe, for the field studies considered, the range of factors which affect the environment (Assessed in component B); Record environmental data, present, analyse and interpret these data using 					

- appropriate mathematical, statistical and communication skills (Assessed in component B).
- Use resources that will support professional development using research, problem solving and study skills throughout their undergraduate course (Assessed in component B).

Syllabus Outline

Skills for study and work

Transition to university, expectations, requirements and support. Introduction to study skills and generic graduate, skills. Proficiency and careers within the environmental sector. The evaluation of skills and planning personal development. Activities may include: academic reading; literature and information searching; scientific writing; referencing & plagiarism; presentation skills; time management; understanding and using feedback; formative assessment and feedback from staff and peers; revision techniques and exam preparation; self evaluation and reflection; planning ahead.

Field skills and Work Experience

Principles of fieldwork, sampling methodologies and monitoring health and safety. Investigation of a range of environmental issues in a local and regional context. Activities may include: generic work skills, field monitoring of air, soil or water quality; investigating the impacts of human activities (e.g. industry, tourism) on urban and rural environments through site visits and surveys; investigations into the factors that affect the distribution of living organisms.

Analytical skills

Introduction to hypothesis testing. Testing of hypotheses and making decisions, for example the use of t-tests and Chi-squared test. Appreciation of variability in scientific data and experimental uncertainty. Examining linear relationships and rates of change. Recording, presenting, analysing and interpreting scientific data using IT packages such as Excel & SPSS.

Contact Hours

Scheduled learning Students can expect to receive a minimum of 104 hours taught material. This will be delivered as Interactive lectures and lectorials (48 hours) Workshops (24 hours) field practicals and visits (32 hours). Field visits will include a four day residential field trip.

Independent learning Students are expected to spend 96 hours on independent learning tasks and preparation of assessments. There is also 100 hours' work experience to be completed in a relevant placement that would support their

	employability.
Teaching and Learning Methods	Students will be expected to complete ~100 hours of relevant work experience (approximately half a day per week or one block of 3 weeks). Learning will be centred in a variety of organisations where wildlife conservation is practised. Individual student support will be provided by work-based supervisors and overseen by an academic placement tutor.
	A variety of teaching and learning approaches will be employed. The module will be delivered using a mixture of whole group and small tutorial group sessions. Students will be allocated to a Study Skills Tutor group where a member of staff will facilitate personal, group and peer assisted learning of key skills. The module includes a residential fieldtrip of 4 days duration where emphasis will be placed on the understanding the theory behind fieldwork and developing practical hands on skills in field techniques. Team-working skills will be promoted through group work. Expert opinion will be accessed via site visits (e.g. to industrial sites, information resources). Support material such as DVDs, relevant texts, internet and electronic resources, will be available for use both in formal and informal sessions.
	Support for student learning in Analytical skills will be given through weekly lectures/tutorials which will be integrated with the self-assessment tests to ensure focussed help can be given to those students who need help in the particular areas. Students will develop IT and data analysis skills through computer-based workshops. Resources for Analytical Skills also include direct tutorial material, and references to published material, software, internet and intranet resources. Where possible, the statistical topics are presented and tested in the context of environmental issues.
	Student learning will be supported through the University's E-Learning Environment, Blackboard. Scheduled learning includes interactive lectures, workshop and supervised fieldwork.
	Independent learning includes hours engaged with essential reading, case study preparation, assignment preparation and completion of work experience placement

hours.

Key Information							
Sets Information	Hours to be allocated	Scheduled learning and teaching study hours	Independent study hours	Placement study hours	Allocated Hours		
	300	104	96	100	300	Ø

Reading							
Strategy	All students will	be encourage	d to make full	use of the pri	nt and electr	onic resources	
Strategy	available to the	m through men	nbership of the	e University. 7	These include	e a range of	
	electronic journa	als and a wide	variety of reso	ources availab	ole through w	veb sites and	
	information gateways. The University Library's web pages provide access to subject						
	relevant resources and services, and to the library catalogue. Many resources can be						
	accessed remotely. Students will be presented with opportunities within the curriculum						
	to develop their information retrieval and evaluation skills in order to identify such						
	resources effectively.						
	Any essential reading will be indicated clearly, along with the method for accessing it, e.g. students may be expected to purchase a set text, be given a print study pack or						
	be referred to texts that are available electronically, etc. This guidance will be available						
	either in the module handbook, via the module information on Blackboard or through any other vehicle deemed appropriate by the module/programme leaders.						
	any other venic	іе цеепіец арр	rophate by the	e module/prog	gramme lead	lers.	
	If further reading	na is expected	this will be in	dicated clearl	v. If specific	texts are listed.	
		•			•		
	a clear indication will be given regarding how to access them and, if appropriate, students will be given guidance on how to identify relevant sources for themselves,						
	e.g. through use of bibliographical databases.						
	o.g. unough uot	o or bibliograph	noar database	.

Part 3: Assessment

Assessment Strategy

The Assessment Strategy has been designed to support and enhance the development of both subject-based and employability skills, whilst ensuring that the modules Learning Outcomes are attained, as described below. Assessments are designed to underpin students' learning and skills acquisition in the module and to provide for learning beyond the material delivered in the classroom. Assessments includes both summative (assessment that contributes to module mark) and formative (assessment that does not contribute to module mark) assessment and feedback opportunities.

The Controlled Conditions component of the assessment (Component A) comprises of a professional skills portfolio which links to the work placement and includes a reflective review.

The Coursework component of the assessment (component B) is made up of two elements. Element one is a Field Report which requires students to assess the different survey methods used during their study tour (1500 words, worth 40% of total module marks). Element two is a data analysis portfolio incorporating different statistical elements (20% of module marks)

Opportunities for formative assessment are embedded in the module teaching and take a variety of forms, including: in class and on-line tests and quizzes, problem-solving workshops, and model answers for past exam questions.

Assessment criteria will be made available to the students in the module guide at the start of the module. All work is marked using the Department's Generic Assessment Criteria, which in turn has been developed with reference to a range of external reference points, including the QAA Quality Code on Assessment of Students and the recognition of prior learning, UWE's Learning, Teaching and Assessment Strategy, and UWE's E-learning policy.

Identify final assessment component and element		
	A:	B:
% weighting between components A and B (Standard modules only)	40%	60%
First Sit		
Component A (controlled conditions)	Element weighting	
Description of each element	(as % of component)	
Professional Skills Portfolio	100%	
Component B	Element weighting	
Description of each element	(as % of component)	
1. Field Report	66%	
2. Data Analysis Portfolio	34	%

Resit (further attendance at taught classes is not required)	
Component A (controlled conditions)	Element weighting
Description of each element	(as % of component)
Professional Skills Portfolio	100%
Component B	Element weighting
Description of each element	(as % of component)
Field and Data Analysis Portfolio	100%

If a student is permitted an **EXCEPTIONAL RETAKE** of the module the assessment will be that indicated by the Module Description at the time that retake commences.
