## Part 7: Student Learning

### Teaching, learning and assessment strategies to enable learning outcomes to be achieved and demonstrated

Teaching on the MA International Human Resource Management Programme comprises a mix of scheduled classes, skill development activities and independent learning.

**Scheduled learning** includes taught sessions, skills workshops and dissertation supervision. These sessions constitute an average of 36 hours per module. Scheduled sessions may vary slightly depending on the module choices made.

**Independent learning** includes hours engaged with essential reading, case study preparation, assignment preparation and dissertation research. These sessions constitute an average time per level as indicated in the table below.

### Description of Distinctive Features and Support

The programme will continue to develop the Business School's record of excellence in the theory and practice of Human Resource Management teaching and learning. The School of HRM was designated as a 'Centre of Excellence' by the Quality Assurance Panel of the Chartered Institute of Personnel and Development (CIPD) in February 2002, one of only 11 such centres in the UK.

A distinctive strength of the teaching strategy is that most lecturers teaching on the MA IHRM programme are members of the Centre for Employment Studies (CESR) and are able to base their teaching on their own experience or research in the field of HRM/Employment Studies.

The overarching aim of the Faculty's Learning Teaching & Assessment Strategy is '*to maximise student achievement (both in relation to award classification and to employability) and student satisfaction whilst maintaining appropriately rigorous academic standards and supporting the university's vision of becoming an inclusive and welcoming learning community, actively engaged with global society and based on values of mutual respect, critical engagement and self-awareness*'.

The supporting objectives of the strategy are the:

- further development of intellectually vibrant, highly reflective, mutually respectful and diverse student and staff learning communities within the Faculty
- increase in the use of links with the world external to UWE (including professional accreditation where possible) to inform curriculum design and delivery and provide lifelong learning opportunities
- provision of an effective, efficient and supportive infrastructure for learning (organisation and management of programmes, student advice, communication with students etc)
- appropriate design and flexible delivery of curricula which provide an intellectually stimulating learning experience enabling students to develop as highly employable and internationally aware lifelong learners
- provision of effective support for students making the transition to learning at UWE
- provision of effective and ongoing developmental support for all staff
- use of effective strategies for assessment for learning

### CURRICULUM DESIGN, CONTENT AND ORGANISATION

The programme is designed and delivered within a postgraduate modular scheme which allows credit accumulation and flexibility. It is intended that three of the core modules will be delivered first to provide an introduction to the context for international HRM and to the discipline and core functions of HRM and some of the key themes relevant to HRM in an international arena. This will provide a sound foundation for the subsequent study of the more specialist areas of international and comparative HRM. The International Employment Context (UMPD9N-15-M), Managing People in Organisations (UMPCXM-15-M) and International Human Resource Management (UMPCXJ-15-M) modules will be delivered in the first term,

Four specialist modules will be offered in the second term. .

## Part 7: Student Learning

Students will have the opportunity to pursue their interests in a particular area of comparative or international human resource management at the dissertation phase of the programme which follows the specialist modules.

Skill development runs throughout the programme and is delivered mainly through the Applied HRM and Business Skills Module, which will be delivered through a series of workshops throughout the first two terms, but also through other modules. Skills sessions will be delivered in full day workshops to allow for practice and small group work. Postgraduate study skills will be an important component of the programme and will be delivered towards the start of the year with further tailored support provided dependent on individual needs.

Approval by the Chartered Institute of Personnel and Development (CIPD) for the programme will be sought at advanced level. This will mean that on completion of the programme students will have met the knowledge requirements for Chartered Membership of the professional body.

### TEACHING, LEARNING AND ASSESSMENT

The teaching, learning and assessment strategy of the Faculty encourages students to assume responsibility for many aspects of their learning and staff to take responsibility for facilitating that learning. The balance of student and staff responsibility varies according to individual student profiles, academic level and according to the nature of the learning outcomes the students are expected to meet. Ultimately, the aim of this programme is to enable students to progress to a high level of autonomy in their learning and professionalism and to view that learning as a process of continuing professional development.

To achieve this, an appropriate blend of learning approaches and opportunities have been integrated throughout the programme with an overall emphasis on active student participation. This 'blend' consists of face to face learning in groups supported by on-line learning via Blackboard, together with exposure to real life examples through case studies, and guest practitioner speakers. There is a significant requirement for students to work independently throughout the programme – both individually and in groups - with the level of this independence increasing as the student moves into the dissertation phase.

Included within the programme is a clear strand of general management and HRM specific transferable skills which underpin successful management practice and effective leadership, thus enhancing employability.

Assessment is an integral part of the teaching and learning process. The range of assessments indicated have been incorporated to:

- test the students' ability to integrate concepts, theories and practice;
- ascertain student's learning strengths and weaknesses and continuing development needs;
- expose students to a variety of assessment methods in order to promote the growth of their life-long learning skills;
- test students' level of skill development.

The assessment strategy comprises formal tutor assessment, informal tutor assessment and informal peer review and feedback. Formal testing of the knowledge base, intellectual, subject specific and transferable skills is through a combination of open book examinations, supervised mini-projects, written assignments, and presentations. Informal testing of intellectual, subject specific and transferable skills is through class interaction during work on current academic research and understanding, case studies, practical exercises and experiential exercises.

The faculty supports the University Academic Regulations and Procedures, and its requirement for controlled conditions to apply to part of the assessment of every module. Forms of assessment commonly used in controlled and non-controlled conditions assessment are: invigilated timed assignments including examinations, presentations, in-class tests, self and peer assessments, individual and group projects and supervised mini-projects and dissertations.

## Part 7: Student Learning

### LEARNING RESOURCES

All modules make use of Blackboard for web enhanced delivery to at least the recommended minimum standard and for communications with students. All modules have handbooks which include details of teaching/learning resource in accordance with the university's Reading Strategy. Additional support is provided through the library and an extensive student computing network.

Students are directed towards the University Library online MySkills resources for the development of skills appropriate to the level and style of the programme. Students will be directed on how the resources on this site should be used to develop the skills that will underpin their studies in module handbooks and/or via Blackboard.

### STUDENT SUPPORT AND GUIDANCE

Student support for all issues relating to the content, delivery and assessment of modules is provided by Module Leaders and for more general academic and professional concerns, by Programme Managers. In addition, students can seek support from Faculty Learning Support tutor to address specific study skills issues. Specific study support will be provided to meet the needs of international students.

Student Services Student Advisors can also provide timely, accurate and confidential advice where necessary on all aspects of the provision, for example coursework and examination arrangements, extenuating circumstances procedures, progression counselling, as well as personal issues such as problems with studying or meeting deadlines, financial matters, ill health and so on, including when relevant how to access the wider support provided by the University. This service is supported by extensive online resources.

Students and graduates are supported by UWE Careers who help them to access skills, experience and knowledge to improve their employability prospects. The service provides high quality and professional advice and guidance focusing on enabling them to take control of and responsibility for their own career planning and progression/development. They can access support around finding vacancies for work experience, volunteering, part time work and internships, as well as events and workshops. There is specialist support for international students including specific resources and opportunities for work experience through the International Talent scheme. Students are introduced to the service during the induction to the course and can continue to use their services for three years after graduation.

All students take part in an Induction programme at the start of their studies. This includes specific guidance and orientation sessions for international students. The Faculty 'Current Student' web pages provide access to the more detailed and up to date information covering all aspects of academic and administrative procedures and support. These pages link closely to the student portal, MyUWE, and to the Student Services web pages, and act as a comprehensive 'faculty handbook'.

An important part of the programme is the involvement of students. Two or three student representatives are selected from each level of the programme to serve on the Student Representatives & Staff Forum (SRSF). These are held each term to discuss issues raised by students in relation to their experience of studying at UWE and on the programme. Issues raised are discussed in an open and friendly atmosphere so that students feel able to contribute openly and honestly about their experiences. Any issues raised are taken forward for action by programme managers. Where appropriate they may be discussed at Departmental Committees or Faculty Academic Standards and Quality Committee.

Support to students with disability is offered both at the faculty level under the remit of the Leader of WP, Disability & Schools Liaison and centrally through the university's Disability Resource Centre. This acts as a holistic service for disabled students and applicants to the University but also supports the academic and administrative staff who work with disabled students.

In addition to the above The University's Student Services offers a range of services to support

## Part 7: Student Learning

students during their time at university and beyond:

- University Health Centre and general advice on 'Staying Healthy';
- Careers and employability, advice on choosing a career, and finding student and graduate vacancies;
- UWE volunteering, opportunities for students to get involved in the local community through the Community Volunteer Programme;
- Student Advisors & Counselling for anything from exam stress to homesickness and depression;
- The Living Centre, for support with faith and spiritual matters;
- Global student support, to help international students to make the most of living and studying in the UK;
- Managing disability and dyslexia, to get help with all disability related support needs;
- Money and Visas, for financial checkups, or help with UK visas.

## Part 8: Reference Points and Benchmarks

Description of **how** the following reference points and benchmarks have been used in the design of the programme:

QAA subject benchmark statements  
University strategies and policies  
Staff research projects  
Employer interaction and feedback

The learning outcomes of the programme map against the QAA subject benchmark statements for:

- General Business & Management and QAA Benchmarks for Postgraduate management Programmes

The programme also meets the learning outcomes of the CIPD Advanced level Module Descriptors

and the following University and Faculty strategies and policies:

- University's Vision & Mission – I.N.S.P.I.R.E.
- University Strategic Plan
- UWE Charter

Faculty strategies and policies:

- Blended Learning Framework
- Curriculum Principles
- Employability Strategy
- Faculty of Business and Law LTA Strategy

Staff research projects

- Where ever possible staff are encouraged to utilise their research – and that of colleagues – to inform their teaching, both in terms of content and pedagogic approach

Employer interaction and feedback

- Employers and alumni are regularly consulted to ensure the currency and relevance of the programme

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of individual modules can be found in module specifications, available on the University's website.
