

MODULE SPECIFICATION

Part 1: Information			
Module Title	Programming (Course Project) [TSI]		
Module Code	UFCFJW-6-0	Level	Level 3
For implementation from	2020-21		
UWE Credit Rating	6	ECTS Credit Rating	3
Faculty	Faculty of Environment & Technology	Field	
Department	FET Dept of Computer Sci & Creative Tech		
Module Type:	Project		
Pre-requisites	None		
Excluded Combinations	None		
Co-requisites	None		
Module Entry Requirements	None		
PSRB Requirements	None		

Part 2: Description
<p>Educational Aims: The aim of the module to teach students how to program and to let them develop the necessary skills of software development, using imperative approach and high-level programming languages, such as C and C++.</p> <p>Outline Syllabus: Software lifecycle. Software development stages (project assignment, work stages developing the project software, task analysis); User interface design basics (implementing a simple user interface); Program constructs usage in practice. Modular programs (detailed design of software through task decomposition and algorithm development); Good coding style (implementing software using proper coding conventions); Testing and debugging; Documentation for software products (writing a project report paper);</p> <p>Teaching and Learning Methods: 6 hours of lectures are provided to students to explain assign individual assignment, explain requirements and demonstrate past course paper and answer questions about assignment. Rest of time students are completing a course paper. Course paper is delivered as report which has programme code realised by students and description of the developed software.</p>

STUDENT AND ACADEMIC SERVICES

--

Part 3: Assessment

This module assessment consists of one element, which is course paper delivered in form of report. The course paper is delivered in electronic form using TSI LMS and checked by the teacher.

First Sit Components	Final Assessment	Element weighting	Description
Written Assignment - Component A	✓	100 %	Course Paper
Resit Components	Final Assessment	Element weighting	Description
Written Assignment - Component A		100 %	Course Paper

Part 4: Teaching and Learning Methods

Learning Outcomes	<p>On successful completion of this module students will achieve the following learning outcomes:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Module Learning Outcomes</th> <th style="text-align: left;">Reference</th> </tr> </thead> <tbody> <tr><td>Understand program life cycle and program development stages</td><td>MO1</td></tr> <tr><td>Apply user interface development basics</td><td>MO2</td></tr> <tr><td>Apply modular programming</td><td>MO3</td></tr> <tr><td>Apply proper coding style</td><td>MO4</td></tr> <tr><td>Apply basics of documenting software products</td><td>MO5</td></tr> <tr><td>Complete decomposition of programming tasks into smaller logical parts and creation of algorithms that implement said subtasks</td><td>MO6</td></tr> <tr><td>Implement algorithms using high level programming languages</td><td>MO7</td></tr> <tr><td>Use of C++ operators</td><td>MO8</td></tr> <tr><td>Define and use basic data structures</td><td>MO9</td></tr> <tr><td>Implement basic data processing methods</td><td>MO10</td></tr> <tr><td>Use of development environments and debuggers for program creation and testing purposes</td><td>MO11</td></tr> <tr><td>Develop of simple console applications with basic user interfaces</td><td>MO12</td></tr> <tr><td>Choosing and applying existing data processing algorithms</td><td>MO13</td></tr> <tr><td>Usage of development environment (as example Visual Studio)</td><td>MO14</td></tr> </tbody> </table>		Module Learning Outcomes	Reference	Understand program life cycle and program development stages	MO1	Apply user interface development basics	MO2	Apply modular programming	MO3	Apply proper coding style	MO4	Apply basics of documenting software products	MO5	Complete decomposition of programming tasks into smaller logical parts and creation of algorithms that implement said subtasks	MO6	Implement algorithms using high level programming languages	MO7	Use of C++ operators	MO8	Define and use basic data structures	MO9	Implement basic data processing methods	MO10	Use of development environments and debuggers for program creation and testing purposes	MO11	Develop of simple console applications with basic user interfaces	MO12	Choosing and applying existing data processing algorithms	MO13	Usage of development environment (as example Visual Studio)	MO14
Module Learning Outcomes	Reference																															
Understand program life cycle and program development stages	MO1																															
Apply user interface development basics	MO2																															
Apply modular programming	MO3																															
Apply proper coding style	MO4																															
Apply basics of documenting software products	MO5																															
Complete decomposition of programming tasks into smaller logical parts and creation of algorithms that implement said subtasks	MO6																															
Implement algorithms using high level programming languages	MO7																															
Use of C++ operators	MO8																															
Define and use basic data structures	MO9																															
Implement basic data processing methods	MO10																															
Use of development environments and debuggers for program creation and testing purposes	MO11																															
Develop of simple console applications with basic user interfaces	MO12																															
Choosing and applying existing data processing algorithms	MO13																															
Usage of development environment (as example Visual Studio)	MO14																															
Contact Hours	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td colspan="2">Independent Study Hours:</td> </tr> <tr> <td style="text-align: center;">Independent study/self-guided study</td> <td style="text-align: center;">48</td> </tr> <tr> <td style="text-align: center;">Total Independent Study Hours:</td> <td style="text-align: center;">48</td> </tr> <tr> <td colspan="2">Scheduled Learning and Teaching Hours:</td> </tr> </table>		Independent Study Hours:		Independent study/self-guided study	48	Total Independent Study Hours:	48	Scheduled Learning and Teaching Hours:																							
Independent Study Hours:																																
Independent study/self-guided study	48																															
Total Independent Study Hours:	48																															
Scheduled Learning and Teaching Hours:																																

STUDENT AND ACADEMIC SERVICES

	Face-to-face learning	32
	Total Scheduled Learning and Teaching Hours:	32
	Hours to be allocated	60
	Allocated Hours	80

Part 5: Contributes Towards

This module contributes towards the following programmes of study:

Computer Science and Software Development [Oct][FT][TSI][4yrs] BSc (Hons) 2020-21

Computer Science and Software Development [Oct][PT][TSI][5yrs] BSc (Hons) 2020-21 BSc (Hons) 2020-21

Computer Science and Software Development [Feb][FT][TSI][4yrs] BSc (Hons) 2020-21

Computer Science and Software Development [Feb][PT][TSI][5yrs] BSc (Hons) 2020-21 BSc (Hons) 2020-21
