## MODULE SPECIFICATION

		Part 1: Bas	ic Data		
Module Title	Evidencing Wo	ork Based Lear	ning		
Module Code	UZVRTB-15-3		Level	3	Version 1.1
Owning Faculty	Health and App Sciences	olied	Field	Health C Studies	ommunity & Policy
Contributes towards	Programmes w agreement of t		•	Applied S	ciences with the
UWE Credit Rating	15	ECTS Credit Rating	7.5	Module Type	Project
Pre-requisites	None		Co- requisites	None	
Excluded Combinations	None		Module Entry requirements	None	
Valid From	September 207	14	Valid to	Septemb	er 2020

CAP Approval	29 <sup>th</sup> May 2014
Date	

	Part 2: Learning and Teaching
Learning Outcomes	<ul> <li>On successful completion of this module students will be able to:</li> <li>Appraise relevant knowledge and skills to support the work-based learning</li> <li>Critically analyse situations which informs the development of work-based learning</li> <li>Reflect on own responsibilities and management of learning via a personal development plan and agreed learning contract</li> <li>Critically review the context of change and the outcomes of a range of solutions or actions taken in the workplace</li> </ul>
Syllabus Outline	The syllabus is dictated by the nature of the work based learning. The range of work based learning projects that can be undertaken may be linked to professional competencies articulated in professional practice modules, for example; the Standards for Pre-registration Education (Nursing and Midwifery Council) or the Standards of Proficiency (Health and Care Professions Council). Students will be expected to demonstrate that the scope of their project lies within the identified and relevant standards.

Contact Hours	Self-directed le	earning				
Teaching and Learning Methods	There is little teaching within this module – the emphasis is very much upon student learning undertaken in practice and facilitated by an academic supervisor, and where appropriate, a workplace mentor.					
	Students will ic performance ir individually neg	practice. Th	ne methods o	of learning wi

	Part 3: Assessment
Assessment Strategy	The assessment strategy for individual students depends on the learning contract negotiated with the facilitator. The assessment states that it must be equivalent to a project of 3000 words because some options of assessment will not take the form of written work in the form of an orthodox essay or report. Other options include
	A portfolio of evidence
	<ul> <li>A presentation with associated reflection</li> </ul>
	<ul> <li>Production of a patient/service user information leaflet or video with associated reflection.</li> </ul>
	<ul> <li>A paper or letter prepared for publication with associated reflection.</li> </ul>
	Clearly where there are different options for assessment there will need to be guidelines so that students and academic staff can have confidence that assessments are comparable. Assessment strategies need to meet three criteria.
	1. That the negotiated learning outcomes are met
	2. That the correct academic level is reached
	3. That the learning, including assessment, represents 150 hours of study, nominally.
