

MODULE SPECIFICATION

Part 1: Information			
Module Title	Commercial Refurbishment		
Module Code	UBLMWS-30-3	Level	Level 6
For implementation from	2019-20		
UWE Credit Rating	30	ECTS Credit Rating	15
Faculty	Faculty of Environment & Technology	Field	Architecture and the Built Environment
Department	FET Dept of Architecture & Built Environ		
Module type:	Standard		
Pre-requisites	Commercial Development 2019-20		
Excluded Combinations	None		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description
<p>Overview: This module draws together a number of issues relating to the repair, refurbishment or adaptation of individual buildings in complex urban situations to respond to obsolescence and changes in demand for commercial buildings, in order to add value to an existing building in support of business objectives.</p> <p>Educational Aims: See Learning Outcomes.</p> <p>In addition the educational experience may explore, develop, and practise but not formally discretely assess the following:</p> <p>Working as a team member.</p> <p>Outline Syllabus: The following provides an indicative list of headings that will help inform the syllabus although not necessarily in this sequence, or with equal measure:</p> <ul style="list-style-type: none"> Obsolescence as a driver of refurbishment Analysis of Client's Requirements Development/Project Briefs Desk Studies- Spatial characteristics, development potential, constraints Condition Assessment of Complex Buildings

STUDENT AND ACADEMIC SERVICES

Feasibility Studies- Option appraisal of alternative design solutions
 Initial and Life Cycle Costs and Value Engineering
 Defects to Commercial Buildings- concrete, steel, glass, claddings, roofs
 The management of deleterious materials-Asbestos, HAC, calcium chlorides
 Implementation of the design and technical solution
 Fabric improvement strategies
 Legal and Regulatory Compliance
 Demolition and Alterations
 Implementation of Project Execution Plans and Project Risk Management
 Works Progress and Quality Monitoring
 Project and Stakeholder Financial Management
 Assessment of Primary Services with respect to undertaking a major refurbishment project

Teaching and Learning Methods: Teaching will be by means of lectures, tutorials, studios and workshops. Students will be expected to work from a reading list and undertake pre reading prior to the contact period for the topic.

The subject matter will be content driven in semester 1 to enable students to be examined at the end of the semester. The second semester will be devoted to the application of knowledge gained in semester 1 to a piece of coursework to be undertaken in semester 2

Scheduled learning includes lectures, seminars, tutorials, project supervision, fieldwork; external visits.

Contact Hours:

Activity:

Contact time: 72 hours

Assimilation and development of knowledge: 148 hours

Exam preparation: 20 hours

Coursework preparation: 60 hours

Total study time: 300 hours

Independent learning includes hours engaged with essential reading, and assignment preparation.

Part 3: Assessment

The assessment strategy can be divided into two distinct elements. A: relates to the teaching content and is assessed by summative assessment in the form of a 2 hour examination under controlled conditions.

B: relates to the project work issued in semester 1 and undertaken in semesters 1 and 2. It is a feasibility report with an equivalency of 2,500 words per student, based upon a site visit undertaken in semester 1 and is a group project with individual components.

First Sit Components	Final Assessment	Element weighting	Description
Report - Component B	✓	75 %	Individual report (2,500 words)
Examination - Component A		25 %	Examination (2 hours)
Resit Components	Final Assessment	Element weighting	Description
Report - Component B	✓	75 %	Individual report (2,500 words)
Examination - Component A		25 %	Examination (2 hours)

STUDENT AND ACADEMIC SERVICES

Part 4: Teaching and Learning Methods																					
Learning Outcomes	<p>On successful completion of this module students will achieve the following learning outcomes:</p> <table border="1"> <thead> <tr> <th style="text-align: left;">Module Learning Outcomes</th> <th style="text-align: left;">Reference</th> </tr> </thead> <tbody> <tr> <td>Critically analyze a client's requirements and contribute towards the development of a Project Brief</td> <td>MO1</td> </tr> <tr> <td>Identify the significance of factors that contribute to the obsolescence of commercial buildings</td> <td>MO2</td> </tr> <tr> <td>Apply information obtained from a condition assessment of a commercial building to assess the appropriate strategy to be adopted</td> <td>MO3</td> </tr> <tr> <td>Undertake a research of property market data and historic cost data, to contribute towards a comprehensive feasibility study</td> <td>MO4</td> </tr> <tr> <td>Evaluate alternative design and technical solutions for a given building</td> <td>MO5</td> </tr> <tr> <td>Recognise the need for solutions to comply with legal and regulatory constraints such as Party Wall legislation, Planning and Building Regulations, Equalities Act, Asbestos legislation, and Waste Management legislation</td> <td>MO6</td> </tr> <tr> <td>Recognise the importance of environmental legislation in the design and operation of refurbishment schemes and show appropriate consideration for both sustainable design and operation factors</td> <td>MO7</td> </tr> <tr> <td>Recognise and manage commercial, project and personal risk and be able to evaluate Design Risk Assessments</td> <td>MO8</td> </tr> <tr> <td>Produce a Project Execution Plan and apply information obtained from appropriate programme planning software</td> <td>MO9</td> </tr> </tbody> </table>	Module Learning Outcomes	Reference	Critically analyze a client's requirements and contribute towards the development of a Project Brief	MO1	Identify the significance of factors that contribute to the obsolescence of commercial buildings	MO2	Apply information obtained from a condition assessment of a commercial building to assess the appropriate strategy to be adopted	MO3	Undertake a research of property market data and historic cost data, to contribute towards a comprehensive feasibility study	MO4	Evaluate alternative design and technical solutions for a given building	MO5	Recognise the need for solutions to comply with legal and regulatory constraints such as Party Wall legislation, Planning and Building Regulations, Equalities Act, Asbestos legislation, and Waste Management legislation	MO6	Recognise the importance of environmental legislation in the design and operation of refurbishment schemes and show appropriate consideration for both sustainable design and operation factors	MO7	Recognise and manage commercial, project and personal risk and be able to evaluate Design Risk Assessments	MO8	Produce a Project Execution Plan and apply information obtained from appropriate programme planning software	MO9
Module Learning Outcomes	Reference																				
Critically analyze a client's requirements and contribute towards the development of a Project Brief	MO1																				
Identify the significance of factors that contribute to the obsolescence of commercial buildings	MO2																				
Apply information obtained from a condition assessment of a commercial building to assess the appropriate strategy to be adopted	MO3																				
Undertake a research of property market data and historic cost data, to contribute towards a comprehensive feasibility study	MO4																				
Evaluate alternative design and technical solutions for a given building	MO5																				
Recognise the need for solutions to comply with legal and regulatory constraints such as Party Wall legislation, Planning and Building Regulations, Equalities Act, Asbestos legislation, and Waste Management legislation	MO6																				
Recognise the importance of environmental legislation in the design and operation of refurbishment schemes and show appropriate consideration for both sustainable design and operation factors	MO7																				
Recognise and manage commercial, project and personal risk and be able to evaluate Design Risk Assessments	MO8																				
Produce a Project Execution Plan and apply information obtained from appropriate programme planning software	MO9																				
Contact Hours	<table border="1"> <tbody> <tr> <td colspan="2">Independent Study Hours:</td> </tr> <tr> <td style="text-align: center;">Independent study/self-guided study</td> <td style="text-align: center;">228</td> </tr> <tr> <td style="text-align: center;">Total Independent Study Hours:</td> <td style="text-align: center;">228</td> </tr> <tr> <td colspan="2">Scheduled Learning and Teaching Hours:</td> </tr> <tr> <td style="text-align: center;">Face-to-face learning</td> <td style="text-align: center;">72</td> </tr> <tr> <td style="text-align: center;">Total Scheduled Learning and Teaching Hours:</td> <td style="text-align: center;">72</td> </tr> <tr> <td>Hours to be allocated</td> <td style="text-align: center;">300</td> </tr> <tr> <td>Allocated Hours</td> <td style="text-align: center;">300</td> </tr> </tbody> </table>	Independent Study Hours:		Independent study/self-guided study	228	Total Independent Study Hours:	228	Scheduled Learning and Teaching Hours:		Face-to-face learning	72	Total Scheduled Learning and Teaching Hours:	72	Hours to be allocated	300	Allocated Hours	300				
Independent Study Hours:																					
Independent study/self-guided study	228																				
Total Independent Study Hours:	228																				
Scheduled Learning and Teaching Hours:																					
Face-to-face learning	72																				
Total Scheduled Learning and Teaching Hours:	72																				
Hours to be allocated	300																				
Allocated Hours	300																				
Reading List	<p><i>The reading list for this module can be accessed via the following link:</i></p> <p>https://uwe.rl.talis.com/modules/ublmws-30-3.html</p>																				

Part 5: Contributes Towards
This module contributes towards the following programmes of study:
