## MODULE SPECIFICATION

Part 1: Basic Data					
Module Title	Clinical Midwifer	y Practice 1			
Module Code	UZUSTD-45-1		Level	1	Version 1.1
Owning Faculty	Health and Applied Sciences Field Maternal and Child Health				and Child Health
Contributes towards	BSc (Hons) Midv	wifery	·		
UWE Credit Rating	45	ECTS Credit Rating	22.5	Module Type	Professional Practice
Pre-requisites	None		Co- requisites	None	
Excluded Combinations	None		Module Entry requirements	None	
Valid From	1 <sup>st</sup> September 2014		Valid to	September 2020	

19 November
2015

	Part 2: Learning and Teaching			
Learning Outcomes	On successful completion of this module students will be able to:			
Outcomes	<ol> <li>Demonstrate ability to support women and their families holistically throughout their pregnancy, labour, birth and postnatal period (Component A&amp;B)</li> </ol>			
	<ol> <li>Demonstrate ability to promote and facilitate normal physiological birth (Component A&amp;B)</li> </ol>			
	3. Appreciate the role of the midwife when supporting women and their families experiencing deviations from normality in pregnancy, labour, birth and the postnatal period (Component A&B)			
	<ol> <li>Apply knowledge and understanding, including numeracy knowledge, of pharmacological, non-pharmacological methods of medicines used during pregnancy and childbirth (Component A)</li> </ol>			
	5. Demonstrate ability to apply evidence to midwifery practice (Component A&B)			
	<ol> <li>Achieve competency in Nursing and Midwifery Council (NMC) Standards, Essential Skills Clusters and Professional Values, Attitudes and Behaviours (Component A)</li> </ol>			
	<ol> <li>Demonstrate ability to reflect and learn from practice experiences and feedback from women and their families (Component A&amp;B)</li> </ol>			
	8. Appreciate the importance of inter-professional working including working in			

	partnership with women and their families (Component A&B)
Syllabus Outline	The framework for this module is orientated around the 4 domains of the NMC
	Standards for Pre-registration Midwifery Education (2009)
	Effective Midwifery Practice
	Midwifery care relating to antenatal, labour, postnatal and the neonate     Delivery of midwifery care is midwifery lad and community actings including
	<ul> <li>Delivery of midwifery care in midwifery-led and community settings including assessment of needs of women and their families</li> </ul>
	<ul> <li>Psychological and spiritual aspects of childbearing</li> </ul>
	<ul> <li>Pharmacology relevant to childbearing and the administration of medicines</li> </ul>
	Social and cultural diversity
	Public health in practice, including the Baby Friendly Initiative
	Care planning documentation and record keeping
	Clinical skills for midwifery practice including active birth skills
	Professional and Ethical Practice
	Social, ethical and legal context of childbearing
	<ul> <li>Statutory Supervision of Midwifery</li> </ul>
	<ul> <li>Inter-professional and Multiagency working</li> </ul>
	Developing the Individual Midwife and Others
	<ul> <li>Reflective practice</li> <li>Communication with others in a professional context</li> </ul>
	<ul> <li>Effective communication and interpersonal skills including utilising feedback to</li> </ul>
	inform practice
	Achieving Quality Care through Evaluation and Research
	<ul> <li>Exploring and utilising sources of evidence to inform practice</li> <li>Care planning, including assessment and evaluation</li> </ul>
Contact Hours	Scheduled contact hours will include
	Clinical reflective seminars
	Work based learning sessions
	<ul> <li>Simulation activities at UWE (not counted as practice hours)</li> </ul>
	Medicines Management Assessment
	Safe Moving and Handling and Basic Life Support / Newly Born Life Support
	Tripartite reviews and assessments
	Mid-year tripartite reviews will be undertaken at scheduled points during the academic
	year. Unscheduled contact time can be arranged at any point during clinical practice
	placements, at the request of either the student or the sign-off mentor.
	During practice placements the link between theory and practice will be enhanced
	through the provision of Work-based Learning sessions and clinical reflective seminars
	within each practice site. A Work Based Learning Session is provided for each cohort
	group during each practice placement. Work Based Learning sessions are facilitated
	by members of the midwifery teaching team and are held on scheduled dates during
	the academic year.
	Virtual contact time will also be provided through the use of Virtual Learning
	Environments such as Blackboard and the use of email.
	All students are provided with scheduled 'office hours' contact time through the UWE
	Academic Personal Tutor (APT). APT contact time will take place at a minimum of
	three times throughout the academic year, more frequently if required.
	Practice Associate Lecturers Midwifery (PALM) attendance at scheduled reviews and
	assessments facilitate contact time in practice.
Teaching and	The primary teaching and learning strategy utilised within this practice module is
Learning	experiential learning undertaken during practice placements. In line with NMC
Methods	recommendations students will participate in the care of women, their babies and families under close supervision, with structured mentorship and support
	families under close supervision, with structured mentorship and support.

Key Information Sets Information	Placement learning         Students will gain direct "hands on" care of women and their babies during practice placements under the supervision of a mentor. Practice placements will take place across a variety of hospital and community settings. Students can access self-directed learning opportunities within a variety of other practice placements which are appropriate to the level and module learning outcomes.         Other supported learning activities complement the aforementioned teaching and learning strategy. These include:         Scheduled learning:         Work Based Learning sessions         Academic Personal Tutor sessions         Formative Review and Summative Assessments         Independent learning:         Includes hours engaged with essential reading, preparation and completion of written reflections of practice.         Key Information Sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.

Information and referencing. Sign-up workshops are also offered by the Library.         Blackboard         This module is supported by Blackboard where students will be able to find all necessary module information.         Core Reading         Set text for this module is detailed below. All core texts are available electronically either online or as an e-book via UWE Library pages. Other required reading will be indicated electronically via Blackboard.         Further Reading       Further Reading is advisable for this module examples of which will be detailed in the module plackboard. A current list of textbooks and other publications will be provided in the module plack. All students are also encouraged to explore relevant literature as prompted by practice triggers and it is expected that evidence of further reading will be reflected in discussions with the sign-off meritor and during the assessment of practice. 	Part 3: Assessment			
Assessment Strategy	The assessment strategy for this practice module will be supported by formative and summative review points. All formative reviews and summative assessments will be informed by the Ongoing Record of Achievement.			
	Formative Assessment			
	Formative assessment of practice includes: -			
	An initial, interim and end of placement review			
	A mid-year tripartite review.			
	Formative assessments of Essential Skills Clusters will also take place at initial, mid and final point of each practice placement. These formative assessments will be conducted by the midwifery sign-off mentor.			
	The mid-year review will be undertaken by the sign-off mentor with the student midwife and the PALM present. This review of practice learning provides the opportunity for a formal review of the student's progress and learning goals as the student works towards achievement of required NMC Standards, Essential Skills Clusters and Grading in Practice.			
	Summative Assessment			
	Component A			
	Element 1			
	Students will work towards the achievement of NMC standards and related			
	skills clusters throughout the year. During the final practice placement,			

students will undertake a final summative interview where their sign off mentor will assess whether the student has achieved a sufficient level of competence to achieve the above, utilising a range of evidence to support achievement.

### Element 2

Professional Values, Attitudes and Behaviours assessment is to be selfassessed by the student prior to mid-year review and summative assessments and then completed also by a sign-off mentor. This will provide the student with opportunity to self-evaluate performance and to receive constructive feedback to inform future practice. Service user assessment will also be used to inform this process.

Failure to achieve a pass in either element of Component A will preclude the student from being summatively assessed in Component B; in this circumstance a refer for the module will be recorded. Students may engage in formative assessment of Component B.

### **Component B**

Grading of practice to consist of observation of practice and an evidence based reflective case presentation with critical questioning related to practice. Assessment will involve midwifery sign-off mentors and UWE academics.

The sign off mentor will contribute to the grading of practice by indicating at what level the student is performing in practice. This grade is based on evidence of student performance through; direct observation of the student; discussion/questioning; written evidence; and the On-going Record of Achievement. UWE academics will contribute to the grading of practice by assigning a grade based on the reflective and critical review of the students own practice.

#### Module Attendance

Students must complete all designated clinical hours for each placement in order to meet the NMC requirements for pre-registration midwifery education. Full attendance in practice is therefore mandatory. There is a course requirement that a student cannot undertake assessment unless they attend for 80% of practice. Safe Moving and Handling, Basic Life Support, Newborn Life Support, Safeguarding and medicines assessments are also course requirements and are therefore mandatory.

Identify final assessment component and element	Compone	ent B		
% weighting between components A and B (Star	idard modules only)	A:	B:	
First Sit				
Component A (controlled conditions) Description of each element			weighting pmponent)	
1. Achievement of NMC Standards and Essential Skills Clusters			s/Fail	

2. Achievement of Professional Values, Attitudes and Behaviours	Pass/Fail
Component B Description of each element	Element weighting (as % of component)
1. Grading of Practice	100%

Resit (further attendance at taught classes is not required)			
Component A (controlled conditions) Description of each element	Element weighting (as % of component)		
1. Achievement of NMC Standards and Essential Skills Clusters	Pass/Fail		
2. Achievement of Professional Values, Attitudes and Behaviours	Pass/Fail		
Component B Description of each element	Element weighting (as % of component)		
1. Grading of Practice	100%		

If a student is permitted an **EXCEPTIONAL RETAKE** of the module the assessment will be that indicated by the Module Description at the time that retake commences.
