Module type:	Standard					
Pre-requisites		None				
Excluded Combinations		None				
Co- requisites		None				
Module Entry requirements		Not Applicable				

## Part 2: Description

The syllabus is split into three distinct sections, which enables the teaching team to embed a variety of distinctive pedagogic techniques in each phase. On successful completion of this module, students will have developed an awareness of enterprise and understanding 'of what enterprise means to me'. They will have begun to develop an entrepreneurial mind-set: through participation in enterprising learning and activities. In addition they will have started to develop entrepreneurial capability and confidence through guided experience and practice.

## Enterprise and Society

This phase will be enhanced by the involvement of our careers team who will draw on their expertise and experience to demonstrate in classroom activities how enterprising mind-sets and behaviours are encouraged and developed

- The Social context of enterprise and innovation
- What an Entrepreneur is
- Who becomes an entrepreneur
- Graduate Careers and Enterprise

## Enterprise in Practice

In the next section, we will introduce the students to a business simulation so that they can begin to apply the skills of enterprise and innovation in a simulated business context. This will enable students to understand the constraints of innovative activity.

- Innovation and Competition
- The role of innovation in organisations
- Managing innovation and enterprise
- Enterprise and new products

# **Delivering Innovation**

In the last section, the students are expected to apply the lessons of the previous two sections and develop a new product or service framed within the business simulation.

- New products and services
- Researching opportunity
- Delivering value and profit
- Teamwork and enterprise

## Part 3: Assessment

Opportunities for formative assessment and interim feedback are built into module delivery on a weekly basis. Assessment is directly driven by the learning outcomes of the module, and involves Technology Enhanced Learning utilising an online business simulation. Students are required to engage in a business development activity demonstrating creativity, vision, responsiveness to opportunity, and ambition for business growth, utilising learning from their experience of running a simulated business to inform their ideas. They will design and develop a new product or service in groups of approximately 5 - 6 students, culminating in a 20 min group presentation supported by a written group business plan, and associated group work evidence in the form of weekly 'board' meeting minutes, signed by all group members as evidence of appropriate participation and contribution to the task.

In addition, component B requires students to engage in a 1500 word maximum academic essay reflecting on their understanding of the role of enterprise in society, and the importance of enterprise and entrepreneurship to their future career aspirations.

The module designs out plagiarism through continuous group work in class and assessment based on learning from these experiences.

There are two components to the summative assessment for this module:

COMPONENT A:

• Group Presentation and supporting Business Plan (approximately 1500 words) (20min) COMPONENT B:

Individual project (1500 words)
