Part 2: Description
<p>The purpose of this module is to introduce students to the processes and methods used to produce knowledge and disseminate research in philosophy, in particular to non-academic audiences. As well as being able to engage in academic philosophy, the module also aims to enable students to be able to communicate complex philosophical concepts and their importance to members of the public. Alongside the academic content of the module (which could vary depending on the discretion of the module leader, but is likely to focus on central figures in the history of philosophy for example: Kant, Hegel, Rawls, etc.) students will be encouraged to reflect on the applicability of this content to everyday life, and to consider the ways that this content could be presented to make it accessible to the general public.</p> <p>In addition, the module contains an embedded ILM module in Giving Briefings and Making Presentations. Therefore by completing the course students will also pass the ILM module which will contribute to their ILM level 3 certificate in leadership and management.</p> <p>The course will be taught through 2 hour lectorials, which will focus on academic content, as well as a workshop/seminar series which will focus on using this content to develop a variety of practical and academic skills (such as presentation skills; communicating philosophical concepts to different audiences; etc.)</p>

### Part 3: Assessment

Students will be assessed summatively through an e-portfolio with two elements. The elements of the portfolio have been designed to develop different skills which will support students in the completion of their recorded presentation:

1. Recorded e-presentation for a non-expert audience, completed in presentation workshop (10 minutes)
2. Summaries of 3 topics from the module (500 words each)

Element 1, the narrated e-presentation will demonstrate students' ability to communicate philosophical ideas to a lay audience using a combination of subject specific and transferable skills. The e-presentations will be supported by a presentation workshop, which will allow students to develop their presentation skills. Students will then present to one another in small groups, and presentations will be recorded for marking.

Element 2, the summaries of topics on the module, will ensure that students have a good grasp of the philosophical topics that the module covers. Students will have the option, and will be encouraged, to submit their summaries to the module leader throughout the course of the module to gain feedback so that they can use this element as a chance to check and improve their understanding during the module.

Formative assessment will be undertaken within lectorial and seminar/workshop sessions.
