	7. Time kee	eping and pro	fessional cond	luct (Compon	ent A2)	
Syllabus Outline	This module is composed of two related units each of which will investigate different aspects of the journalism-society relationship.					
	<i>Unit one</i> examines the historical development of the news media (press, radio and television). Special attention is devoted to the manner in which journalism has changed over time and the interactions with society that have driven this process to illustrate the connections between the two. It will detail the rise of 'objective' reporting methods, particularly with regard to their formal legitimisation by news organisations as being consistent not only with professionalism but also with the 'public interest'.

Reading Strategy	Essential reading may be supplied as printed copies or made available electronically via Blackboard. Essential reading may include not just specific articles but set text books. In addition, students will expected to undertake <u>further reading and viewing</u> from a list of texts and resources chosen especially to support the module, listed in the Handbook and revised annually, or from topical items identified during the run of the module. These will help develop students understanding of the key topics and we will recommend they explore a selection in whole or in part. Most resources should be available in the campus library or electronically via the web but exceptionally they may not be and this will be indicated in the Module Handbook.
