

MODULE SPECIFICATION

Part 1: Information			
Module Title	Microbiology		
Module Code	USSKNF-15-1	Level	1
For implementation from	September 2020		
UWE Credit Rating	15	ECTS Credit Rating	7.5
Faculty	Health and Applied Sciences	Field	Applied Sciences
Department	Applied Sciences		
Contributes towards	FdSc Biological Laboratory Sciences, compulsory		
Module type:	Standard		
Pre-requisites	None		
Excluded Combinations	None		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description
<p><u>This module will cover the following topics within the area of microbiology:</u></p> <p>Three principal themes will underpin the delivery of this module: medical, industrial and ecological. These themes run throughout the syllabus.</p> <p><u>Growth and identification of microorganisms:</u> students will develop knowledge of the identification, characterisation and identification of microorganisms. Students will also investigate growth characteristics of microorganisms and variety of nutritional requirements.</p> <p><u>Roles of microorganisms in various ecosystems:</u> students will develop an understanding of the role and significance of microorganisms in marine and terrestrial ecosystems and their importance in biogeochemical cycles.</p> <p><u>Microorganisms in health and disease:</u> Students will develop an understanding of the role of the normal flora of the human body in both health and disease. Students will be introduced to a variety of infectious diseases, anti-microbial agents and current issues of antibiotic resistance.</p> <p><u>Microbial biotechnology:</u> students will develop an understanding of the utility of microorganisms within industry and scientific research.</p>

Generic Graduate Skill	<i>Specific strand (eg presentation) - Optional</i>	Introduced	Developed	Evidenced
1. Communication	Written communication and oral presentation [A, B]	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
2. Professionalism	Practical sessions [B]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
3. Critical Thinking	Evaluation of experiments [B]	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
4. Digital Fluency	Digital assignment [A, B]	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
5. Innovative and Enterprising		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
6. Forward Looking	Analysis of research papers [B]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
7. Emotional Intelligence		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
8. Globally Engaged	Current issues in microbiology [B]	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Part 3: Assessment: Strategy and Details

The assessment strategy has been designed to support and enhance the development of subject-based knowledge and practical skills, whilst ensuring that the learning outcomes are achieved.

Component A is a 15 minute oral presentation, followed by a 5 minute Q&A session. This assessment will provide students with an opportunity to demonstrate both their knowledge and science communication skills.

The coursework is comprised of four practical reports based on the selection of nine practical experiments carried out during laboratory sessions. This assessment will provide a valuable practical learning experience during which students will develop laboratory skills and aseptic techniques employed in the field of microbiology. In addition, students will be required to carry out independent research of published literature and development of academic writing style.

Opportunities for formative assessment and feedback are built into teaching and practical sessions, through discussion and evaluation of laboratory experiments.

Identify final timetabled piece of assessment (component and element)	Component B	
% weighting between components A and B (Standard modules only)	A:	B:
		30
First Sit		
Component A (controlled conditions) Description of each element	Element weighting (as % of component)	
1. Oral presentation (15 min)	100	
Component B	Element weighting	

Description of each element	(as % of component)																														
1. Practical Reports (1,200 words per report)	100																														
Resit (further attendance at taught classes is not required)																															
Component A (controlled conditions) Description of each element	Element weighting (as % of component)																														
1. Oral presentation (15 min)	100																														
Component B Description of each element	Element weighting (as % of component)																														
1. Practical Reports based on secondary data (1,200 words per report)	100																														
Part 4: Learning Outcomes & KIS Data																															
Learning Outcomes	<p>On successful completion of this module students will be able to:</p> <p>Investigate the diversity of microorganisms and their roles in human health, industry and the environment and communicate findings in a presentation format (A)</p> <p>Explain the significance of microbiological techniques in identification and classification of microorganisms (B)</p> <p>Evaluate the effectiveness of antimicrobial agents on the growth of microorganisms (B)</p> <p>Understand practical techniques carried out in a microbiology laboratory; analyse and evaluate data derived from laboratory study of microorganisms (B)</p>																														
Key Information Sets Information (KIS)	<table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th colspan="5">Key Information Set - Module data</th> </tr> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> </thead> <tbody> <tr> <td colspan="3"><i>Number of credits for this module</i></td> <td style="border: 2px solid black; color: red;">15</td> <td></td> </tr> <tr> <th>Hours to be allocated</th> <th>Scheduled learning and teaching study hours</th> <th>Independent study hours</th> <th>Placement study hours</th> <th>Allocated Hours</th> </tr> <tr> <td style="color: red;">150</td> <td style="color: red;">45</td> <td style="color: red;">105</td> <td style="color: red;">0</td> <td style="color: red;">150</td> </tr> <tr> <td colspan="4"></td> <td style="text-align: center;"></td> </tr> </tbody> </table>	Key Information Set - Module data										<i>Number of credits for this module</i>			15		Hours to be allocated	Scheduled learning and teaching study hours	Independent study hours	Placement study hours	Allocated Hours	150	45	105	0	150
