MODULE SPECIFICATION

Part 1: Basic Data						
Module Title	Intermediate Dia	Intermediate Diagnostic Imaging Theory				
Module Code	UZYS1P-30-2		Level	2	Version 4	
Owning Faculty	Health and Applied Sciences Field			Allied Health Professions		
Contributes towards	BSc (Hons) Diagnostic Radiography					
UWE Credit Rating	30 credits	ECTS Credit Rating	15	Module Type	Standard	
Pre-requisites	None		Co- requisites	None		
Excluded Combinations	UZYS9U-40-2 UZYS9V-20-2		Module Entry requirements	N/A		
Valid From	September 2017 September 2018 (v3) September 2019 (v4)		Valid to	Septembe	er 2021	

	Part 2: Learning and Teaching					
Learning Outcomes	 On successful completion of this module students will be able to: Demonstrate an analytical understanding and application of the theoretical principles underpinning diagnostic imaging of the human body systems. (Component B) Critically evaluate and compare the utilisation of different radiographic techniques (Component B) Critically appraise the relevant pharmacology of contrast agents and drugs commonly used in diagnostic Imaging (Component A) Demonstrate understanding of the health & safety requirements for diagnostic imaging practice. (Component A) Discuss the role of Diagnostic Imaging in the management and delivery of patient care. (Component B) 					
Syllabus Outline	 <u>Anatomy, disease and clinical applications</u> Imaging modalities and equipment used in the demonstration of anatomy, Physiology and common pathologies within the context of patient care pathways. <u>Specialist Imaging areas</u> Emergency department Mammography Interventional procedures Operating theatre and mobile radiography

	bibliographic be accessed through the L	All students are encouraged to read widely using the library search, a variety of bibliographic and full text databases and Internet resources. Many resources can be accessed remotely. Guidance to some key authors and journal titles available through the Library will be given in the module handbook and updated annually. Assignment reference lists are expected to reflect the range of reading carried out.				es can ailable ually.

Part 3: Assessment					
Assessment Strategy	The examination will allow the student to be assessed on and demonstrate a depth and breadth of knowledge and understanding of pharmacology, radiobiology and health and safety procedures associated with diagnostic imaging under controlled conditions.				
	A written case study will enable the demonstration of an awareness of the role of diagnostic Imaging in the management and delivery of patient care together with a critical comparison of the utilisation of different radiographic techniques.				

Identify final assessment component and element	Compone	ent A	
% weighting between components A and B (Star	ndard modules only)	A: 40%	B: 60%
First Sit			
Component A (controlled conditions) Description of each element		Element v	weighting
1. Exam (1 Hour)		100	0%
Component B Description of each element		Element v	weighting
1. Written assignment (2500 words)		100	0%

Resit (further attendance at taught classes is not required)	
Component A (controlled conditions)	Element weighting
Description of each element	
1. Exam (1 Hour)	100%
Component B Description of each element	Element weighting
1. Written assignment (2500 words)	100%
If a student is permitted an EXCEPTIONAL RETAKE of the module the assessme by the Module Description at the time that retake commences.	ent will be that indicated
