Part 1: Information

Module title: Specialist Practice in Health Visiting

Module code: UZVRLH-20-M

Level: Level 7

For implementation from: 2024-25

UWE credit rating: 20

ECTS credit rating: 10

College: College of Health, Science & Society

School: CHSS School of Health and Social Wellbeing

Partner institutions: None

Field: Health, Community and Policy Studies

Module type: Module

Pre-requisites: None

Excluded combinations: None

Co-requisites: None

Continuing professional development: Yes

Professional, statutory or regulatory body requirements: None

Part 2: Description

Overview: The module focuses on health visiting practice and developing learners who are competent and effective public health nurses, able to work in partnership with children, young people, and families to improve health and social outcomes.

This module aims to support health visiting learners to achieve the NMC (Nursing and Midwifery Council) Standards of Proficiency for Specialist Community Public Health Nurses (Health Visiting Field) (2022). The Standards of Proficiency are six

Spheres of Practice - (Sphere A to F outlined in the Programme Specification).
Achievement of the standards enables entry to the third part of the NMC register.

Learners will be expected to take responsibility for their learning, engage positively with all learning opportunities and show evidence of consistent achievement in practice through a Practice Assessment Document (PAD).

Features: Not applicable

Educational aims: To equip learners with the core and field specific SCPHN Health Visitor proficiencies: the essential skills, knowledge and attributes required in health visiting practice, (NMC SCPHN standards, 2022).

To achieve the proficiencies in the SCPHN standards each learner will be based in a practice placement, arranged either by the sponsoring organisation or a privately arranged placement. Each learner will have an Academic Assessor from the university course team with the relevant field experience and a Practice Assessor in the practice placement. The practice assessor will have a key role in assessing the learner's proficiency, providing assurance of achievements and competence to practice safely and effectively.

Outline syllabus: The syllabus focuses on developing learners who are competent and effective health visitors, able to work in partnership with children, families and carers to improve health and social outcomes. The emphasis is on “how” learners undertake health visiting work and build effective relationships to improve health outcomes. Learners will develop and enhance their skills in assessing, planning, implementing and evaluating interventions and services with children and families, using current evidence. Foundational to this is experiential learning in placements with the named practice supervisors and assessors in line with the Standards for Student Supervision and Assessment (NMC, 2018, 2023). Learners will undertake activities and tasks in practice that draw on learning from the classroom and support the achievement of the health visiting proficiencies.

Placement learning will typically be around 850 hours.

Integrated into the practice module is the use of a PAD to monitor development, learning and progression.

Module content will include a focus on the application of core and field specific proficiencies in the practice placement and in the classroom:

For health visitors this will typically include:

Carrying out health assessments drawing on theories of attachment and child development (Sphere D)

Supporting infant and child nutrition (Sphere D)

Working interdisciplinary (Sphere E) and partnership with families and service users (Sphere D)

Applying advanced communication skills and drawing on trauma informed approaches (Sphere D)

Safeguarding children (Sphere E)

Promoting mental health for parents, infants and children (Sphere C)

Integrating Sustainability (Sphere E)

This module underpins the field specific health visiting module: Promoting Health in the Early Years and draws on learning across all the modules undertaken within the SCPHN programme.

Part 3: Teaching and learning methods

Teaching and learning methods: This module includes face to face teaching, self-directed learning and experiential learning in a health visiting practice placement.

A mixed methods learning approach in practice placements and the university offers flexibility and encourages a universal design for learning to accommodate learners' needs and abilities. This includes face to face contact hours, virtual online learning and learning in placement with practice assessors and supervisors.

Further directed and self-directed study will also be set on the university digital platform.

Face-to-face contact days include larger group teaching combined with smaller group (seminar format) teaching. The small group teaching will comprise teacher and student led activities that enable critical discussions and collaborative approaches to

specialist practice health visiting scenarios. This enables individuals to build and develop prior learning and identify new learning and current challenges. The online format will mirror the face-to-face contact in terms of structure and integrate shared learning activities.

As a practice module there will be a focus in the curriculum on interdisciplinary learning and drawing on practice assessors and service users in the university contact days to ensure an integrated collaborative approach. Users of the health visiting service and service user voice and experience will also be integrated into the teaching and where possible service users involved in the design and co-production and delivery of lessons.

Opportunities to develop independent learning will be provided through the module in terms of signposting students to podcasts, vodcasts and alternative learning material deemed valuable to learners' development.

Each learner will have an Academic Assessor from the university course team with the relevant field experience. The academic assessor will understand the student's learning and achievement in practice and be the initial point of contact for the learner or Practice Assessor if an issue arises in practice. The academic assessor will evaluate and recommend the student to the NMC for SCPHN registration at the end of the programme.

Each learner will have a Practice Assessor in the practice placement. The practice assessor will be registered in the same field of practice as the learner. The practice assessor will have a key role in assessing the learner's proficiency, providing assurance of achievements and competence to practice safely and effectively.

Learning in practice placements and the achievement of the core and field specific proficiencies will be recorded in the PAD. This provides an ongoing record of progress and achievement in practice learning across the Specialist Community Public Health Nursing (SCPHN) programme at the University of the West of England (UWE), Bristol.

Partnership working is key between the student, practice assessor and academic assessor.

Module Learning outcomes: On successful completion of this module students will achieve the following learning outcomes.

MO1 Demonstrates in practice achievement of the health visiting field specific proficiencies

MO2 Demonstrates in practice achievement of the core SCPHN proficiencies

Hours to be allocated: 200

Contact hours:

Independent study/self-guided study = 152 hours

Placement = 850 hours

Face-to-face learning = 48 hours

Total = 0

Reading list: The reading list for this module can be accessed at readinglists.uwe.ac.uk via the following link <https://rl.talis.com/3/uwe/lists/46010344-A417-89A3-6D22-010E95C5AE66.html?lang=en>

Part 4: Assessment

Assessment strategy: Portfolio

Learners are required to demonstrate the achievement of core and specific health visiting proficiencies through the completion of the PAD. The PAD is the assessment tool designed to record progress and evidence of the required proficiencies and outcomes for the programme of study, in line with the NMC Standards for Student Supervision and Assessment (NMC, 2018/23).

Building a portfolio of evidence supports the integration of theoretical knowledge with Health Visiting practice as well as critical reflection on knowledge and skills development in line with the NMC Standards of Proficiency for SCPHN (2022).

Learners will undertake activities and tasks in practice that draw on learning from the classroom and support the achievement of the health visiting proficiencies.

Integrated into the PAD are structured formative reviews of progress, and tools for example structured assessments of practice. This will support learners to reflect on their professional behaviours and progress towards achievement of the professional competencies, plus action planning for further development and learning.

The PAD is either a pass or fail.

The academic assessor and practice assessor work in partnership to assess, review and recommend the learner for progression for each part of the programme.

Assessment tasks:

Portfolio (First Sit)

Description: Practice Assessment Document (PAD) - Pass/Fail

Weighting: 0 %

Final assessment: Yes

Group work: No

Learning outcomes tested: MO1, MO2

Portfolio (Resit)

Description: Practice Assessment Document (PAD) - Pass/Fail

Weighting: 0 %

Final assessment: Yes

Group work: No

Learning outcomes tested: MO1, MO2

Part 5: Contributes towards

This module contributes towards the following programmes of study:

Specialist Community Public Health Nursing (Health Visiting) [Glenside] MSc 2024-25

Specialist Community Public Health Nursing (Health Visiting) [Glenside] MSc 2024-25
