

ACADEMIC SERVICES

MODULE SPECIFICATION

Part 1: Basic Data						
Module Title	Principles of Emergency Care					
Module Code	UZWŚW3-20-M		Level	M Version 2		2
UWE Credit Rating	20	ECTS Credit Rating	10	WBL module?	No	
Owning Faculty	Health and Ap Sciences	plied	Field	Acute and Critical Care Adult Nursing		
Department	Nursing and M	lidwifery	Module Type	Project		
Contributes towards	MSc Advanced Practice PG Cert Health and Social Care PG Diploma Advanced Practice					
Pre-requisites			Co- requisites			
Excluded Combinations	UZWSUT-15-3 Emergency Ca UZWSUU-15- of Emergency	are M Principles	Module Entry requirements	Working ir relevant a a registere profession	rea and sl ed health o nal	hould be care
			Valid from	Septembe	er 2017 (v2	2)

	Part 2: Learning and Teaching
Learning Outcomes	 Evidence a comprehensive knowledge of the physiological and pathophysiological processes which patients requiring emergency care may experience(Component A)
	2. Critically evaluate the impact of changes in health care policy in emergency care and utilise the current evidence base in the specialty to enhance and inform innovation in the care of patients within emergency care. (Component A)
	 Recognise the legal, ethical and political issues and drivers underpinning the practice, management and service provision of emergency care. (Component A)
	 Application of an evidenced based approach to the assessment of patients in a variety of emergency care settings(triage, resuscitation room, majors assessment) (Component A)
Syllabus Outline	Assessment and management of patients presenting in emergency care
	The vulnerable adult (includes patients presenting with mental health issues, dementia, learning disabilities, as a result of sexual assault, due to alcohol and drugs, older people, forensic evidence, safeguarding issues, the pregnant

	patient)				
	Children and their families (includes psychological and physiological differences between children and adults, managing trauma in children and assessing the seriously ill child, emergency childbirth in the Emergency Department)				
	Minor trauma (assessment and management, introduction to clinical decision making rules, ophthalmology, Ear, Nose, Throat) Major trauma (trauma centres, centralisation and trauma networks, new techniques and approaches in trauma care, learning from military trauma care)				
	Trauma Intermediate Course (TILS) recognised regional TILS course is taught as part of the module, taught by TILS Instructors in conjunction with the Severn Trauma Network				
	Surgical and medical emergencies Wound management (wound assessment, wound closure techniques, simple and advanced suturing techniques, anaesthetic blocks)				
	Writing for publication, face to face seminar, supported by on line learning.				
	Communication Public and patient involvement and empowerment Communicating effectively in difficult situations, breaking bad news, communicating with a variety of agencies including the police, coroner etc.				
	Political awareness Political and legal drivers in emergency care Policy and initiatives impacting on emergency care				
Contact Hours	Total of 48 hours via face to face and directed learning through the VLE				
Teaching and Learning Methods	 Seminars Lectures Workshops Virtual learning environment 				
Reading Strategy	Core readings It is essential that students read one of the many texts on emergency care available through the Library. Module guides will also reflect the range of reading to be carried out. The core readings for the writing for publication workshop will be provided in the seminar as well as examples of previous students published work from the module.				
	Further readings Students are expected to identify all other reading relevant to their chosen research topic for themselves. They will be encouraged to read widely using the library search, a variety of bibliographic and full text databases, and Internet resources. Many resources can be accessed remotely.				
	Access and skills The development of literature searching skills is supported by a Library seminar provided within the taught session. These level three skills will build upon skills gained by the student whilst studying at levels one and two. Additional support is available through the Library Services web				

	 pages, including interactive tutorials on finding books and journals, evaluating information and referencing. Sign-up workshops are also offered by the Library. Indicative reading list The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, <i>current</i> advice on readings will be available via the module guide.
Indicative Reading List	 Books Advanced Life Support Group (2011) Advanced Paediatric Life Support. London: BMJ Books Cole, E. (2008) Trauma Care: Initial Assessment & Management in the Emergency Department. London: Wiley-Blackwell Crouch, R. Charters, A. Dawood, M. Bennett, P. (2009) Oxford Handbook of Emergency Nursing. Oxford: OUP Dolan, B. & Holt, L. (2013) Accident & Emergency: Theory into Practice (3rd Ed). London: Bailliere Tindall. Edwards, M. (2011) Emergency Nursing Made Incredibly Easy. London: Lippincott Williams & Wilkins Articles Happell, B (2012) Writing and Publishing clinical articles: a practical guide Emergency Nurse 20, 1, pp 33-37 Peternelj-Taylor, C. (2012) Writing for publication: What about case reports? Journal of Forensic Nursing 8 pp 51–52 Journals Emergency Nurse Emergency Nurse Emergency Nurse Resuscitation Trauma

Part 3: Assessment				
Assessment Strategy	Students will complete a critical account of the patient journey through the Emergency Department / Minor Injury Unit. The account must synthesise the patient journey from admission to discharge, identifying relevant issues that impact on the patient's progress at each stage.			
	Students will be expected to explore the evidence base for action, including any relevant policies, and identify a solution to improve practice, as a result of this critical account.			
	This approach gives students an opportunity to explore a situation or incident from each stage of the patient's journey using a fresh eyes perspective.			
	Students are advised to choose a patient that meets the criteria of			

vulnerable adult or a child				
This account will be prepared as an article that is suitable for publication				
At M level the assessment strategy expects the students to critically analyse the appropriate literature in the field and place the subject area in the current national policy context of emergency and urgent care.				

Identify final assessment component and element	А				
		A:	B :		
% weighting between components A and B (Standard modules only)					
First Sit					
Component A (controlled conditions) Description of each element		Element	weighting		
1. 3000 word critical account			0%		

Resit (further attendance at taught classes is not required)			
Component A (controlled conditions) Element weighting Description of each element Element weighting			
1. 3000 word critical account	100%		
If a student is permitted a retake of the module under the University Regulations and Procedures, the assessment will be that indicated by the Module Description at the time that retake commences.			

FOR OFFICE USE ONLY
