#### Part 3: Assessment

#### Component A: 3000 word project essay

Students are required to write a 3000 word project essay which brings together their learning in the area of Psychosocial Challenges, and demonstrates their ability to critique the evidence and theories around the impact of these on occupation and how occupational therapy can assist.

#### Rationale

A written exploration is considered the most appropriate way to demonstrate the depth and breadth of their

engagement with the literature and ability to write succinctly.

### Formative Assessment

Students will be given formative feedback on their work and skills as they progress through the module, for example there are two cohort assignment briefing sessions where the content and structure of the assessment is discussed as a cohort and feedback given as part of that process.
