

MODULE SPECIFICATION

Part 1: Information			
Module Title	Operations and Supply Management		
Module Code	UMMDNX-15-2	Level	2
For implementation from	September 2018		
UWE Credit Rating	15	ECTS Credit Rating	7.5
Faculty	FBL	Field	Operations and Information Management
Department	BBS: Business and Management		
Contributes towards	BA (Hons) Business and Management, BA (Hons) International Business, BA(Hons) International Business Management , BA (Hons) Business and HRM, BA (Hons) Business Management and Leadership, BSc(Hons) Business Administration; BA (Hons) Business Management with Law, BBA(Hons) Business and Management		
Module type:	Standard		
Pre-requisites	None		
Excluded Combinations	UMMDP3-15-2; UMMDP4-15-2 UMMD7L-15-2; UMMD7K-15-2; UMMDDG-15-2		
Co- requisites	None		
Module Entry requirements	N/A		

Part 2: Description	
<p>This module will provide you with the essential knowledge and practical understanding of the tools and techniques businesses use to source, produce, deliver and support the goods and services they provide. The aims of the module are to:</p> <ul style="list-style-type: none"> • Introduce the key tools and techniques of operations and supply management • Understand the importance of operations and supply management in creating competitive advantage • Consider how contemporary business challenges can be addressed through operations and supply management <p>The indicative syllabus will include the current approaches to operations and supply management and how these help businesses compete in the contemporary business environment:</p> <ul style="list-style-type: none"> • Supply networks, purchasing and negotiation • Ethical and sustainable supply chains • Global supply chains • Process design, management and improvement • Service operations • Capacity and demand, inventory control <p>Module delivery will be based on 3hrs per week contact time. This will include both formal lectures and small group tutorials. Students will be expected to undertake guided tasks each week, which may include case study analysis, relevant readings, media or field research, to maximise the benefits and impact of the in-class sessions.</p>	

Part 3: Assessment

The module assessment comprises two components, which are equally weighted, as follows:

1. Written assignment (50%)
2. Exam (50%)

This mix of assessment offers the students a chance to perform under both controlled and open conditions and therefore appeals to a range of learning styles. The assessment regime has been designed so that it complements the assessment profiles of the relevant programmes in which this module sits.

The written assignment will be focused around applying essential operations and supply concepts in a practical setting (LOs 1-3). Guidance and formative feedback opportunities for the written assignment will be offered in the tutorial sessions. Marking criteria will be specified in the module handbook and will be reviewed annually to ensure they continue to reflect the learning outcomes and overall assessment strategy.

The end of module examination will test essential knowledge and understanding of relevant topics and will also require critical analysis of relevant issues and/or evaluation of real world problems (LOs 1, 4-5).

Identify final timetabled piece of assessment (component and element)	Component A	
% weighting between components A and B (Standard modules only)	A:	B:
	50%	50%
First Sit		
Component A (controlled conditions) Description of each element	Element weighting	
1. Exam (2hrs)	100%	
Component B Description of each element	Element weighting	
1. Written Assignment (1500 words)	100%	
Resit (further attendance at taught classes is not required)		
Component A (controlled conditions) Description of each element	Element weighting	
1. Exam (2hrs)	100%	
Component B Description of each element	Element weighting	
1. Written Assignment (1500 words)	100%	

Part 4: Learning Outcomes & KIS Data

Learning Outcomes	<p>On successful completion of this module students will be able to:</p> <ol style="list-style-type: none"> 1. understand the key concepts and practices of operations and supply management (Components A & B) 2. evaluate current approaches to managing and improving processes within organisations and across supply networks (Component B) 3. present analytical findings clearly (Component B) 4. analyse organisational practices using operations concepts (Component A) 5. apply key operations concepts to solve relevant problems in organisations and supply networks (Component A)
