

## CORPORATE AND ACADEMIC SERVICES

## MODULE SPECIFICATION

Part 1: Basic Data							
Module Title	Evidencing Work Based Learning						
Module Code	UZWRH4-20-M		Level	М	Version	2.1	
Owning Faculty	Health and Appl	ied Sciences	Field	Acute and Critical Care Adult Nursing			
Contributes towards	Programmes within the Faculty of Health and Applied Sciences with the agreement of the programme manager						
UWE Credit Rating	20	ECTS Credit Rating	10	Module Type	Project		
Pre-requisites			Co- requisites				
Excluded Combinations			Module Entry requirements				
Valid From	September 2013		Valid to	September 2019			

CAP Approval Date 21 November 2013
------------------------------------

Part 2: Learning and Teaching				
Learning Outcomes	On successful completion of this module students will be able to:			
	<ul> <li>Critically appraise existing knowledge, research, new evidence and innovations in practice</li> </ul>			
	<ul> <li>Critically analyse complex situations and address current limits of, or contradictions in the knowledge base and/or skills identified for work-based learning</li> </ul>			
	<ul> <li>Critically reflect on own and/or others responsibilities and management of learning, which contributes to the goals of the organisation</li> </ul>			
	<ul> <li>Independently evaluate chosen methodology/tools and report in findings</li> <li>Formulate ethical solutions, arguments and strategies in dialogue with peers, clients, mentors and others</li> </ul>			
Syllabus Outline	The syllabus is dictated by the nature of the work based learning. The range of work based learning projects that can be undertaken may be linked to professional competencies articulated in professional practice modules, for example; the Standards for Pre-registration Education (Nursing and Midwifery Council) or the Standards of Proficiency (Health and Care Professions Council). Students will be expected to demonstrate that the scope of their project lies within the identified and relevant standards.			
Contact Hours	Self-directed learning			
Teaching and Learning Methods	There is little teaching within this module – the emphasis is very much upon student learning undertaken in practice and facilitated by an academic supervisor, and where appropriate, a workplace mentor.			
	Students will identify an area of learning need or interest based on their performance			

				arning will be i	identified in ar	n individually	negotiated
	learning contract. Student progress towards the learning outcomes will be facilitated and monitored in						
	individual and group tutorials.						
	Scheduled learning will be restricted to introductory explanatory sessions.						
	Independent learning will form the vast majority of the educational activity in the module. This can take as many forms as there are activities at work. Students will be required to demonstrate their learning using academic literature which will also require searching and reading and critical reflection.						
	Professional Practice or Placement learning: Students will identify their learning need or interest during professional practice or practice placements, and most learning will be undertaken in these settings.						
Key Information Sets Information	Key Information Sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.

Part 3: Assessment				
Assessment Strategy	The assessment strategy for individual students depends on the learning contract negotiated with the facilitator. The assessment states that it must be equivalent to a project of 4000 words because some options of assessment will not take the form of written work in the form of an orthodox essay or report. Other options include			
	A portfolio of evidence			
	A presentation with associated reflection			
	<ul> <li>Production of a patient/service user information leaflet or video with associated reflection.</li> </ul>			
	• A paper or letter prepared for publication with associated reflection.			
	Clearly where there are different options for assessment there will need to be guidelines so that students and academic staff can have confidence that assessments are comparable. Assessment strategies need to meet three criteria.			
	1. That the negotiated learning outcomes are met			
	2. That the correct academic level is reached			
	3. That the learning, including assessment, represents 200 hours of study, nominally.			

Identify final assessment component and element				
% weighting between components A and B (Star	<u>A:</u>	B:		
First Sit Component A (controlled conditions)		Element	weighting	
Description of each element			(as % of component)	
1. Work based learning project to the equivalent of	4,000 words			

Resit (further attendance at taught classes is not required)				
Component A (controlled conditions) Description of each element	Element weighting (as % of component)			
1. Work based learning project to the equivalent of 4,000 words				

If a student is permitted an **EXCEPTIONAL RETAKE** of the module the assessment will be that indicated by the Module Description at the time that retake commences.
