

CORPORATE AND ACADEMIC SERVICES

MODULE SPECIFICATION

Part 1: Basic Data							
Module Title	Biodiversity and Conservation						
Module Code	UINV39-15-3		Level	3	Ver	sion	1.1
UWE Credit Rating	15 ECTS Credit Rating		7.5	WBL module? No			
Owning Faculty	Hartpury		Field	Animal and Land Science			
Department	Animal and Land Module Type Standard						
Contributes towards	BSc (Hons) Agriculture (Top-up) BSc (Hons) Conservation (Top-up) BSc (Hons) Animal Management (Top up) BSc (Hons) Animal Science BSc (Hons) Animal Science (SW) BSc (Hons) Applied Animal Science BSc (Hons) Applied Animal Science (SW)						
Pre-requisites	None Co- requisites None						
Excluded Combinations	None Module Entry requirements None		None				
Valid From	01 September 2015 Valid to 01 September 2021		2021				

CAP Approval Date	15 December	
	2014	

Part 2: Learning and Teaching				
Learning Outcomes	 On successful completion of this module students will be able to: Demonstrate breadth and depth of awareness and understanding of the factors that determine patterns of biodiversity and environmental change. (A) Evaluate the problems of distinguishing between 'natural' changes and anthropogenic induced change. (B) Critically review national and global policy and legislation with regard to biodiversity conservation. (B) Compare and contrast approaches to the conservation of biodiversity in relation to key ecological theories and environmental policy. (A, B) Critically analyse the barriers to solving environmental problems and propose solutions. (A) 			
Syllabus Outline	 Definition of biodiversity and conservation Global patterns in biodiversity Values of biodiversity to society and approaches to quantifying those values 			

- Past, current and future threats to biodiversity, conservation effort and policy
- Different international approaches to habitat and species conservation, population management and control of invasive species
- International policy, institutional and legislative approach to biodiversity conservation
- Environmental responses to climate change

Contact Hours

Indicative delivery modes:

- Lectures, site visits, guided learning, seminars etc:
 Self directed study:
 33 hours
 hours
- 3. Independent learning: 114 hours

TOTAL 150 hours

Teaching and Learning Methods

This module is delivered using large group learning sessions and opportunities for small group work. Additionally essential and recommended reading and exercises will be introduced to guide the students through the core syllabus.

Scheduled Learning

May include lectures, seminars, tutorials and visits both onsite and offsite

Independent Learning

May include hours engaged with essential reading, assignment preparation and completion etc. These sessions constitute an average time per level as indicated in the table below.

Virtual Learning Environment (VLE)

This module is supported by VLE where students will be able to find all necessary module information. Direct links to information sources will also be provided from within VLE.

Key Information Sets Information

Key Information Sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.

Key Information Set - Module data				
Number of credits for this module				15
Hours to	Scheduled	Independent	Placement	Allocated
be	learning	study hours	study hours	Hours
allocated	and			
	teaching			
	study hours			
150	36	114	0	150

The table below indicates as a percentage the total assessment of the module which constitutes -

Written Exam: Unseen written exam, open book written exam, in-class test **Coursework**: Written assignment or essay, report, dissertation, portfolio, project **Practical Exam**: Oral Assessment and/or presentation, practical skills assessment, practical exam

Please note that this is the total of various types of assessment and will not necessarily reflect the component and module weightings in the Assessment section of this module description:

Total assessment of the module:				
Written exam assessment percentage			0%	
Coursework assessment percentage			70%	
Practical exam assessment percentage		30%		
				100%

Reading Strategy

Essential readings

Any essential reading will be indicated clearly, along with the method for accessing it, e.g. students may be required to purchase a set text, be given a print study pack or be referred to texts that are available electronically or in the Library. Module guides will also reflect the range of reading to be carried out.

Further readings

Further reading will be required to supplement the set text and other printed readings. Students are expected to identify all other reading relevant to their chosen topic for themselves. They will be required to read widely using the library search, a variety of bibliographic and full text databases, and internet resources. Many resources can be accessed remotely. The purpose of this further reading is to ensure students are familiar with current research, classic works and material specific to their interests from their academic literature.

Access and skills

Formal opportunities for students to develop their library and information skills are provided within the induction period and student skills sessions. Additional support is available through online resources. This includes interactive tutorials on finding books and journals, evaluation information and referencing. Sign up workshops are also offered.

Indicative Reading List

The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. CURRENT advice on additional reading will be available via other more frequently updated mechanisms.

Part 3: Assessment

Assessment Strategy

The case study presentation will allow examiners to assess the knowledge and understanding and intellectual skills students have gained throughout the module and under controlled conditions.

The written assignment has been chosen to facilitate an in depth utilisation of the information covered throughout the module, as well as that gained via additional study.

Formative feedback and guidance can be gained in the module delivery, on the VLE, in tutorials and in revisions sessions. Summative feedback can be gained on assignment scripts, at the end of oral presentations and on the VLE.

In line with the College's commitment to facilitating equal opportunities, a student may apply for alternative means of assessment if appropriate. Each application will be considered on an individual basis taking into account learning and assessment needs. For further information regarding this please refer to VLE.

Valid From: 010916

Identify final assessment component and element	Oral presentation of case stud	dy	
% weighting between components A and B (Standard modules only)			B: 70%
First Sit			
Component A (controlled conditions) Description of each element		Element v	weighting
Oral presentation of case study		100%	
Component B Description of each element		Element v	weighting
Written assignment		100%	

Resit (further attendance at taught classes is not required)			
Component A (controlled conditions) Description of each element	Element weighting		
1. Oral presentation of case study	100%		
Component B Description of each element	Element weighting		
1. Written assignment	100%		

If a student is permitted a retake of the module under the University Regulations and Procedures, the assessment will be that indicated by the Module Description at the time that retake commences.
