

MODULE SPECIFICATION

Part 1: Information			
Module Title	Conserving Buildings and Places		
Module Code	UBLMXB-15-3	Level	Level 6
For implementation from	2020-21		
UWE Credit Rating	15	ECTS Credit Rating	7.5
Faculty	Faculty of Environment & Technology	Field	Architecture and the Built Environment
Department	FET Dept of Architecture & Built Environ		
Module type:	Standard		
Pre-requisites	None		
Excluded Combinations	None		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description
<p>Educational Aims: The aims of this module are to:</p> <p>Critically examine how conservation philosophy and principles, including the idea of cultural significance, are integrated into current conservation policy & procedures; and</p> <p>Evaluate how conservation philosophy and principles can be used effectively in practice for the conservation of buildings and places.</p> <p>Outline Syllabus: This module is designed to encourage holistic and critical thinking about the principles, policy and practice associated with conserving buildings and places.</p> <p>The primary theme of the module is a consideration of the extent to which cultural significance, said to be embodied-in and represented-by the built cultural heritage, can effectively inform and manage policies, procedures and technical intervention for the conservation of buildings and places.</p> <p>This interaction will be investigated by considering: The purpose of conservation and the social, political, economic, cultural, and technical influences on the creation and development of contemporary conservation philosophy and principles;</p>

STUDENT AND ACADEMIC SERVICES

How conservation philosophy & principles, including the role of cultural significance, are translated into practice for developing managerial approaches and technological intervention for the care and enhancement of buildings and places (e.g. Maintenance and repair strategies, conservation of specific materials/elements, energy & carbon management, new design, change of use etc.);

The statutory planning framework for the conservation of buildings and places;

The implications and practice-based issues for conserving Listed Buildings;

The implications and practice-based issues for interventions on buildings and places within Conservation Areas;

The role of Conservation Management Plans.

Teaching and Learning Methods: Scheduled Learning

The module will be delivered through a variety of scheduled learning contact sessions. These will involve:

Introductory lectures: These will include a combination of:
traditional lecture material;
more interactive breakout sessions.

Structured seminars : These will:

Be group-based

Be student-led and based on specific tasks provided by teaching staff;

Include activities which enable student to research, explore and apply their developing knowledge to specific issues.

Visits and external speakers: This module will also benefit through the inclusion of site visits and / or visiting speakers.

Independent Learning

In addition to the scheduled learning contact time, students will be required to undertake a minimum of 9-10 additional hours weekly of independent learning. This will include directed reading and research, self-directed reading and research, formative exam preparation and summative coursework completion.

Contact Hours:

Activity:

Contact time: 36 hours

Assimilation and development of knowledge: 74 hours

Presentation Preparation: 20 hours

Coursework Preparation: 20 hours

Total Study Time: 150 hours

Part 3: Assessment

The assessment strategy for the module is made up of two components:

Component A

A group presentation is a suitable, rigorous and effective mechanism under controlled conditions for measuring the learning outcomes. The presentation will test their level of knowledge, their ability to manipulate that knowledge through responding to specific scenarios and requirements.

The presentation will last for approximately 20 minutes.

At resit, the presentation will be done individually.

STUDENT AND ACADEMIC SERVICES

<p>Component B</p> <p>The coursework will be an individual summary report based on work undertaken during the module. The report might be related to a particular heritage site similar in content to a report type required in the heritage sector of the construction industry, e.g. an historic building record, a HER revision, a conservation plan, an assessment of cultural significance etc. The student will be expected to undertake research into the particular site and apply their findings using the skills and knowledge acquired from the contact sessions.</p>			
First Sit Components	Final Assessment	Element weighting	Description
Report - Component B	✓	75 %	Conservation Report (1500 words – equivalent)
Presentation - Component A		25 %	Group Presentation (20 min)
Resit Components	Final Assessment	Element weighting	Description
Report - Component B	✓	75 %	Conservation Report (1500 words – equivalent)
Presentation - Component A		25 %	Individual presentation (10 min)

Part 4: Teaching and Learning Methods													
Learning Outcomes	<p>On successful completion of this module students will achieve the following learning outcomes:</p> <table border="1"> <thead> <tr> <th>Module Learning Outcomes</th> <th>Reference</th> </tr> </thead> <tbody> <tr> <td>Evaluate the influences on the development of conservation philosophy and principles, identifying the nature of the problems which arise when applying conservation principles to policy and to practice</td> <td>MO1</td> </tr> <tr> <td>Evaluate the idea of cultural significance and explain how this can be effectively used to manage the practice of conservation of buildings and places</td> <td>MO2</td> </tr> <tr> <td>Explain and assess the effectiveness of the current policy framework for building conservation</td> <td>MO3</td> </tr> </tbody> </table>	Module Learning Outcomes	Reference	Evaluate the influences on the development of conservation philosophy and principles, identifying the nature of the problems which arise when applying conservation principles to policy and to practice	MO1	Evaluate the idea of cultural significance and explain how this can be effectively used to manage the practice of conservation of buildings and places	MO2	Explain and assess the effectiveness of the current policy framework for building conservation	MO3				
Module Learning Outcomes	Reference												
Evaluate the influences on the development of conservation philosophy and principles, identifying the nature of the problems which arise when applying conservation principles to policy and to practice	MO1												
Evaluate the idea of cultural significance and explain how this can be effectively used to manage the practice of conservation of buildings and places	MO2												
Explain and assess the effectiveness of the current policy framework for building conservation	MO3												
Contact Hours	<table border="1"> <thead> <tr> <th colspan="2">Independent Study Hours:</th> </tr> </thead> <tbody> <tr> <td>Independent study/self-guided study</td> <td>114</td> </tr> <tr> <td>Total Independent Study Hours:</td> <td>114</td> </tr> <tr> <th colspan="2">Scheduled Learning and Teaching Hours:</th> </tr> <tr> <td>Face-to-face learning</td> <td>36</td> </tr> <tr> <td>Total Scheduled Learning and Teaching Hours:</td> <td>36</td> </tr> </tbody> </table>	Independent Study Hours:		Independent study/self-guided study	114	Total Independent Study Hours:	114	Scheduled Learning and Teaching Hours:		Face-to-face learning	36	Total Scheduled Learning and Teaching Hours:	36
Independent Study Hours:													
Independent study/self-guided study	114												
Total Independent Study Hours:	114												
Scheduled Learning and Teaching Hours:													
Face-to-face learning	36												
Total Scheduled Learning and Teaching Hours:	36												

STUDENT AND ACADEMIC SERVICES

	Hours to be allocated	150
	Allocated Hours	150
Reading List	<p><i>The reading list for this module can be accessed via the following link:</i></p> <p>https://uwe.rl.talis.com/modules/ublmxb-15-3.html</p>	

Part 5: Contributes Towards

This module contributes towards the following programmes of study:

Building Surveying [Sep][FT][Frenchay][1yr] MSc 2020-21

Building Surveying [Sep][PT][Frenchay][2yrs] MSc 2020-21

Building Surveying {With Preparatory Studies} [Sep][FT][Frenchay][2yrs] MSc 2020-21

Building Surveying [Sep][FT][Frenchay][2yrs] GradDip 2020-21

Building Surveying [Sep][PT][Frenchay][3yrs] GradDip 2019-20

Building Surveying {With Preparatory Studies} [Sep][PT][Frenchay][3yrs] MSc 2019-20

Architectural Technology and Design [Sep][FT][Frenchay][3yrs] BSc (Hons) 2018-19

Building Surveying [Sep][FT][Frenchay][3yrs] BSc (Hons) 2018-19

Interior Architecture [Sep] [FT] [Frenchay] [3yrs] BA (Hons) 2018-19
