

MODULE SPECIFICATION

Part 1: Information			
Module Title	Nursing 3: Complexities of Health in Children's and Young Person's Nursing		
Module Code	UZUK8P-30-2	Level	2 (FHEQ Level 5)
For implementation from	September 2019		
UWE Credit Rating	30	ECTS Credit Rating	15
Faculty	Health and Applied Sciences	Field	Maternal and Child Health
Department	Nursing and Midwifery		
Contributes towards	BSc (Hons) Nursing (Children and Young People)		
Module type	Project		
Pre-requisites	None		
Excluded Combinations	None		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description	
<p>This module explores the changing nature of healthcare needs and the challenges and impact for healthcare delivery for children and young people living with a long term condition. This module will enable nursing students to demonstrate how their current and future roles contribute to making excellence in nursing care an integral part of everyday care practices and services. This reflects the importance of the condition for Children and Young People (CYP), their families, health and social care services and the wider community.</p> <p>An exploration of service availability and how to improve access for children and young people, advocacy, consent and capacity, making adjustments to care delivery or to lifestyle to support inclusion and responding to deterioration in physical and mental wellbeing will help students make links between health status and health outcomes.</p> <p>This module will use a range of learning and teaching strategies to support student learning and will include:</p> <ul style="list-style-type: none"> • Lectures • Scenario based teaching through interaction • Group work • Self-directed learning • Digital learning delivered through Blackboard and other virtual learning platforms <p>The teaching and content will be delivered by academics, Service users and Carers, and external partners from Children and Young Person's field of nursing.</p> <p>The indicative content of the module will focus on the Nursing and Midwifery Council (NMC) Future Nursing Standards (2018). Within each module in the programme, teaching and learning progressively explores the nature of care and practice, focusing on the NMC Standards of proficiency platforms and annexes. Content will include:</p>	

- Being an accountable professional
- Promoting health and preventing ill health
- Assessing needs and planning care
- Providing and evaluating care
- Leading and managing nursing care and working in teams
- Improving safety and quality of care
- Coordinating care

And two annexes.

- Communication and relationship management skills
- Nursing procedures

Part 3: Assessment: Strategy and Details

The use of a case study assignment will allow students to further develop their academic skills, and demonstrate their knowledge in nursing care delivery for children, young people and their families living with a long-term condition informed by national and international evidence.

Formative assessment: Students will have the opportunity to give a 10 minute presentation outlining their choice in topic and a plan for completion of the summative assignment. Immediate feedback will be given and signposting to appropriate resources.

Summative assignment: This assignment consists of 3000 words broken down into two areas

Part 1: Students will write approximately 1750 words detailing the needs of a child or young person experiencing a change in health or social circumstances. Students are expected to analyse the impact in terms of the social, emotional and physiological aspects of delivering care in the short, mid and long-term. This should also include services that are available to children, young people and their families. This should be supported with appropriate references. Examples can include:

- Diagnosis of a long-term condition
- Mental wellbeing breakdown
- Safeguarding interventions
- Change in family circumstances

Students should analyse:

- The change in health or social circumstances and the impact of this on CYP and family
- Address the social, psychological and physiological effects
- The efficacy of available services

Part 2: Students will write approximately 1000 words and identify one nursing intervention from the discussion in part one, which meets the needs of the child and family through the nursing process supported with literature. Additionally, approximately 250 words should be used to grade and provide a rationale for the grade against the assessment criteria. Students are expected to provide a reference list as per university guidelines.

Identify final timetabled piece of assessment (component and element)	Component A
