

CORPORATE AND ACADEMIC SERVICES

MODULE SPECIFICATION

Part 1: Basic Data							
Module Title	Leadership for C	Juality Enhancer	ment in Practice				
Module Code	UZTSU6-30-2		Level	2	Version 1		
Owning Faculty	Health and Applied Sciences		Field	Continuing Care Adult Nursing			
Contributes towards	FdSc Health and	Social Care Pr	actice				
UWE Credit Rating	30 ECTS Credit Rating		15	Module Type	Standard		
Pre-requisites	None		Co- requisites	None			
Excluded Combinations	None		Module Entry requirements				
Valid From	January 2017		Valid to	2023			

CAP Approval Date	15 November	
	2016	

Part 2: Learning and Teaching						
Learning Outcomes	On successful completion of this module students will be able to:					
	• Demonstrate an understanding of current quality issues, indicators and processes in health and social care practice, acknowledging the implications for the service user (Component A)					
	 Examine ways in which service users and carers can contribute to service improvement (Component A) 					
	• Apply ethical and legal principles to quality and leadership (Components A and B)					
	 Analyse theories of leadership and change management, in health care policy and practice as it relates to quality improvement (Component B) 					
	• Demonstrate knowledge and understanding of the impact of contrasting leadership styles on health and social care practice (Component B)					
	 Reflect on strategies that promote effective team work across professional boundaries (Components A and B) 					
	 Identify the role of the practitioner in quality evaluation and improvement and reflect on your own practice. (Component A) 					
	 Discuss strategies that support continuing professional development of self and others (Component B) 					
Syllabus Outline	Effective leadership: Theories, practice and role modelling. Understanding peer supervision, support and review.					
	Management of change Measuring change Understanding change management					

 Developing and empowering colleagues, the patient or client, family, parent carer. Creating a positive environment for learning Quality' – what is it and why is it important to health and social care. Identif best practice Understanding the link between quality and safety. Governa Health and Social Care Identifying the national and local context, and drivers for service and quality improvement such as CQUINs, quality metrics, performance measures Exploring user involvement and its role in improving services Ethical issues consider in user involvement Methods of obtaining user feedback/involvemet Accountability and responsibility Contact Hours This module will use a total of 300 hours of study time of which an avera 72 hours will represent scheduled learning, and 228 hours will represent independent learning. The teaching and learning strategies for the module acknowledge the import student centred learning. There is an appreciation that students are responsible own learning. 	1.1100.771	Part 3: Assessment				
Assessment Strate	эду	 There are 2 components to this assessment Component A is a defended poster presentation to two academic assessors . Component B is a 2000 word essay which focuses on the leadership requirements in order to improve or maintain high quality practice. 				
		Component A the poster defence provides an opportunity for students to demonstrate skills of organisation and prioritisation of information. The poster defence also requires students to articulate and justify their learning orally which is complementary to other forms of assessment in this programme.				
		Component B allows students to focus on the theories surrounding and the skills of effective leadership which initiate and maintain high quality practice They may reflect on their own skills or skills observed in others and relate this to theories around leadership				
		Opportunities for formative assessment will exist. Formative feedback might be available from peers and/or tutors in verbal and/or written form depending on the formative methods used,				
		Students will receive a group assignment tutorial session where the assessment strategy and requirements will be explained and explored.				
		All students will engage with personalised and/or group tutorials held as part of the academic tutoring process. These can be used to focus on the development of student skills relevant to the assessment method.				

Identify final assessment component and element	Compone	ent A	
		A:	B :

	50%	50%
First Sit		
Component A (controlled conditions) Description of each element		weighting omponent)
1. Defended poster presentation (maximum 30 minutes)	10	0%
Component B(controlled conditions) Description of each element		weighting omponent)
2. 2000 word Essay	10	0%

Resit (further attendance at taught classes is not required)				
Component A (controlled conditions) Description of each element	Element weighting (as % of component)			
1. Defended poster presentation (maximum 30 minutes)	100%			
Component B(controlled conditions) Description of each element	Element weighting (as % of component)			
2. 2000 word Essay	100%			

If a student is permitted a **RETAKE** of the module the assessment will be that indicated by the Module Description at the time that retake commences.
