Reading Strategy

All students will be encouraged to make full use of the print and electronic resources available to them through membership of the University. These include a range of electronic journals and a wide variety of resources available through websites and information gateways. The University Library's web pages provide access to subject relevant resources and services, and to the library catalogue. Many resources can be accessed remotely.

Students will be directed towards the university study skills website, mySkills, as appropriate. Students will be encouraged to use Blackboard resources referred to in the module handbook. Students are not expected to purchase a core text for this module.

The following list is provided for validation panels/accrediting bodies as an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, current advice on what to read will be available via other, more frequently updated mechanisms.

Essential reading

While there is no set textbook, there are some specific books that the students will find of particular value. For an introductory survey to emerging markets students are recommended:

Pelle, S. (2007) *Understanding Emerging Markets: Building Business BRIC by Brick*. London: Sage. [isbn 0761935576].

Further reading

Further reading will be required to ensure students are familiar with current research, classic works and others matters specific to their interests. This reading will be found in the module handbook provided at the outset of the module. One important source of literature is academic journals such as *Harvard Business Review*, *Journal of International Business Studies*, *Journal of World Business*, *Management International Review*, and *Financial Times*. Access to these journals is available through the library and most available electronically.

Part 3: Assessment

Assessment Strategy	<p>Controlled Conditions: A written exam (2 hours) has been selected as the preferred means of assessing student depth and breadth of understanding of the material. The primary reason for this is that the module covers a wide scope of theories and case studies. In order to ensure that students have a firm grasp of the topics covered, a written exam is preferred.</p> <p>Coursework: A 2000 word essay is also selected on the grounds that it provides students with an opportunity to delve into a particular aspect of the module in depth. Essays afford students the opportunity to improve their writing skills which is essential for management career progression.</p>
