Further practical legal research exercises will also be undertaken in the compulsory Subject Study Units

Part 3: Teaching and learning methods

Teaching and learning methods: Self-study preparation and research in order to acquire knowledge and understanding;

Large group sessions in order to consolidate and develop knowledge and understanding;

A mixture of individual and group work centred on problem-based learning, involving

management of information, analysis of complex facts and application of knowledge;

Role play and oral presentations to demonstrate understanding and effective communication of complex areas of law applied to detailed factual scenarios;

Preparation of written communications (primarily in the form of office memoranda and letters of advice to clients) to demonstrate understanding and effective communication of complex areas of law applied to detailed factual scenarios;

Drafting and amending of legal documents, often involving the use of precedents, to demonstrate synthesis and application of knowledge, and the ability to reach autonomous, competent decisions;

Reviews of topics in the form of both large group sessions (where ideas can be pooled and debated) and critical self-evaluation.

The teaching and learning strategy pervading all modules on the Legal Practice Course is a student-centred approach through the provision of a stimulating educational environment.

Face to face teaching and learning in a workshop environment is at the heart of the Teaching & Learning strategy, for students to participate fully in challenging activities, undertaking a wide variety of exercises as individuals and in groups. Full participation is encouraged and expected. Students are encouraged to ask questions during the workshops and to take responsibility for their own learning. Feedback will be given on these exercises both by students and tutors.

Outside of the workshop students are required to take responsibility for their own learning undertaking a variety of preparatory tasks. These may be undertaken by students either as individuals or working in office groups, including include provision of information using recorded lectures, reading from course manuals and from practitioner texts, reading and research from primary source material, completion of electronic tests, preparing documents or presentations and attending large group sessions.

The final component of each Study Unit will be a consolidation task or tasks designed to broaden and deepen students' understanding of an aspect or aspects of work covered in the relevant Study Unit

Module Learning outcomes: On successful completion of this module students will achieve the following learning outcomes.

MO1 Understand the need for thorough investigation of all relevant factual and legal issues involved in a transaction or matter; determining the scope of the research problems and identifying the objectives of the research (including determining whether additional information is required and identifying appropriate sources for factual investigation); identifying and understanding the relevant legal context of the research issue; addressing & analysing all relevant factual & legal issues

Part 4: Assessment

Assessment strategy: The Assessment Strategy pervading all modules on the LPC is rigorous in its approach to ensure the credibility of the course to ensure that

Assessment arrangements will be robust, consistent, fair and secure, to ensure that academic standards will meet the threshold set by the SRA

Assessments will revolve around transactions of the type encountered in practice

Assessments will address depth and realism as well as coverage

Individual assessments cover a representative and robust selection of the relevant outcomes. Where an assessment does not include coverage of all of the outcomes for a particular subject, students will nevertheless be prepared to be assessed on all outcomes and will not be informed of what (or will not) be assessed in any particular assessment.

Student achievement will be measured appropriately in accordance with the LPC outcomes.

All diligent students have an opportunity to achieve and demonstrate the LPC learning outcomes.

The needs of disabled students will be taken into account ensuring equal accessibility of assessments to all students.
