Part 2: Description

Overview: Not applicable

Features: Not applicable

Educational aims: The confidence and ability to think critically, apply knowledge and skills, and provide expert, evidencebased, nursing care lies at the centre of nursing practice. This module offers final year nursing students to consider long term career pathways prior to registration.

Outline syllabus: Reflecting that enquiry and exploration are at the heart of the Future Nurse curriculum, this module has a particular focus on evidence and principles that underpin children and young people's palliative nursing care delivery and the role of the nurse in influencing and contributing to the processes of organisational change in improving care delivery for individuals through an awareness of national and international policies.

Part 3: Teaching and learning methods

Teaching and learning methods: This module will use a range of learning and teaching strategies to support student learning and will include:

Lectures

Scenario based teaching through interaction

Group work

Self-directed learning

Digital learning delivered through Blackboard and other virtual learning platforms

Module Learning outcomes: On successful completion of this module students will achieve the following learning outcomes.

MO1 Critically appraise key legal, ethical and key policy frameworks in relation to palliative care of children and young people from a national and international perspective

MO2 Critically appraise existing knowledge, new evidence and innovations in practice

MO3 Evidence a detailed understanding and evaluation of current theory and research in Children and Young People's palliative care nursing

MO4 Demonstrate an informed understanding of the importance of leadership and management in exercising and maximising the influence and effects of registered nursing on quality of care, patient safety and care delivery

Hours to be allocated: 150

Contact hours:

Independent study/self-guided study = 114 hours

Face-to-face learning = 36 hours

Part 4: Assessment

Assessment strategy: The assessment strategy for this module is designed to allow a diverse range of students to be able to explore their own current and future practice focusing on an existing and or emerging model of care.

Formative assessment: Students will be given the opportunity to have feedback on an assignment plan to inform the final assessment.

Summative assessment: The assignment is by way of a 2000 word case study of a child or young person diagnosed with a life-limiting condition, who now requires palliative care. This should be a critical analysis including defining palliative care, assessment and care planning for the child, young person and family including the psychological impact indicating deficits and recommendations for future nursing delivery. Appropriate literature should be used to support all areas of discussion.
