| Part 2: Learning and Teaching |  |  |  |  |
|-------------------------------|--|--|--|--|
| Learning<br>Outcomes          | On successful completion of this module students will be able to:  |  |  |  |
|                               | <ol> <li>Demonstrate ability to critically evaluate woman-centred care throughout<br/>pregnancy, labour, birth and the postnatal period (Component A&amp;B)</li> </ol>   |  |  |  |
|                               | <ol> <li>Act autonomously as the lead carer for women and their families during normal<br/>childbirth, demonstrating the ability to assess risk and exercise accountability<br/>(Component A&amp;B)</li> </ol>           |  |  |  |
|                               | <ol> <li>Demonstrate knowledge and understanding, including numeracy knowledge, of<br/>pharmacological, non-pharmacological methods of medicines used during<br/>pregnancy and childbirth (Component A&amp;B)</li> </ol> |  |  |  |
|                               | <ol> <li>Achieve competency in Nursing and Midwifery (NMC) Standards, Essential Skills<br/>Clusters and Professional Value, Attitudes and Behaviours (Component B)</li> </ol>  |  |  |  |
|                               | <ol> <li>Demonstrate ability to learn from critical reflection and feedback from women and<br/>their families (Component A&amp;B)</li> </ol>   |  |  |  |
|                               | <ol> <li>Apply skills of leadership through the application of sound, evidence-based<br/>knowledge in managing, co-ordinating and prioritising care (Component A&amp;B)</li> </ol>                                       |  |  |  |
|                               | <ol> <li>Demonstrate ability to devise, communicate and evaluate plans of care with<br/>women and the multidisciplinary team, making referrals where appropriate<br/>(Component A&amp;B)</li> </ol>                      |  |  |  |
| Syllabus Outline              | The framework for this module is orientated around the 4 domains of the NMC Standards for Pre-registration Midwifery Education (2009):   |  |  |  |

|               | Effective Midwifery Practice   |
|---------------|--|
|               | <ul> <li>Health and social care frameworks pertinent to midwifery practice</li> </ul>  |
|               | Medical products management  |
|               | <ul> <li>Management of care related to the continuum of pregnancy and childbirth and</li> </ul>  |
|               | care of the neonate  |
|               | Contemporary social and cultural diversity issues.   |
|               | Public health including the Baby Friendly Initiative   |
|               | Risk Assessment and health and safety policies   |
|               | Management skills in practice     Case leading within midwifery agree provision  |
|               | Case loading within midwifery care provision   |
|               | Professional and Ethical Practice  |
|               | <ul> <li>Social, ethical and legal context in midwifery practice</li> </ul>  |
|               | Inter-professional and Multiagency working   |
|               | Local, national and international policies and NMC standards and guidance  |
|               | Leadership and management  |
|               | Service user involvement   |
|               |  |
|               | Developing the Individual Midwife and Others   |
|               | Reflective and reflexive practice  |
|               | Communication with others in a professional context.   |
|               | <ul> <li>Conflict and challenging behaviour</li> <li>Personal and professional development</li> </ul>  |
|               | <ul> <li>Midwifery supervision</li> </ul>  |
|               |  |
|               | Achieving Quality Care through Evaluation and Research   |
|               | <ul> <li>Exploring and evaluating sources of evidence based practice.</li> </ul>   |
| Contact Hours | Scheduled contact hours will include:  |
|               | Clinical reflective seminars   |
|               | Work based learning sessions   |
|               | <ul> <li>Simulation activities at UWE (not counted as practice hours)</li> </ul>   |
|               | Medicines Management Assessment  |
|               | Safe Moving and Handling and Basic Life Support / Newly Born Life Support  |
|               | Tripartite reviews and assessments   |
|               | Mid-year tripartite reviews will be undertaken at scheduled points during the academic year. Unscheduled contact time can be arranged at any point during clinical practice placements, at the request of either the student or the sign-off mentor. |
|               |  |
|               | During practice placements the link between theory and practice will be enhanced   |
|               | through the provision of Work-based Learning sessions and clinical reflective seminars   |
|               | within each practice site. A Work Based Learning Session is provided for each cohort group during each practice placement. Work Based Learning sessions are facilitated  |
|               | by members of the midwifery teaching team and are held on scheduled dates during   |
|               | the academic year.   |
|               |  |
|               | Virtual contact time will also be provided through the use of Virtual Learning Environments such as Blackboard and the use of email.   |
|               |  |
|               | All students are provided with scheduled 'office hours' contact time through the UWE Academic Personal Tutor (APT). APT contact time will take place at a minimum of   |
|               | three times throughout the academic year, more frequently if required.   |
|               | Practice Associate Lecturers Midwifery (PALM) attendance at scheduled reviews and  |
|               |  |
|               | assessments facilitate contact time in practice.   |
| Teaching and  | The primary teaching and learning strategy utilised within this practice module is   |
| Learning      | experiential learning undertaken during practice placements. In line with NMC  |
| Methods       | recommendations students will participate in the care of women, their babies and   |
|               | families under close supervision, with structured mentorship and support.  |
|               |  |

| Key Information     | Placement learning         Direct "hands on" care of women and their babies during practice placements under the supervision of a mentor. Practice placements across a variety of hospital and community settings. Students can access self-directed learning opportunities within a variety of other practice placements which are appropriate to the level and module learning outcomes.         Other supported learning activities complement the aforementioned teaching and learning strategy. These include:         Scheduled learning:         Work Based Learning Days.         Skills sessions within the university to consolidate clinical skills.         Academic Personal Tutor session         Formative Review and Summative Assessments         Independent learning:         Includes hours engaged with essential reading, preparation and completion of written reflections of practice         Key Information Sets (KIS) are produced at programme level for all programmes that |  |  |   |                                 |                                |                      |     |

|              | support is available through the Library Services web pages, including interactive tutorials on finding books and journals, evaluating information and referencing. Sign-up workshops are also offered by the Library.  |
|--------------|---|
|              | <b>Blackboard</b><br>This module is supported by Blackboard where students will be able to find all necessary module information.   |
|              | <b>Core Reading</b><br>Set text for this module is detailed below. All core texts are available electronically<br>either online or as an e-book via UWE Library pages. Other required reading will be<br>indicated electronically via Blackboard.   |
|              | <b>Further Reading</b><br>Further reading is advisable for this module examples of which will be detailed in the module handbook and electronically via Blackboard. A current list of textbooks and other publications will be provided in the module guide. All students are encouraged to explore at least one of the suggested titles which are held in the library. Students are also encouraged to explore relevant literature as prompted by practice triggers and it is expected that evidence of further reading will be reflected in discussions with the sign-off mentor and during the assessment of practice. |

| Part 3: Assessment  |  |  |  |  |
|---------------------|--|--|--|--|
|                     |  |  |  |  |
| Assessment Strategy | The assessment strategy for this practice module will be supported by formative and summative review points. All formative reviews and summative assessments will be informed by the Ongoing Record of Achievement.<br><b>Formative Assessment</b>   |  |  |  |
|                     | Formative assessment of practice includes: -   |  |  |  |
|                     | An initial, interim and end of placement review  |  |  |  |
|                     | A mid-year tripartite review.  |  |  |  |
|                     | Formative assessments of Essential Skills Clusters will also take place<br>at initial, mid and final point of each practice placement. These<br>formative assessments will be conducted by the midwifery sign-off<br>mentor.   |  |  |  |
|                     | The mid-year review will be undertaken by the sign-off mentor with the student midwife and the PALM present. This review of practice learning provides the opportunity for a formal review of the student's progress and learning goals as the student works towards achievement of required NMC Standards, Essential Skills Clusters and Grading in Practice.   |  |  |  |
|                     | Summative Assessment   |  |  |  |
|                     | <b>Component A</b><br><b>Element 1</b><br>Students will work towards the achievement of NMC standards and<br>related skills clusters throughout the year. During the final practice<br>placement, students will undertake a final summative interview where<br>their sign off mentor will assess whether the student has achieved a<br>sufficient level of competence to achieve the above, utilising a range of<br>evidence to support achievement. |  |  |  |
|                     | <b>Element 2</b><br>Professional Values, Attitudes and Behaviours assessment is to be<br>self-assessed by the student prior to mid-year review and summative<br>assessments and then completed also by a sign-off mentor. This will<br>provide the student with opportunity to self-evaluate performance and<br>to receive constructive feedback to inform future practice. Service user<br>assessment will also be used to inform this process.     |  |  |  |
|                     | Failure to achieve a pass in either element of Component A will<br>preclude the student from being summatively assessed in<br>Component B; in this circumstance a refer for the module will be<br>recorded. Students may engage in formative assessment of<br>Component B.   |  |  |  |
|                     | <b>Component B</b><br>Grading of practice to consist of observation of practice and an<br>evidence based reflective case presentation with critical questioning<br>related to practice. Assessment will involve midwifery sign-off mentors<br>and UWE academics.   |  |  |  |

The sign off mentor will contribute to the grading of practice by indicating at what level the student is performing in practice. This grade is based on evidence of student performance through; direct observation of the student; discussion/questioning; written evidence; and the On-going Record of Achievement. UWE academics will contribute to the grading of practice by assigning a grade based on the reflective and critical review of the students own practice.

## Module Attendance

Students must complete all designated clinical hours for each placement in order to meet the NMC requirements for pre-registration midwifery education. Full attendance in practice is therefore mandatory. There is a course requirement that a student cannot undertake assessment unless they attend for 80% of practice. Safe Moving and Handling, Basic Life Support, Newborn Life Support, Safeguarding and medicines assessments are also course requirements and are therefore mandatory.

| Identify final assessment component and element                    | 3                   |  |            |
|--|---------------------|--|------------|
| % weighting between components A and B (Star                       | ndard modules only) | A:                                       | <b>B</b> : |
| First Sit  |                     |  |            |
| Component A (controlled conditions)<br>Description of each element |                     | Elemer<br>weightin<br>(as % o<br>compone | ng<br>f    |
| 1. Achievement of NMC Standards and Essential                      | Skills Clusters     | Pass/fa                                  | ail        |
| 2. Achievement of Professional Behaviours and At                   | titudes             | Pass/Fa                                  | ail        |
| Component B<br>Description of each element                         |                     | Elemer<br>weightin<br>(as % o<br>compone | ng<br>f    |
| 1. Grading of Practice   |                     | 100%                                     |            |

| Resit (further attendance at taught classes is not required)       |  |  |  |
|--|--|--|--|
