Section 2: Programme Overview, Aims and Learning Outcomes

Part A: Programme Overview, Aims and Learning Outcomes

Overview: This programme is designed to enable students to gain maximum benefit from their disciplinary studies in the field of law and to provide students with the knowledge, skills, attributes and confidence to successfully shape their individual futures in the legal sector or other professional settings. Throughout the programme students will engage in practice led learning, which will develop them as ready and able graduates who are ambitious, collaborative, innovative, inclusive, and enterprising.

A thread running through the programme at each level is the concept of the 'Student Lawyer'. From day one students will be asked to consider their development of a professional identity alongside enhancement of their academic learning. Each student will be supported to consider their individual approach to what being a Student Lawyer means during and beyond their study on the programme. At Levels 4 and 5 students will engage in Student Lawyer projects twice in each year. The projects will be connected thematically to their legal studies, further enhancing the practice led, real world focus of the programme. They will involve live briefs or other practice led activities generated in collaboration with external organisations drawn from the legal, commercial and third sectors. Students will reflect on their individual personal and professional development as well as the outcomes of their project work in a portfolio which will contribute to their marks in all modules at Levels 4 and 5. At Level 6 students will undertake a 15 credit module which will focus more closely on their individual development towards a professional pathway through either the Student Lawyer module; Law in Action (a short placement module) or Lawyering in Practice (a law clinic module). The overall aim is to create a holistic programmatic and individualised approach throughout the student developmental journey, establishing space within the programme for each student to build consistently on their academic but also their personal and professional growth.

The programme will offer students more choice as they progress through the levels. At Level 4 they will all begin with a suite of core modules grouped as Private Law (contract and tort) and Public Law (crime and constitutional and administrative law). These modules will also cover key foundational elements of the study of law including legal method and systems. At Level 5 students will continue with two core modules in the area of Property (land law and equity and trusts), and will also take 60 credits of optional modules. At Level 6 all modules choices will be optional. There will be one common award of LLB, but students will be encouraged to align their choices of modules across three suggested pathways; business and commercial; professional legal practice and international and social justice as they being to make decisions about their planned future trajectories following the LLB.

Educational Aims: The aim of the LLB is to provide a practice-led, innovative, collaborative, and inclusive legal education and will:

Facilitate the development of a systematic understanding of the law within an institutional, social, national, and global context.

Support the development of intellectual independence and self-directed research to provide students with skills for employment in the legal services and other sectors.

Equip students with the skills to be enterprise focused, innovative and confident problem solvers.

Enable the growth of a confident and open-minded approach and a willingness to engage in continuous learning and development.

Encourage an awareness and application of appropriate ethical and practice principles.

Programme Learning Outcomes:

On successful completion of this programme graduates will achieve the following learning outcomes.

*This will be complemented on their return by undertaking a 15 credit module.
