

MODULE SPECIFICATION

Part 1: Information			
Module Title	International Planning Expedition		
Module Code	UBGLWT-30-3	Level	Level 6
For implementation from	2019-20		
UWE Credit Rating	30	ECTS Credit Rating	15
Faculty	Faculty of Environment & Technology	Field	Geography and Environmental Management
Department	FET Dept of Geography & Environmental Mgmt		
Module type:	Standard		
Pre-requisites	None		
Excluded Combinations	Advanced Geographical Expedition 2019-20		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description
<p>Features: Module Entry requirements: 90 credits at level two</p> <p>Educational Aims: Alongside the directly assessed learning outcomes, students will also be able to reinforce skills and competencies relating to:</p> <p>Interpreting and communicating knowledge, skills and ideas to specialist and nonspecialist audiences in planning and property development.</p> <p>Applying cognitive, technical and creative skills to generate and evaluate complex ideas and concepts at an abstract level in planning and property development.</p> <p>Integrating knowledge on a wide spectrum of planning and property issues to the analysis of practice based scenarios.</p> <p>Outline Syllabus: The changes we are currently witnessing both in the world's economies and industry are unprecedented. Fast paced and relentless, the reorganisation that is taking place because of these changes means that planning and real estate professionals need to be responsive to new ideas, be aware of emerging technologies and knowledge and be able to answer the competition. Markets are moving, values are changing and conventional norms are</p>

STUDENT AND ACADEMIC SERVICES

being challenged. Industry is being besieged by new ideas and is racing to keep up. Planning and real estate industries play key roles in this transformation and have to address the emergence of the new information based economy, financial innovations in challenging economic times, political upheaval and the potential for providing a sustainable built environment for the future. Cities are expected to grow disproportionately as the rural economy continues to decline world-wide.

The International Planning Expedition builds on the knowledge and skills developed during the first two years of the relevant programmes and involves visiting a global region for between 10 and 14 days. Locations will vary each year but expeditions will be characterised by a programme of activity that integrates theory with practice and offers strong on-site orientation and pro-active participation. Site visits and work-shops will enable students to explore, and critically appraise, the context against which planning and development occurs. Each expedition will provide opportunities to explore a range of new and established building and development projects to help identify innovation and best-practice in planning and property development. Most of the module's contact time will take place in the field but sessions in advance of the expedition will provide an opportunity to explore the selected global region, its cities and its supported planning and development activity.

Teaching and Learning Methods: See assessment strategy

Part 3: Assessment

The module is assessed by two components. Component A is weighted at 25% and comprises a presentation. Component B is weighted at 75% and comprises an individual report.

Component A: Individual presentation

Contributing to learning outcomes 1, 2, 4, 5.

This component requires students to reflect upon the cultural, social, political and institutional context through which planning is practised in the visiting area and how these factors can impact on the delivery and implementation of projects. Students will need to reflect on whether lessons or practices observed via the expedition can be translated to the UK to facilitate better planning and delivery.

These reflections will need to be captured via an individual presentation with a narration of no more than 6 minutes. Students will be encouraged to be innovative in their approach, bringing together a range of material gathered before and during the expedition. Each presentation will be expected to include a written summary of no more than 500 words. The presentation will need to be submitted after the expedition but guidance over its design and content can be sought both during and after the expedition.

Component B: Individual report

Contributing to learning outcomes 1 to 3.

Component B requires students to prepare an individual report of 4,000 words. The report will need to present two case studies, with each of these equating to a project visited during the expedition. Each case study will need to introduce the specific project, its historical context, and provide an evaluation of the development process. The report will need to present comparative analysis between the two case studies and be prepared from a certain perspective, such as:

The perspective of an investor evaluating the acquisition of the project;

An historical perspective evaluating how the development process and project financial return could have been improved at the time when the project was developed;

The perspective of a city planner evaluating how the project concept could have been revised to improve its contribution to urban policy goals (e.g. connectivity, sustainability);

The perspective of a project manager evaluating how the management of the project development could have

STUDENT AND ACADEMIC SERVICES

been improved to minimize risk and streamline the process.

Students will be able to seek guidance on their case studies both during and after the expedition. Opportunities to discuss their ideas with peers will also be provided. Although students will be expected to lead on the development of their work in the field, the report will be submitted for assessment after the expedition.

Resit information

Students must have attended the expedition to be eligible for taking the resit components of the module.

First Sit Components	Final Assessment	Element weighting	Description
Report - Component B	✓	75 %	Individual report (4000 words)
Portfolio - Component A		25 %	Individual presentation 6 minutes - plus executive summary of 500 words
Resit Components	Final Assessment	Element weighting	Description
Report - Component B	✓	75 %	Individual report (4000 words)
Portfolio - Component A		25 %	Individual presentation 6 minutes - plus executive summary of 500 words
