Reading Strategy	<p>Essential readings Any essential reading will be indicated clearly, along with the method for accessing it, e.g. students may be required to purchase a set text, be given a print study pack or be referred to texts that are available electronically or in the Library. Module guides will also reflect the range of reading to be carried out.</p> <p>Further readings Further reading will be required to supplement the set text and other printed readings.</p>																														

	<p>Students are expected to identify all other reading relevant to their chosen topic for themselves. They will be required to read widely using the library search, a variety of bibliographic and full text databases, and internet resources. Many resources can be accessed remotely. The purpose of this further reading is to ensure students are familiar with current research, classic works and material specific to their interests from the academic literature.</p> <p>Access and skills Formal opportunities for students to develop their library and information skills are provided within the induction period and study skills sessions. Additional support is available through online resources. This includes interactive tutorials on finding books and journals, evaluation information and referencing. Sign up workshops are also offered.</p>
Indicative Reading List	<p>The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, CURRENT advice on readings will be available via other more frequently updated mechanisms.</p> <p>Books:</p> <p>Chadwick, S. and Beech, J. Part 3: Assessment

Assessment Strategy	<p>The research project will allow students to collect market data in relation to service operations for a sports organisation of their choice. This will focus the student's attention on the relationship between organisational expectations and customer perceptions whilst allowing the development of evidenced based opinions and recommendations that create service improvements.</p> <p>The assessment strategy is designed to engage students with the concept of data collection and act as a developmental opportunity at level 5 for the dissertation at level 6. Formative feedback will be offered throughout the module specifically in the form of assessment based tutorials to support methodology options and data analysis techniques.</p> <p>In line with the College's commitment to facilitating equal opportunities, a student may apply for alternative means of assessment if appropriate. Each application will be considered on an individual basis taking into account learning and assessment needs. For further information reading this please refer to the VLE.</p>
