Part 2: Learning and Teaching	
Learning Outcomes	<p>On successful completion of this module students will be able to:</p> <ol style="list-style-type: none"> 1. Integrate learning from a range of different disciplines and approaches (underpinned by prior programme learning) to holistically explore complex organisational situations. (Component A) 2. Effectively engage in practice-based learning through the application of a range of theoretical approaches, analytical techniques and tools, to develop and implement strategic recommendations for achieving project objectives (Component A) 3. Understand and critically evaluate different conceptual frameworks of the management of individual and organisational change. (Component B) 4. Systematically understand the interrelationship of organisation theory and organisational practice. (Components A and B) 5. Reflect critically on the ethical dilemmas and challenges of organisational change. (Components A & B) 6. Explore the concept of personal resilience and develop reflexive self-awareness. (Component B)

	<p>7. Identify the need for personal change to achieve their preferred futures. (Component B)</p>
<p>Syllabus Outline</p>	<p>The module explores the theory and practice of change at the level of the organisation, group and individual and their interdependencies. A personal and professional development strand looks at the notions of organisational citizenship and resilience and the need for personal change to achieve preferred futures. In addition to this the module serves an integrative function in drawing together strands of learning from the module and the programme more widely through an integrative, problem-based project, which could be through an integrative case or simulation. Key aspects of the syllabus are outlined in the schematic below.</p> <div data-bbox="443 609 1401 1653" data-label="Diagram"> <pre> graph TD A["Theory & Practice of Organisational & Individual Change: •Understanding organisations and organising •Approaches to organisational change and working with uncertainty •Approaches to individual change and effective change agency"] --> B["Integrative Project: •Participating as part of a team in a business project that requires the application of learning from across the students' programme of study •This involves implementing and evaluating project decisions and their consequent strategic implementation. •Students are also required to reflect on project and team processes as well as outcomes, and to develop resilience to cope with unexpected challenges in managing within a team context."] B --> C["Personal & Professional Development: •Personal challenges of change and resilience •Self-management and active organisational citizenship • Self-awareness and learning •Personal change and preferred futures"] D["Prior Learning on the Programme"] --> B </pre> </div>
<p>Contact Hours/Scheduled Hours</p>	<p>Module delivery will be based on 3 hours of scheduled learning and teaching activities per teaching week over two 12 week teaching blocks, or equivalent. This will consist of a mix of lectures for the delivery of core syllabus concepts, seminars and project workshops.</p>
<p>Teaching and Learning Methods</p>	<p>The module adopts experiential and enquiry-based approaches to learning and includes a combination of class-based activity, group-based activity and independent study. The taught sessions are designed to actively support the development of independent learning strategies by the students and will place an emphasis on learning as a 'life-long' journey.</p>

The sessions combine formal tutor input such as lectures and seminar/workshops with a wide range of participative activities including case studies, individual and group-problem solving activities, simulation, student-led discussions of existing research and article reviews. There is a strong emphasis on linking learning from directed readings to their application in the workplace, including implications for organisational and individual change.

The project-based learning experience is based on group work and provides an opportunity for students to apply their learning from core modules across their programme of study to a business project and to develop resilient and sustainable approaches to dealing with uncertainty and complex organisational environments. It encourages students to confront the challenges of group work and to engage actively with notions of organisational citizenship.

The project culminates in a presentation that requires students to present project performance outcomes. In addition, students' reflections on both project outcomes and process promote wider learning from the project experience.

Students will be directed towards the University Library online resources for the development of skills appropriate to the level and style of the module. Students will be directed on how the resources on this site should be used to develop the skills that will underpin their studies in the module handbook and/or via Blackboard.

Extensive use will be made of Blackboard to support students' learning, to facilitate interactions between students and as a repository for students' own work thereby promoting a sense of learning community.

Key Information Sets Information

Key Information Sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.

Reading Strategy

All students will be encouraged to make full use of the print and electronic resources available to them through membership of the University. These include a range of electronic journals and a wide variety of resources available through web sites and information gateways. The University Library's web pages provide access to subject relevant resources and services, and to the library catalogue. Students will be presented with opportunities within the curriculum to develop their information retrieval and evaluation skills in order to identify such resources effectively.

Essential Reading:

Given the integrative and innovative content of this module, the essential reading is a customised text, available electronically, including chapters and papers from a range of relevant and contemporary sources. The essential reading will be specified in the module handbook and on Blackboard at the start of the module.
