

MODULE SPECIFICATION

Part 1: Information			
Module Title	IoT Systems Security		
Module Code	UFCF8P-15-M	Level	Level 7
For implementation from	2018-19		
UWE Credit Rating	15	ECTS Credit Rating	7.5
Faculty	Faculty of Environment & Technology	Field	Computer Science and Creative Technologies
Department	FET Dept of Computer Sci & Creative Tech		
Contributes towards	Cyber Security [Sep][FT][Frenchay][1yr] MSc 2018-19		
Module type:	Standard		
Pre-requisites	None		
Excluded Combinations	None		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description
<p>Educational Aims: This module will teach students fundamental concepts of security of the Internet of Things (IoT) systems, security paradigms employed in IoT, security and privacy issues, and lightweight security solutions.</p> <p>The students should expect to be able to apply the taught concepts in the development of IoT systems.</p> <p>Outline Syllabus: This module will cover:</p> <ul style="list-style-type: none"> IoT system security architecture Authentications/authorization Relevant secure wireless technologies and networking protocols Security and privacy concepts Security over resource-limited devices in IoT Security challenges

STUDENT AND ACADEMIC SERVICES

Teaching and Learning Methods: The module will consist of a mixture of lectures and labs.

Part 3: Assessment

Summative assessment includes:

Comp A: Exam to assess the systematic understanding of the knowledge and the ability to analyse security solutions.

Comp B: Students will be working in groups. Typical group size is 3 or 4.

Element 1: A group portfolio including a proposal (1000 words), design documents, the source code for the IoT security system.

Element 2: A group presentation to demo the features of the IoT security system.

Normally students from the same group will be awarded the same mark. However individual mark adjustment may be carried out to cater for significant unbalanced contributions.

Formative feedback will be provided to students during the Lab sessions to prepare students for the coursework.

For resit, a scaled down IoT security solution will be used so that it is appropriate for an individual project.

First Sit Components	Final Assessment	Element weighting	Description
Portfolio - Component B		56 %	Group portfolio
Presentation - Component B		19 %	Group presentation (15 minutes)
Examination - Component A	✓	25 %	Written Exam (1 hour)
Resit Components	Final Assessment	Element weighting	Description
Portfolio - Component B		56 %	Individual portfolio
Presentation - Component B		19 %	Individual presentation (5 minutes)
Examination - Component A	✓	25 %	Written Exam (1 hour)

Part 4: Teaching and Learning Methods																			
Learning Outcomes	<p>On successful completion of this module students will be able to:</p> <table border="1"> <thead> <tr> <th colspan="2" style="text-align: center;">Module Learning Outcomes</th> </tr> </thead> <tbody> <tr> <td>MO1</td> <td>Demonstrate systematic understanding of the security and privacy issues in the Internet of Things such as in resource-constrained environments</td> </tr> <tr> <td>MO2</td> <td>Conceptualise existing security technologies and protocols specific to IoT systems</td> </tr> <tr> <td>MO3</td> <td>Analyse and critically evaluate different light-weight security solutions in the IoT systems</td> </tr> <tr> <td>MO4</td> <td>Design, implement and test a simple security solution for an IoT system</td> </tr> <tr> <td>MO5</td> <td>Communicate technical solutions clearly</td> </tr> </tbody> </table>	Module Learning Outcomes		MO1	Demonstrate systematic understanding of the security and privacy issues in the Internet of Things such as in resource-constrained environments	MO2	Conceptualise existing security technologies and protocols specific to IoT systems	MO3	Analyse and critically evaluate different light-weight security solutions in the IoT systems	MO4	Design, implement and test a simple security solution for an IoT system	MO5	Communicate technical solutions clearly						
Module Learning Outcomes																			
MO1	Demonstrate systematic understanding of the security and privacy issues in the Internet of Things such as in resource-constrained environments																		
MO2	Conceptualise existing security technologies and protocols specific to IoT systems																		
MO3	Analyse and critically evaluate different light-weight security solutions in the IoT systems																		
MO4	Design, implement and test a simple security solution for an IoT system																		
MO5	Communicate technical solutions clearly																		
Contact Hours	<table border="1"> <thead> <tr> <th colspan="2" style="text-align: center;">Contact Hours</th> </tr> </thead> <tbody> <tr> <td colspan="2" style="text-align: center;">Independent Study Hours:</td> </tr> <tr> <td style="text-align: center;">Independent study/self-guided study</td> <td style="text-align: center;">114</td> </tr> <tr> <td style="text-align: center;">Total Independent Study Hours:</td> <td style="text-align: center;">114</td> </tr> <tr> <td colspan="2" style="text-align: center;">Scheduled Learning and Teaching Hours:</td> </tr> <tr> <td style="text-align: center;">Face-to-face learning</td> <td style="text-align: center;">36</td> </tr> <tr> <td style="text-align: center;">Total Scheduled Learning and Teaching Hours:</td> <td style="text-align: center;">36</td> </tr> <tr> <td style="text-align: center;">Hours to be allocated</td> <td style="text-align: center;">150</td> </tr> <tr> <td style="text-align: center;">Allocated Hours</td> <td style="text-align: center;">150</td> </tr> </tbody> </table>	Contact Hours		Independent Study Hours:		Independent study/self-guided study	114	Total Independent Study Hours:	114	Scheduled Learning and Teaching Hours:		Face-to-face learning	36	Total Scheduled Learning and Teaching Hours:	36	Hours to be allocated	150	Allocated Hours	150
Contact Hours																			
Independent Study Hours:																			
Independent study/self-guided study	114																		
Total Independent Study Hours:	114																		
Scheduled Learning and Teaching Hours:																			
Face-to-face learning	36																		
Total Scheduled Learning and Teaching Hours:	36																		
Hours to be allocated	150																		
Allocated Hours	150																		
Reading List	<p>The reading list for this module can be accessed via the following link:</p> <p>https://uwe.rl.talis.com/modules/ufcf8p-15-m.html</p>
