

MODULE SPECIFICATION

Part 1: Information						
Module Title	Engineering Project Management					
Module Code	UFMF77-15-M		Level	Level 7		
For implementation from	2019-	20				
UWE Credit Rating	15		ECTS Credit Rating	7.5		
Faculty	Faculty of Environment & Technology		Field	Engineering, Design and Mathematics		
Department	FET Dept of Engin Design & Mathematics					
Module type:	Standard					
Pre-requisites		None				
Excluded Combinations		None				
Co- requisites		None				
Module Entry requirements		None				

Part 2: Description

Overview: Engineers typically spend most of their careers working in project teams. Managing projects is a critical skill for career development. To be effective they need to understand the tools and techniques available to them and the issues associated with meeting business and personnel needs. Much of this learning comes from engagement in and reflections of project operations.

Educational Aims: See Leaning Outcomes

Outline Syllabus: See Learning Outcomes

Teaching and Learning Methods: See Learning Outcomes

Part 3: Assessment

The assessment is designed to provide a structured introduction to the concepts and principles of project management.

STUDENT AND ACADEMIC SERVICES

Following the initial teaching session students will complete a series of on-line study units resulting in an on-line test. The on-line test on project management concepts is based on an internationally recognised project management framework. These tests will build understanding of the principles of project management with techniques to support good practice.

At the end of the second teaching session students will be required to prepare a group presentation (controlled conditions assessment) examining a real-world project management scenario. For the group work, a transparent method is in place for identifying contribution. This peer assessed process is moderated and is used to re scale group mark for individual students.

The final element of assessment is an individual case study. Students are expected to demonstrate structured approach to a given project management case-study problem making use of the feedback obtained from the group presentation. The output will be a 1500 word report.

The resit report will be a rework of the original case study taking into account feedback from the 1st sit report.

First Sit Components	Final Assessment	Element weighting	Description
Report - Component B		60 %	Individual report (1500 words)
Presentation - Component A	✓	25 %	Group presentation (15 mins)
Online Assignment - Component B		15 %	Online project management test
Resit Components	Final Assessment	Element weighting	Description
Report - Component B		75 %	Individual report (1500 words)
Presentation - Component A	✓	25 %	Individual presentation (15 mins)

	Part 4: Teaching and Learning Methods			
Learning Outcomes	On successful completion of this module students will achieve the follo	owing learning	outcomes:	
	Module Learning Outcomes		Reference	
	Critically evaluate different methodologies for managing project activities assess the impact of alternative modes of project design and manage project progress and outcomes		MO1	
	Analyse and interpret stakeholder requirements within a project development plan			
	Understand and apply the underlying concepts and principles that underpin project management methods			
	Assess and mitigate risk within a project development process			
	Identify current research themes and work relevant to the field		MO5	
	Demonstrate knowledge and understanding of the principle tools and applied by professional project managers	l techniques	MO6	
Contact Hours	Independent Study Hours:			
	Independent study/self-guided study	11	.4	
	Total Independent Study Hours:	11	.4	
	Scheduled Learning and Teaching Hours:			
	Face-to-face learning 36			
	Total Scheduled Learning and Teaching Hours:	3	6	
	Hours to be allocated	15	50	
	Allocated Hours	15	60	
Reading List	The reading list for this module can be accessed via the following link: https://uwe.rl.talis.com/modules/ufmf77-15-m.html			

Dart 5.	Contributes	Towards

This module contributes towards the following programmes of study:

Engineering Business Management [Sep][PT][Frenchay][2yrs] MSc 2019-20
