|-------------------------------|--|
| Syllabus Outline | <p>Syllabus outline:</p> <p>The module explores the theory and practice of organisational development, complexity and change at the level of the organisation, group and individual and their interdependencies. A personal and professional development strand looks at the notions of organisational citizenship, influential behaviours and resilience and the need for personal change to achieve preferred futures.</p> <p>In addition to this the module serves an integrative function in drawing together strands of learning from the module and the programme more widely through an integrative, community-based project. Key aspects of the syllabus are outlined in the schematic below.</p>  <pre> graph LR A["Theory & Practice of Organisational Development (OD) & Change: • Approaches to organisational development and their implications for practice • The changing landscape of OD and change: complexity approaches • Leading and initiating change creatively: effective change agency • Ethics, sustainability and change"] --> B["Integrative Project: • Initiating, scoping and setting up a community-based project • Running a project effectively drawing on learning across the programme • Evaluating the project • Development planning supported by learning from the project • Effective teams: working with difference and diversity"] C["Personal & Professional Development: • Personal challenges of change and resilience • Self-management and active organisational citizenship • Influential behaviours • Self-awareness and learning • Personal change and preferred futures"] B <--> C D["Prior Learning on the Programme"] --> B </pre> |
| Contact Hours/Scheduled Hours | Module delivery will be based on 3 hours of scheduled learning and teaching activities per teaching week over two 12 week teaching blocks, or equivalent. This will consist of a mix of lectures for the delivery of core syllabus concepts, seminars and project workshops. |
| Teaching and Learning Methods | <p>Teaching and learning methods:</p> <p>The module adopts experiential and enquiry-based approaches to learning and uses a Coaching and Mentoring style to guide students learning. It includes a combination of class-based activity, group-based activity and independent study. The taught sessions are designed to actively support the development of independent learning strategies by the students and will place an emphasis on learning as a 'life-long' journey.</p> <p>The sessions combine formal tutor input such as lectures and/ or lectorials with a wide range of participative activities including: case studies; individual and group-problem solving activities; experiential and enquiry based learning methods; student-led discussions of existing research; and article reviews. There will be a strong emphasis on linking learning from directed readings to their own enquiries and to application in the workplace, including implications for leadership and management.</p> |

The assessment is designed to provide an opportunity to reflect critically and from an ethical perspective on the student's own experience of contemporary issues in business and organisational practice and upon the relationship between theory and practice.

The Project presentation provides students with an experience of presenting their projects and project learning outcomes and develops and evidences personal resilience, team-working and organisational citizenship.

Students will be directed towards the University Library online Study Skills resources for the development of skills appropriate to the level and style of the module. Students will be directed on how the resources on this site should be used to develop the skills that will underpin their studies in the module handbook and/or via Blackboard <http://www.uwe.ac.uk/library/resources/hub/>

Extensive use will be made of Blackboard to support students' learning, to facilitate interactions between students and as a repository for students' own work thereby promoting a sense of learning community.

Key Information Sets Information

Key Information Sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.
