Part 2: Learning and Teaching				
Learning Outcomes	On successful completion of this module students will be able to:			
	<ol> <li>develop an understanding of photographic practice(s)</li> </ol>			
	2. develop and translate ideas through photographic practice(s)			
	3. develop analytical and critical skills through research and evaluation			
	4. develop skills in photographic and related practice(s)			
	<ol> <li>demonstrate an understanding of a range of approaches within photographic practice(s)</li> </ol>			
	<ol><li>demonstrate an understanding of the role of research to inform photographic practice(s)</li></ol>			
	<ol><li>perform basic skills with awareness of tools and materials and be aware of potential hazards</li></ol>			
	<ol> <li>identify key elements of a problem and select methods, techniques and/or processes appropriate to task</li> </ol>			
	(All assessed through Component A)			
Syllabus Outline	Photographic, and related, practices will be introduced through the exploration and investigation of a range of concepts, practical skills, practitioners and historical/contemporary examples that challenge students' pre-conceptions about photography and develop their awareness of the creative opportunities and possibilities afforded through photographic, and related, practice(s).			

	Workshops, group work, lectures and independent study will focus intellectual, critical and creative enquiry. Through experimentation with concept, skills, processes, materials and methods students will be expected to develop and present a body of work that explores a particular theme relevant to their own ideas and ambitions. Throughout the module, students will be encouraged to work in a creative, investigative and experimental manner. Through individual feedback tutorials and seminar group critiques and discussion, they will be expected to develop the ability to begin to place their own work within a range of art, design, media and broader cultural contexts and practice(s). Critical engagement and reflection on practice will be supported through tutorial and seminar group activity. Emphasis in this module is placed on exploring and identifying
	appropriate forms of documentation and extending skills in critical evaluation, in order for personal methodologies to be coherently articulated and communicated. Students are introduced to professional expectations and the communication of work and ideas in photographic practices.
	Assessment will take the form of presentation and critique, and will be made upon a body of work that should include:
	<ul> <li>i) Professional Pitch/Presentation of work in documented form – 10 slides powerpoint or similar.</li> <li>ii) Evidence of participation in scheduled teaching activities and workshops</li> <li>iii) Developmental work and final outcome/s</li> <li>iv) Participation in summative critique.</li> </ul>
Contact Hours	• Students can expect a total of <b>108</b> hours scheduled contact time for this module within the context of their other learning and teaching activities. This includes tutorials, group crits, lectures, seminars, site visits / field trips, studio-based sessions, inductions, workshops, field work, work-based learning or project supervision.
	<ul> <li>Contact time may also take a synchronous virtual form rather than face-to- face, through the use of email discussion groups, virtual learning environments (VLEs) and other technology-aided means. It can also take place in a work-based setting.</li> </ul>
Teaching and Learning Methods	The methods employed in this module are designed to be diagnostic in terms of individual progression within the programme.
	Practical skills are delivered through workshops and studio activities that involve both demonstration and practice. These workshops will look specifically at building confidence and a level of proficiency in the disciplines studies. Emphasis will be placed on establishing a meaningful relationship between conceptual and making activities. Analytical, evaluative and planning skills will be supported through seminars/tutorials/individual critiques, in order to encourage students to adopt an ongoing engagement with ideas/processes/methods of production beyond the familiar. Critical engagement and reflection on ideas/practices examined within the module will be documented and presented for assessment in the supporting and development work.
	Health and Safety guidelines and further explanation of key terminologies, skills and processes introduced within technical workshops will be outlined in note/visual form

		istributed to	o students for	personal cons	ultation and c	bservation a	t the point of
	The negotiation of individual pathways through the module will be supported through ongoing tutorial support, and through ongoing, structured review. This will allow for critical evaluation of the students' work, and enable informed guidance to be offered

Part 3: Assessment					
Assessment Strategy	Assessment strategies within the programme that this module contributes to reflect the Faculty of Art, Creative Industries and Education's philosophy which considers assessment to be part of the learning process.				
	Formative and summative assessments are designed to provide the opportunity for students to understand and reflect upon their achievements, and to support the monitoring of progress by tutors and students. Assessment methods used are varied, are relevant in demonstrating achievement to both academic and industry stakeholders, and form a coherent programme of assessment which is designed to offer students the maximum opportunity to demonstrate the skills, knowledge and experience that they have gained through the course of study, as well as to support ongoing and continuous improvement in their individual creative practice and development as practitioner-researchers.				
	The principle of 'learning through making' is core to learning strategies in the Department of Creative Industries – these learning activities are then expanded into and through an exploration of contemporary practice in relevant and related subject areas.				
	At assessment, therefore, students are expected to present evidence of work which demonstrates engagement with the minimum number of learning hours for the module (contact and independent study hours).				
	Forms of assessment used as part of the overall programme include:				
	<ul> <li>Presentation and participation in studio-critique</li> <li>Poster presentation</li> </ul>				
	<ul><li>Group and individual visual presentations</li><li>Group and individual verbal presentations</li></ul>				

<ul> <li>Written Assignments – forms of writing relevant to the creative industries, including academic/essay and industry focused/report writing</li> <li>Group critiques</li> <li>Peer and self-assessment</li> <li>Evaluative and reflective outcomes, including visual, verbal and written</li> </ul>
Formative and summative assessment activities that involve students participating in the evaluation of presented work (their own and others') take place throughout the programme. Participation in and attendance at these sessions forms part of the assessed content of the module as a result of this.
Feedback (verbal and/or in writing) at regular points throughout the module provides students with a clear understanding of their progress and advice about how this can be improved.

Identify final assessment component and element	Body of developmental work		
			B:
% weighting between components A and B (Standard modules only)		100%	

First Sit	
Component A (controlled conditions) Description of each element	Element weighting (as % of component)
Body of developmental work, summative group critique, documentation of work	100%
Component B Description of each element	Element weighting (as % of component)

Resit (further attendance at taught classes is not required)			
Component A (controlled conditions) Description of each element	Element weighting (as % of component)		
Body of developmental work, evaluative statement, documentation of work	100%		
Component B Description of each element	Element weighting (as % of component)		

If a student is permitted an **EXCEPTIONAL RETAKE** of the module the assessment will be that indicated by the Module Description at the time that retake commences.
