Reading Strategy	All trainees will be encouraged to make full use of the print and electronic resources, available to them through membership of the University. These include a range of electronic journals and a wide variety of resources available through web sites and information gateways. The University Library's web pages provide access to subject relevant resources and services, and to the library catalogue. Many resources can be accessed remotely. Trainees will be presented with opportunities within the module to develop their information retrieval and evaluation skills in order to identify such resources effectively. All essential reading will be indicated clearly, along with the method for accessing it, e.g. trainees may be expected to purchase a set text, and will be referred to other texts held in the library and texts that are available electronically. Further guidance will be available in the module handbook and via the module information on Blackboard. If further reading is expected this will be indicated clearly. If specific texts are listed in subject-specific documentation, a clear indication will be given regarding how to access them and, if appropriate, trainees will be given guidance on how to identify relevant sources for themselves, e.g. through use of bibliographical databases. Formal opportunities for trainees to develop their library and information skills will be provided within the induction period and by academic subject tutors. Additional support is available through the Library Services web pages including interactive tutorials on for example accessing electronic journal articles and referencing.

Part 3: Assessment	
Assessment Strategy	The criteria for assessment of Developing Professional Practice will comply with the current, relevant professional Teachers' Standards. Within this module trainees must demonstrate and evidence the accumulation, assimilation and volume of knowledge, understanding, skills and attitudes acquired and used during training. Trainees must demonstrate the positive values and behaviour that they expect from young people in all aspects of their professional placements. Trainees' practice will be underpinned by values that they can articulate and for which they can provide a rationale. The above will manifest itself in high expectations of all young people, consistent and respectful treatment and concern for their development as learners; sensitive and effective communication with parents and carers and support staff and an understanding of their contribution; the ability to reflect on and improve their own teaching; and motivation to take responsibility for their own professional development. Completion of a total of at least 40 days in school, including periods of sustained teaching experience, is assessed on a Pass/Fail basis and a 4500 word written assignment against the Teachers' Standards through a viva voce and reflective evidence.
