

MODULE SPECIFICATION

Part 1: Basic Data						
Module Title	Recovery and Monitoring for Sport Performance					
Module Code	UISV5G-15-3		Level	3	Version	2.0
UWE Credit Rating	15	ECTS Credit Rating	7.5	WBL module?	No	
Owning Faculty	Hartpury		Field	Sport Science		
Department	Sport		Module Type	Standard		
Contributes towards	BSc (Hons) Sports Conditioning and Injury Management BSc (Hons) Sports Conditioning and Injury Management (SW) BSc (Hons) Strength and Conditioning BSc (Hons) Strength and Conditioning (SW)					
Pre-requisites	None		Co- requisites	None		
Excluded Combinations	None		Module Entry requirements	None		
Valid From	01 September 2016 V2.0- 01 September 2018		Valid to	01 September 2024		
Initial CAP Approval Date	16 February 2015		Revised CVC Approval Date	V2.0- 03 May 2018		

Part 2: Learning and Teaching	
Learning Outcomes	<p>On successful completion of this module students will be able to:</p> <ol style="list-style-type: none"> Demonstrate a comprehensive understanding of techniques to monitor an athlete's or team's recovery responses to a training programme. (A) Critically evaluate the effectiveness of different recovery modalities. (A) Design and justify specific post-competition recovery interventions that reflect the physiological stimulus that has been trained. (A) Critically interpret data in relation to athlete fatigue. (A) Design a research protocol to collect both objective and subjective data to critically interpret player performance. (A)
Syllabus Outline	<ul style="list-style-type: none"> Recovery modalities utilised within an applied sporting setting. Monitoring of athlete's/team's training and competition data. The use of specific testing measurements to assess fatigue. Post competition recovery interventions and there application to specific physiological stimuli.
Contact Hours	<p>Indicative delivery modes:</p> <ul style="list-style-type: none"> Lectures, guided learning, seminars etc. 33 Self-directed learning 11 Independent learning 106 <p>TOTAL 150</p>
Teaching and Learning Methods	<p>Scheduled learning includes lectures, seminars, tutorials, project supervision, demonstration, practical classes and workshops; fieldwork; external visits; work based learning; supervised time in studio/workshop.</p> <p>Independent learning includes hours engaged with essential reading, case study preparation, assignment preparation and completion etc. These sessions constitute an average time per level as indicated in the table below. Scheduled sessions may</p>

vary slightly depending on the module choices you make.

Virtual learning environment (VLE): this specification is supported by a VLE where students will be able to find all necessary module information. Direct links to information sources will also be provided from within the VLE.

Key Information Sets Information

Key Information Sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.

Key Information Set - Module data

Number of credits for this module

15

Hours to be allocated	Scheduled learning and teaching study hours	Independent study hours	Placement study hours	Allocated Hours
150	44	106	0	150

The table below indicates as a percentage the total assessment of the module which constitutes a -

Written Exam: Unseen written exam, open book written exam, In-class test

Coursework: Written assignment or essay, report, dissertation, portfolio, project

Practical Exam: Oral Assessment and/or presentation, practical skills assessment, practical exam

Please note that this is the total of various types of assessment and will not necessarily reflect the component and module weightings in the Assessment section of this module description:

Total assessment of the module:

Written exam assessment percentage

Reading Strategy

Essential readings

Any essential reading will be indicated clearly, along with the method for accessing it, e.g. students may be required to purchase a set text, be given a print study pack or be referred to texts that are available electronically or in the Library. Module guides will also reflect the range of reading to be carried out.

Further readings

Further reading will be required to supplement the set text and other printed readings. Students are expected to identify all other reading relevant to their chosen topic for themselves. They will be required to read widely using the library search, a variety of bibliographic and full text databases, and internet resources. Many resources can be accessed remotely. The purpose of this further reading is to ensure students are familiar with current research, classic works and material specific to their interests from their academic literature.

Access and skills

	<p>Formal opportunities for students to develop their library and information skills are provided within the induction period and student skills sessions. Additional support is available through online resources. This includes interactive tutorials on finding books and journals, evaluation information and referencing. Sign up workshops are also offered.</p>
<p>Indicative Reading List</p>	<p>The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, CURRENT advice on readings will be available via other more frequently updated mechanisms, including the module guide.</p> <p>Books:</p> <p>Beachle, T. R. and Earle, R. W., eds (Current Edition) <i>Essentials of Strength and Conditioning</i>. Leeds: Human Kinetics</p> <p>Bompa, T. O. (Current Edition) <i>Periodisation - Theory and Methodology of Training</i>. Leeds: Human Kinetics</p> <p>Chandler, T. J. and Brown, L. E., eds. (Current Edition) <i>Conditioning For Strength and Human Performance</i>. Part 3: Assessment

Assessment Strategy	<p>Students will compile a portfolio on a specific topic area of both monitoring and recovery modalities that can be used to aid an athlete's fatigue levels that have been covered in the lectures and practicals. Students will be required to include demonstration of practical competence, assessed under controlled conditions of a variety of specific skills. Students will critically discuss the use of these modalities from the perspective of a strength and conditioning coach, and how the modalities can be effectively used to monitor fatigue levels and aid in recovery.</p> <p>In line with the College's commitment to facilitating equal opportunities, a student may apply for alternative means of assessment if appropriate. Each application will be considered on an individual basis taking into account learning and assessment needs. For further information regarding this please refer to the VLE.</p>
---------------------	---

Identify final assessment component and element	Portfolio	
% weighting between components A and B (Standard modules only)	A:	B:
	100%	0%
First Sit		
Component A Description of each element	Element weighting (as % of component)	
1. Portfolio (equivalent to 2500 words)	100%	
Resit (further attendance at taught classes is not required)	100%	
Component A Description of each elements	Element weighting (as % of component)	
1. Portfolio (equivalent to 2500 words)	100%	
<p>If a student is permitted a retake of the module under the University Regulations and Procedures, the assessment will be that indicated by the Module Description at the time that retake commences.</p>
