MODULE SPECIFICATION

Part 1: Basic Data					
Module Title	Principles of Respiratory Care				
Module Code	UZTRU4-15-M	Level	M	Version	1
Owning Faculty	Health and Applied Sciences	Field	Continuing Care Adult Nursing		
Department	Nursing and Midwifery				
Contributes towards	BSc (Hons) Nursing Graduate Diploma Nursing				
UWE Credit Rating	15	ECTS Credit Rating	7.5	Module Type	Project
Pre-requisites	None		Co-requisites	None	
Excluded Combinations	UZTRTY-15-3 Principles of Respiratory Care	Module Entry requirements	None		
Valid From	July 2016		Valid to		

CAP Approval Date	31 May 2016
--------------------------	-------------

Part 2: Learning and Teaching	
Learning Outcomes	<p>On successful completion of this module students will be able to:</p> <ol style="list-style-type: none"> 1. Apply advanced detailed knowledge and understanding of the anatomy and philosophy of the respiratory system and pathophysiology of common respiratory diseases. (Component A). 2. Critically explore and debate ethico-legal issues which impact on respiratory diseases and promote the value of evidence based practice in an acute and/or primary care setting. (Component A) 3. Critically analyse how evidence based practice influences the diagnosis, treatment and impact of respiratory diseases on service users, carers and their families. (Component A) 4. Demonstrate in-depth knowledge and understanding of pharmacological and nutritional needs in the management of respiratory diseases. (Component A) 5. Critically examine the assessment, diagnosis, treatment and short/long

	term management of different respiratory diseases, in both primary and secondary care (Component A).
Syllabus Outline	<p>Introduction to Respiratory Nursing</p> <ul style="list-style-type: none"> • Introduction to the module, anatomy and physiology of the respiratory system • Pathophysiology of common respiratory diseases • Factors that influence respiratory disease progression for example risk factors i.e. Smoking, Chest Infections, pollution etc <p>Assessment; Diagnosis and Monitoring of Respiratory disease</p> <ul style="list-style-type: none"> • Spirometry, peak flow, lung function testing and imagining • Physical examination and history talking • Multi-professional roles in assessment; diagnosis and monitoring • Chest drain nursing care • Suctioning and tracheostomy care <p>Management of Common Respiratory diseases (Part 1)</p> <ul style="list-style-type: none"> • Smoking Cessation • Inhaled therapy • Oral therapy • Oxygen therapy • Antibiotics • Surgery <p>Management of Common Respiratory diseases (part 2)</p> <ul style="list-style-type: none"> • Self-Management; personalised care planning • Integrated care pathways • Analysis and interpretation of arterial blood gases • Non Invasive Ventilation (NIV) & Continuous Positive Airway Pressure (CPAP) nursing care • End of life care
Contact Hours	The actual contact time is 36 hours and this is complemented by self-directive learning and online learning resources.
Teaching and Learning Methods	<p>Scheduled learning includes lectures, seminars, tutorials, reflection on practice, practical classes and workshops.</p> <p>Independent learning includes hours engaged with essential reading especially activities online, case study preparation and presentation, assignment preparation and completion.</p>
Reading Strategy	<p>Core readings</p> <p>It is essential that students read one of the many texts on research methods available through the Library. Module guides will also reflect the range of reading to be carried out.</p>

	<p>Further readings</p> <p>Students are expected to identify all other reading relevant to their chosen topic. They will be encouraged to read widely using the library search, a variety of bibliographic and full text databases, and Internet resources. Many resources can be accessed remotely.</p> <p>Access and skills</p> <p>Additional support is available through the Library Services including interactive tutorials on finding books and journals, evaluating information and referencing. Sign-up workshops are also offered by the Library staff.</p> <p>Journals</p> <p>British Journal of Community Nursing COPD: Journal of Chronic Obstructive Pulmonary Disease International Journal of COPD The Primary Care Respiratory Journal Thorax</p>
Indicative Reading List	<p>Reading List</p> <p>Hogan-Quigley, B, Palm, M & Bickley, L. (2011) <i>Bates' Nursing Guide to Physical Examination and History Taking</i>. London. Wolter Kluwer Health.</p> <p>Lynes, D. (2007) <i>The Management of COPD: In Primary and Secondary Care</i>. Cumbria. M&K publishing.</p> <p>Smith S, Price A & Challiner A. (2009) <i>Ward-Based Critical Care: A Guide for Health Professionals</i>. Cumbria .M & K Publishing.</p> <p>Tortora, G & Derrickson, B. (2015) <i>Principles of Anatomy and Physiology</i>, 14th Edition. Hoboken. Wiley.</p>

Part 3: Assessment	
Assessment Strategy	<p>Formative Assessment</p> <p>Students to register and complete the online training on Assessment of Core Knowledge and Practice Skills. In order to become a stop smoking practitioners in England.</p> <p>Website can be found at http://elearning.ncsct.co.uk/england</p> <p>Summative Assessment</p> <p>Assignment on effectiveness of treatment: Writing an essay demonstrating knowledge and understanding of a specific area of treatment/intervention to a person living with a respiratory disease (2000 words).</p> <p>The essay should include the pathophysiology of a respiratory disease and how effective the treatment/intervention is in order to meet the person's healthcare needs. The essay should clearly demonstrate understanding of the role of the practitioners in enhancing future practice.</p> <p>At level M students are expected to critically evaluate, synthesise and provide independent perspectives regarding the delivery of treatment/intervention and</p>

	management. This should include a critical exploration of literature and debate the wider socio-political implications of respiratory diseases.
